TEXT.

Joseph Mallord William Turner was born on the 14th of May, 1775. William was a famous painter. His father was a barber. William was only 12 years old when he started drawing. In 1789 Turner began to study in London. At the Royal Academy he studied art. In 1790, at the age of fifteen he exhibited his first picture. And it became very popular. On February the 10th, 1802, Turner became the youngest artist to be awarded the royal title of academician. W. Turner was very fond of nature and often went alone on trips through England and Wales. While travelling, he liked to draw ruined abbeys and castles. Turner was famous for the wonderful colours in his pictures. Most of them were landscapes and sea pictures. He was a master of watercolours. Turner was a real traveller. He visited France, Germany, Italy, Switzerland, but he never lost interest to his own country. Turner died in London on the 19th of December, 1851.

A night sky with the Milky Way galaxy and a forest reflected in a lake. The sky is dark blue and purple, with the Milky Way visible as a bright, hazy band of light. A bright star with a starburst effect is visible in the upper right. The forest is dark and silhouetted against the sky, and its reflection is visible in the water below. The water is dark and reflects the colors of the sky and the stars.
