

*Paul Anthony
Samuelson*

(1915-2009)

- *Biography*
- *Life works*
- *Conclusion*

Biography

Paul Samuelson was born on May 15, 1915, in Gary, Indiana. He was educated at the University of Chicago in Illinois and at Harvard University. Although he was not the best of students, Samuelson became one of the greatest economists of the twentieth century.

Biography

He was educated at the University of Chicago in Illinois and at Harvard University.

Publications

“Foundations of Economic Analysis” (1947)

The book proposes to:

- *examine underlying analogies between central features in theoretical and applied economics*
- *and study how operationally meaningful theorems can be derived with a small number of analogous methods*

Publications

- *The book has been translated into forty-one languages and sold over four million copies; it is considered the best-selling economics textbook in history.*

“Economics” (1948)

Nobel Prize

He was given the 1970 Nobel Prize in Economics for doing "more than any other contemporary economist to raise the level of scientific analysis in economic theory."

Conclusion

Samuelson died after a brief illness on December 13, 2009, at the age of 94.

Conclusion

In sum, i would like to say that Samuelson has contributed to almost every branch of economics. He made many contributions to mathematical economic theory, and held many positions in which his opinion was highly respected. And i think that Samuelson was one of the greatest economists of the twentieth century. That completes my presentation.
