Steve Jobs

Steve
Wozniak

Start or blue box

In September 1971, Stephen Wozniak came across an article in the magazine «Esquire». It told about some "phone freaks" who have learned to crack the codes and make free calls worldwide. Wozniak was very interested in this topic and immediately called Steve Jobs. Having carefully considered the article, they came to the conclusion that everything described seems to be true. And set about trying to create a blue box

Creating apple I

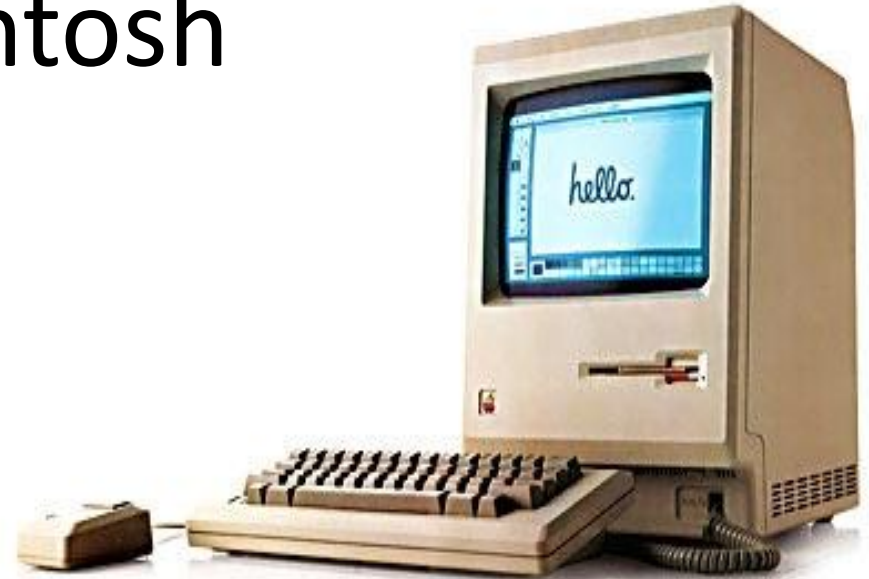

Apple 1 first product Apple Computer (now Apple Inc.), demonstrated in April 1976 in the "Homebrew Computer Club" in Palo Alto, California.

Apple II

first computer commercially available from Apple Computer. This is the direct heir to the computer enthusiast Apple I, which was never produced in large quantities, but it contains a lot of ideas that ensured the success of Apple II.

Macintosh
