

Gravity falls.

**The Creator of the animated series
by Alex Hirsch .**

This animated series.

It contains a lot of secrets, mysteries and humor.

The main characters:

Dipper

Mabel

Secondary characters:

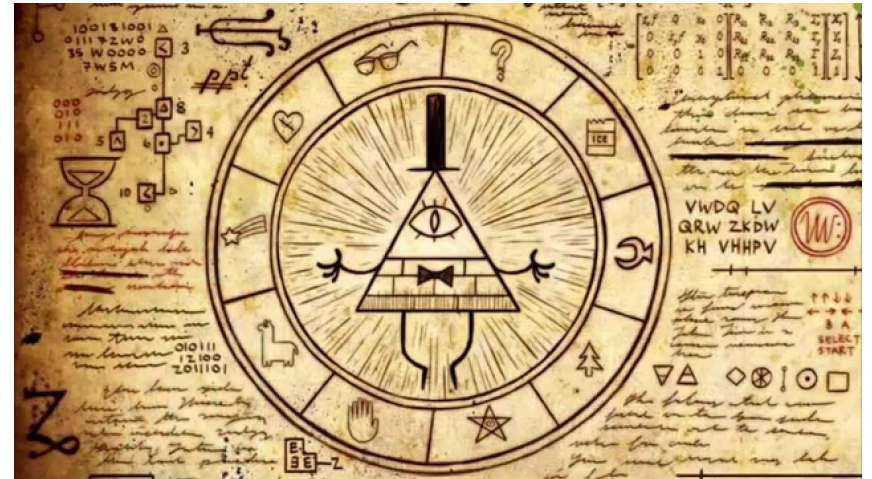

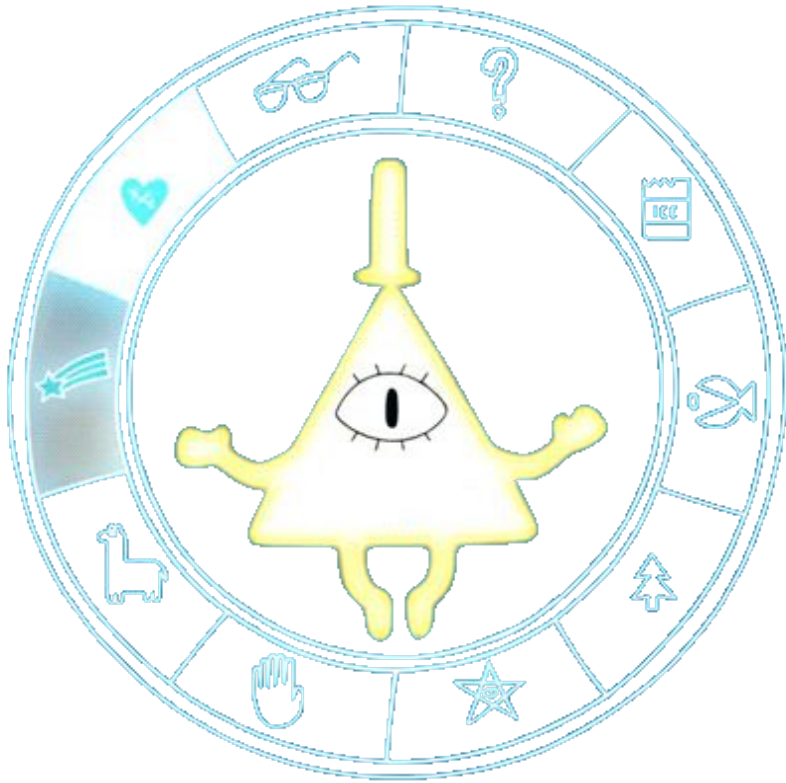

Uncle Stan and uncle Ford .

Soos and Wendy.

Some of the characters has its own symbol in the wheel of Bill .

These characters are : Dipper,Mabel, uncle Stan,uncle Ford,Soos,Wendy,Pacifica,old Fidalford Makhamet,Gideon and Robbie.

Pacifica

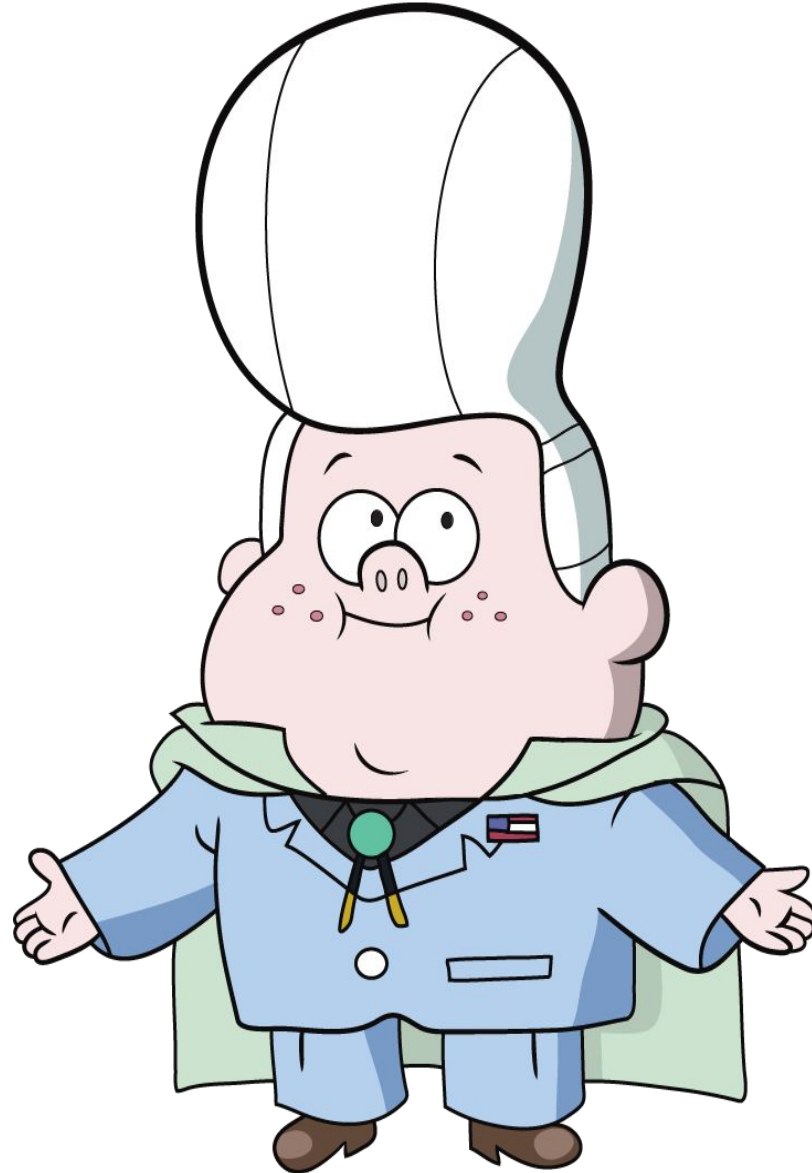

Robbie

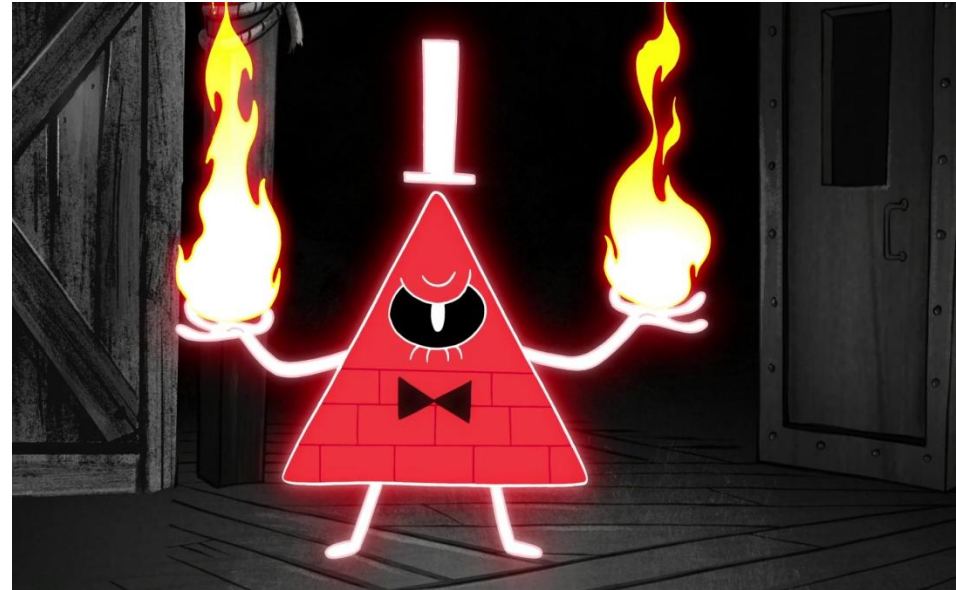

Old Fidalford Makhamet .

And Gideon.

The main villain was bill .It is a demon of the mind, which has caused the Apocalypse - stranovedenie. One day he seized the body of the Dipper . He can't be trusted.

Bill even changed the screen saver in this animated series during stranovedenie.

And some characters based on real people .This is for example the Creator of the animated series and his sister .

In this animated series fans made a lot of fan art .

СЫН!
Я ЖЕ ТЕБЕ СКАЗАЛА,
ЧТО ОБЕД ГОТОВ!!!
НУ МААМ! Я ТУТ МИР
УНИЧТОЖАЮ...
МНЕ ПЛЕВАТЬ! СУП
ОСТЫВАЕТ!!

And by the way in Moscow on may 1 from 12:00 to 19:00 there will be a big event for Gravity falls-GravityCon .

Soon you will acquire the third diary from the animated series all the pages, and extra sheets .

Do they ever need glasses??

"FLOATING EYEBALLS"

are they watching me?

Hard to catch. They either have the power to see the future or have amazing peripheral vision!

Yes. What else would floating eyeballs be doing?

- VISIBLE ONLY AT NIGHT
- NO RETINAL CORD
- NO RESPONSE TO CONTACT

Were they ever a part of some more complete magical creature or have they always been disembodied eyes? Either way, they're deeply unsettling! They will just hover there staring you down. Like ~~one of those~~ portraits whose eyes follow you.

Do not sleep with your windows open.

My the ~~over~~ ~~climber~~ with them near.

DESMODUS ROTUNDUS is small, short-haired, and even-tempered. Nothing like Gravity Falls!

GIANT VAMPIRE BATS!!

Mutated by waste dump? | 10 FEET

The summer heat seems to draw them from their caves. The locals pretend it's "mosquito season," but then why not use bug spray instead of garlic necklaces? Who do they think they are fooling? The bats will settle for cows or sheep but would much rather feed off some feeble human. Human blood tastes ~~bad~~. I can only ASSUME human blood tastes better.

I have not sampled human blood.

The Gremloblin

fungi detail

Half-goblin, half-goblin. Proof that some creatures should NOT interbreed. (See Leprecon and the WeeMaid [Journal 1].)

It's hard to look at it, and even harder to say its name three times fast!
The creature is even uglier up close than I had expected.

As I was sketching, my assistant became increasingly agitated. He covered behind a tree and pleaded for me to move along. Just as I was telling him not to worry, the Hyperdrive, which I had thought was inactive, emitted an ear-piercing alarm from F's backpack! (Perhaps the altitude-based change in air pressure had kick-started it.) The Gremloblin awoke with a start, grabbed my assistant with his enormous claws, and stared intensely into F's eyes!

CLAWS EMIT NEUROTOXINS!

WING STRUCTURE (phase II)

I was impressed to get such an amazing view of the elusive creature, but now was not the time for sketching! Hoping to startle the beast, I hurled my canteen at him, splashing him with water. A word of advice to future readers: when fighting a Gremloblin, use water...

Thank you for your attention .
