MANAGING YOUR COST OF LIVING – BE A SMART CONSUMER

Areas for saving

- Check your bills.
- Negotiate better plans (banking fees and services, telephone, cell phone).
- Pack a lunch.
- Consider whether you need to own a car, a home or the latest high-tech gadget.

MANAGING YOUR COST OF LIVING – BE A SMART CONSUMER

Check your bills

- Spot mistakes and overcharges.
- Pay less in late fees, interest and penalties.
- Get errors corrected before it's too late.

Negotiate better plans

Call each service provider and ask:

- How can I cut back my monthly bills?
- Am I currently on any plans?
- Do you have a better plan or deal for me?
- If so, what is the timeframe?
- Will I be put on contract for any new deals?
- Can I bundle services to save money?
- Can I avoid interest or late payment penalties?

Reduce banking costs

- What am I paying in monthly service charges?
- How much am I paying for ATM fees?
- Can I save by doing more banking online?
- Am I eligible for a low-fee deal if I'm a student?
- Can I get a reduced fee if I keep a minimum balance?
- Can you suggest a better plan for me?

MANAGING YOUR COST OF LIVING - BE A SMART CONSUMER

Banking Tools

Compare phone costs

- What am I paying for land line and cell phone?
- How much do my long-distance calls cost?
- Can I bundle services together to save?
- Can I switch suppliers to save money?
- Do I have a contract? When does it expire?
- Have I called suppliers to ask how to cut costs?

Bundling services pays big-time

- You pay \$25/month for home phone,
 \$30 for cell phone, \$35 for Internet and
 \$40 for cable TV = \$130
- Example of bundling discounts:
 - Combine 2 services, save 5%
 - Combine 3 services, save 10%
 - Combine 4 services, save 15%
- Save 15% of \$130 = \$19.50 per month

How to save on food

- Eat breakfast at home.
- Bring your lunch, drinks and snacks (and coffee).
- "Veg out" on meatless meals once a week or more.
- Cook one big dish on weekends and freeze.
- Shop with a buddy at discount supermarkets and split quantities.
- Set a budget and stick to it.
- Bring a list and don't shop on an empty stomach.

Do you really need a car?

- Add up the real costs of ownership (gas, insurance, depreciation, interest and maintenance).
- Check out Driving Costs brochure
 www.caa.ca, under Working for You, click Driving Costs.
- Try the Vehicle Lease or Buy Calculator
 www.ic.gc.ca, select Just for consumers, select
 Office of Consumer Affairs (OCA), click Spending
 Smarter Calculators.
- Check out The Car Sharing Network <u>www.carsharing.net</u>, click Where to find Car Sharing.

When owning a home doesn't make sense

- When you move frequently:
 - It takes at least 5 years to make it worthwhile.
- If you have a very low down payment:
 - You'll need mortgage default insurance.
 - You may have a higher interest rate.
- When your income covers only mortgage payments and taxes.

- Try it out:
 - Put the monthly costs of owning a home (mortgage, property taxes, maintenance, etc.) into a savings account.
 - Can you afford to live on what's left?
 - Could you afford higher costs for heating, taxes or insurance?

MANAGING YOUR COST OF LIVING – NEEDS AND WANTS

MANAGING YOUR COST OF LIVING - NEEDS AND WANTS

What is your latte factor?

"We've all got a latte factor, regardless of our income level." – David Bach

- Designer coffees
- Lunch in restaurants
- Impulse buys
- The latest, greatest [fill in the blank]

Questions to ask yourself

- When does a want become a need?
- What motivates you to buy –
 advertising, friends, trendy styles?
- Does the urge to buy die the next day?
- Do your purchases make you happier?
- What "needs" are now collecting dust?
- What can you learn to live without?

Reduce impulse buying

- Avoid trips to stores and shopping malls and online buying sites.
- Pay cash or cheque for purchases and only carry the cash you are wiling to spend.
- Reduce available credit on your credit card and line of credit.
- Leave credit cards at home.
- Sleep on it and see if you still want it the next day.
- Take baby steps and cut costs by increments.

CREDIT AND MANAGEMENT

Paying your credit card bill just a couple of days after the due date won't affect your credit report.

True or false?

All credit cards have the same grace period (also known as an interest-free period).

True or false?

Last month, your credit card balance was zero. This month, your statement shows that you made a \$500 purchase. If you pay off \$400 by the due date, you will be charged interest only on the \$100 left to pay.

True or false?

If you use your credit card to take money out as a "cash advance", you don't have to pay interest on the amount you've withdrawn as long as you pay your credit card bill in full by the due date on your statement.

True or false?

Without a good credit history...

- a) Your bank may charge you higher interest rates on a personal loan for a car, house, etc.
- b) Your bank may refuse to give you a loan.
- You might not be able to get a lease on an apartment.
- d) A and B only.
- e) All of the above.

How to stay out of trouble

- Pay the balance in full each month.
- If you can't pay it in full, pay as much as you can.
- Don't make only the minimum payment.
- If you always carry a balance, get a low-rate card.
- Transfer the balance to a line of credit with a lower rate.
- Pay a few days before the due date.

Minimum vs. fixed payments

Minimum • Initial balance: \$3,000

• Interest rate: 18%

	Make minimum payments of 2.5%/month	Make fixed payments of \$100/month	Difference
Time to pay off balance	263 months	41 months	222 months
Total interest paid	\$4,115.41	\$1,015.49	\$3,099.92

debt

- **Tips for** Shop around.
- managing Compare interest rates. Don't accept your first offer.
 - Keep within your budget.
 - Borrow only what you can afford to pay back regularly and on time.
 - Pay back more and pay more often.
 - Additional payments mean you'll pay it off sooner and pay less interest.

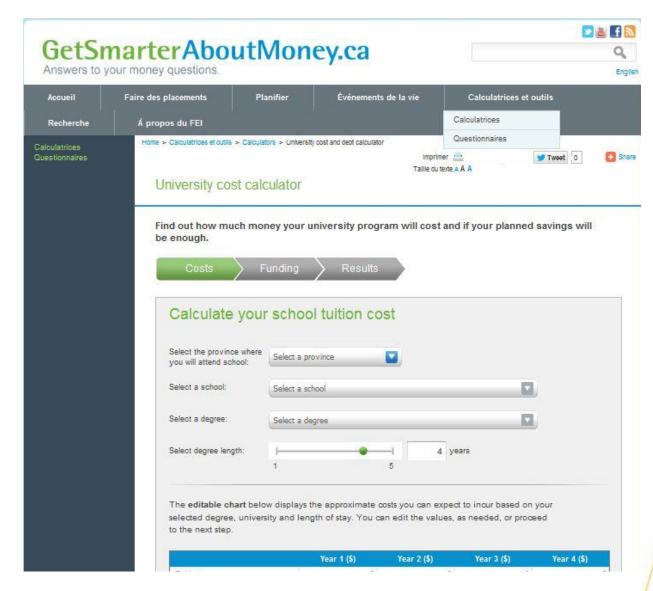

Canada Student Loans Program

- Canada For students in financial needs
- **Student** Interest-free while you are enrolled in post-secondary education
- Program Become payable 6 months after you leave your studies
 - Apply for this federal support through your provincial or territorial student assistance office

Student Debt Calculator

Getting a copy of your credit report is:

- a) A good way to check for identity theft
- b) The only way to know if your report is accurate
- c) Free of charge, if you request the report be sent to you by mail
- d) All of the above

If you have applied for several credit cards or other forms of credit within a short period of time, this could have a negative impact on your credit score.

True or false?

Which of the following does *not* affect your credit score?

- a) Your payment history whether you have ever missed a debt payment
- b) Any collection of bankruptcy that has been recorded against you
- c) Your history of repaying informal loans from family or friends
- d) Any outstanding debts you have
- e) Your account history how long you have had credit, and the type of credit you have

Recognize the danger signals

- You use your credit cards as a necessity instead of a convenience.
- You use credit or cash advances for your daily living expenses.
- You miss payments or due dates.
- You're near the credit limit on most of your cards.
- You borrow from one card to pay another.
- You transfer balances every few months just before the introductory offer expires.

Take control of your debt

- Use savings to pay off balances.
- Pay down your highest interest rate debts first.
- Switch to less expensive credit cards.
- Call creditors to negotiate lower rates.
- Start automatic/online bill payment to stay on schedule.
- Leave your credit card at home.
- Avoid "buy now, pay later" offers.
- Get a consolidation loan to make one low-interest payment.

Why save for the future?

- Feel more secure and in control.
- Be prepared for emergencies.
- Reduce stress and conflict.
- Spend with less guilt or fear.
- Afford major purchases.
- Pay off debt and avoid new debt.
- Retire comfortably.

Make your goals specific

- Set a dollar amount and deadline.
- Break your goal into smaller goals.
- Write down your goal and post it where you can see it every day.

Savings

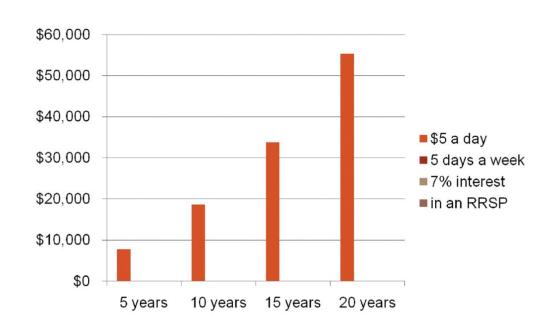

- Set up an emergency fund.
- Pay yourself first.
- Make savings automatic.
- Grow your savings.

Make your savings automatic

 Set up direct debits from your bank account or paycheque.

- Save 5% to 10% of your take-home pay.
 - If you earn \$2,000 a month after tax:
 - Saving 5 percent = \$100 a month = \$1,200 a year.
 - Saving 10 percent = \$200 a month = \$2,400 a year.
- Extra money (from gifts, tax refunds, etc.) or a raise? Save it.

Compounding makes your money grow

Actions Amy Amanda
Starts saving at: 20 30
Puts \$1,000 a year into her RRSP to age: \$15,000 \$35,000

Actions Amy Amanda

Total she earns at age 65: \$141,700 \$116,100

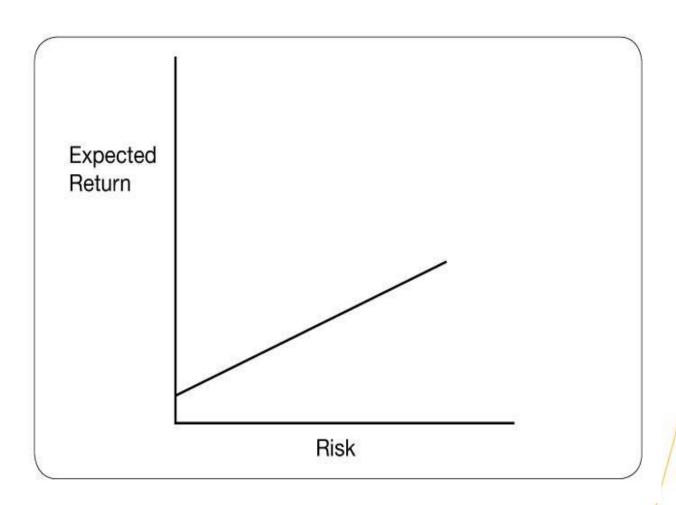

Conclusion:

- Start saving as soon as possible (the sooner the better)
- Save as long as you can (for a long period of time)

Rule of 72: Time it takes to double your money

Interest rate	Your money doubles in:
2%	36 years
4%	18 years
6%	12 years
8%	9 years
10%	7.2 years
12%	6 years

Risk and return

Four types of investments

- Investments that pay interest (savings accounts, CSBs, GICs, etc.)
- Shares in a company (stocks, mutual funds that invest in stocks, etc.)
- Property (real estate, art, precious metals, etc.)
- Direct investment in a business

Savings Account Selector Tool

Canada Savings Bonds

- Available from early October to December each year.
- Opt for regular or compound interest.
- Buy online, where you bank or invest, or at your workplace through payroll deduction.
- Canada Savings Bonds:
 - Cashable any time, but no interest paid if cashed within first 3 months.
- Canada Premium Bonds:
 - Cashable only once a year but pay more.

GICs

- Your money is locked up for a period of time, ranging from less than 1 month to 10 years.
- Generally, the longer the term, the higher the rate of interest.
- Traditional GICs: principal and return are guaranteed.
- "Market-linked" GICs: principal is guaranteed, but returns are linked to a stock market index, so they fluctuate.
- You can also get cashable GICs; more flexible but with lower rates.

Stocks

- Shares in a company; you are partial owner of the company.
 - Share prices and returns can be positive or negative.
 - No guarantee of income: you could lose your whole investment.
 - Traded on stock exchanges or over-the-counter markets.
 - Stocks have outperformed other investment options by a wide margin over periods of 10 years or more.

Why invest in mutual funds?

- Professional management
- Diversification: your money is spread over several investments
- Ease of access: you can generally sell any time
- Readily available through most financial institutions

Questions to ask a prospective financial advisor

- What is your background, experience and track record?
- Is your firm registered with a securities commission or other formal body?
- What can you do for me? Provide advice only, sell products, help me build a financial plan?
- What products do you sell?
- How do you get paid?
- How do you work with your clients?
- Can you provide references?

The three knows

- Know yourself: your investment goals and timeline, your risk tolerance.
- Know your investment: is it right for you?
- Know your advisor.

Registered tax plans

- Tax-Free Savings Accounts (TFSAs): earn income from investments without paying taxes on the income
- Registered Retirement Savings Plans (RRSPs): defer paying income tax until retirement
- Registered Education Savings Plans (RESPs): shift the tax to a student
- Registered Disability Savings Plans (RDSPs): shift the tax to someone with a disability
