

Environment pollution

A hand holding a small globe with a rainbow, wind turbines, houses, and a swan, symbolizing environmental care. The globe is held in a person's hand, and the background is a bright blue sky with white clouds and a sunburst effect on the left. The globe itself is a miniature world with a green landscape, a rainbow arching across it, and various elements of nature and human habitation. On the left, there are three white wind turbines. In the center, there are several houses and trees. On the right, there are more trees and a white swan. The overall scene is bright and positive, suggesting a focus on environmental protection and sustainability.

Performers: Moshna Anna, Vlasyuk Victor, Kokot Liza, Budko Olga, Egorova Sevda, and Selybel Yulia. Teacher Sheremet T.V. Form 9-B sc Dolinska gymnasium. School № 3

Text

Environment is the place where we live. For thousands of years people lived in harmony with environment. But man's interference in nature began to increase with the development of civilization .Our ecology becomes worse and worse with every new day. People destruct forests,cut down trees. There are a lot of ecological

The most serious are : global warming, shortage of resources, climate change, noise from cars and buses and pollutions in it's many forms. Many rivers and lakes are polluted too. Fish and different organisms can't live in them. Our air is filled with chemicals and exhaust gases. If global warming continues, the sea levels are expected to rise much more.

Every year world industry pollutes the atmosphere with about 1000 millions tons of dust and other harmful substances. We will not have a society if we destroy our environment. So, save the environment! Save the nature! Save your life!

- 1) How many harmful substances pollute the air every year?**
- 2) Why does our ecology become worse and worse?**
- 3) What will happen if global warming continues?**
- 4) Which environmental problems are the most serious?**
- 5) What is our air pollute?**

1.Environment is the place, where we live.

2.Our ecology becomes worse and worse with every new year.

3.Many rivers and lakes are polluted too.

4.If global warming continues, the sea levels are expected to rise much more.

5.People destruct forests, cut down trees.

THE END
