Internet and communication

Most pages on the Web are in English. That's over a billion (1,000,000,000) pages of information! The media that make up the Internet are American in origin, so it is no wonder that the mother tongue of the Web is English. Four factors determine the degree to which a given language finds use on the Internet:

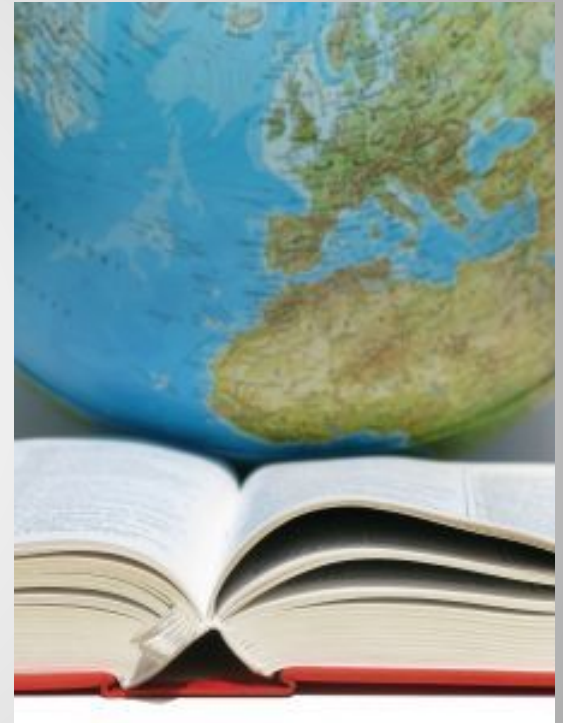

- The number of users of the language
- The extent of its use as an official language
- The economic power of the language
- The volume of information disseminated in that language

English in Culture

English lets you feel the culture of the world like no other language. With a good knowledge of the English language, you can do wonderful things:

- Watch American and British films in the original.
- Read great books. Every famous book was written in English or it was translated into English.
- Enjoy English-language music more. Music is much better if you can understand the words.
- Almost all international events are conducted in English. Knowing English will give you an opportunity to communicate with people from all over the world. You will be able to join interesting Internet discussions forum, share your ideas and learn new things.

Conclusion

- The materials of the project gave us the opportunity to conduct the research of character and degree of influence of English language on people's life in the modern world.
- We've defined the main stages in historical development of English language. The scale of spreading of English language in the world is constantly increasing.
- We've analyzed the information about the past and future of English language and proved that it is the main means of modern international communication.
- English also plays an important role in teenagers' world. It is a dominant language in youth style and is one way which teenagers across the world can communicate with each other.
- **All in all, English plays a central role in the world "globalization" and it affects all the spheres of human activity.**
