

House "Sunny Canyon" in the US

*LLC Alcor-Dom -
construction and sale of private houses.
Chief sales manager: Medvedeva Alexandra*

Ecohouse Sunshine Canyon House in Boulder, Colorado, USA, was designed by the architectural company Renée del Gaudio Architecture and is designed for a family of four.

Characteristic

The total area of the house is 256 square meters. The interior is made in the style of modern minimalism. Open layout and abundance of wood in the finish make the space warm and cozy.

Wooden floors, high ceilings with wooden beams and decor, furniture from natural wood create a unique rural environment. Large panoramic windows with triple-glazed windows fill the rooms with natural light and allow you to admire the surrounding landscape. On the first floor there are bedrooms, on the second floor there is a social zone. The main bedroom occupies the eastern part of the floor, and two children's bedrooms are located on the west side. In the northern part there is a small home office and a guest bedroom.

The common corridor leads to two external terraces on the north and south side of the house. At the lower level of the plot a carport has been built, on the roof of which a solar power station of 3.6 kW is installed, which completely satisfies all the needs of the house in electricity.

We are waiting for you!

Thank you!
