

ECOLOGICAL PROBLEMS HUMANITY

**FRENCH GEOGRAPHER RECLUS ELISE
APTLY SAID:**

"Man created the environment in his image and likeness." That we have what the environment, which have earned.

For centuries man has everything uncontrollably, giving her nature. But it seems that nature wants "revenge" for each incorrect, ill-considered step.

THE MAN - PART OF NATURE, AND THE MOST DANGEROUS FOR OUR PLANET DISASTERS AND ENVIRONMENTAL POLLUTION CONNECTED WITH IT.

THE WORST ABUSE OF HUMANITY - THIS IS WAR.

CONTAMINATION OF HUMAN CONSCIOUSNESS - IS
THOUGHTLESS, CONSUMER ATTITUDE TOWARDS
NATURE AND ITS RESOURCES.

IN THE TWENTIETH CENTURY, WIDESPREAD PROCESSES SUCH AS POLLUTION OF WATER, SOIL AND AIR, DESERTIFICATION, DEFORESTATION AND SO ON. AND.

THERE ARE SPECIFIC THINGS AS ACID RAIN.

The main sources of anthropogenic pollution are manufacturers of energy (thermal power plants, nuclear power plants, power plant, hundreds of thousands boiler).

All industrial facilities (mainly metallurgical, chemical, oil, cement and pulp and paper), extensive, perehimizovane s / d production, military industry and military objects, vehicles and other means of transport (sea, river, rail, air), mining.

WASTE PROBLEM

CHANGES IN THE ATMOSPHERE

GREENHOUSE EFFECT

due to a sharp increase in the content of carbon dioxide in the atmosphere

**"NATURE - IS NOT WHAT WE HAVE INHERITED
FROM THE ANCESTORS, AND THE FACT THAT WE
TOOK A LOAN FROM DESCENDANTS"**
