New technology is not good or evil in and of itself. It's all about how people choose to use it.

David Wong

BrainyQuote

“ One machine can do the work of fifty ordinary men. No machine can do the work of one extraordinary man. ”

- Elbert Hubbard

"I do not fear computers. I fear lack of them."

— Isaac Asimov

"Imagination is more important than knowledge. For knowledge is limited, whereas imagination embraces the entire world, stimulating progress, giving birth to evolution."

— Albert Einstein

"Everything is designed. Few things are designed well."

— Brian Reed

How do you think what are these devices for?

A dating app in China is popular with young women. They spend \$30 million a month on it. It is a little different because the men on the app aren't real men. They are virtual boyfriends. Users buy "Purple Diamonds" from the app. They spend these in the app to go on dates and keep their relationships going. The app is called Love and Producer. It now makes the most money on Apple's China App Store.

The app has two million daily active users. Most users are women in their early 20s. They love the romance and fun. A 19-year-old student explained why she liked the app: "It's like a romantic novel with...voices. It's more real than reading a novel." Another young woman said: "I don't have a boyfriend, so I'm happy to have a relationship with a "paper partner". She liked getting messages from her virtual boyfriends.

DEBATE - TECHNOLOGY

1
Online communication is better than face-to-face.

I agree/I disagree

2
Technology helps education.

In my opinion

3
Cell phone radiation is dangerous.

I definitely think that

4
Technology destroys nature.

I strongly believe that

5
Typing is more important than handwriting.

I am convinced that

6
Video games should be banned.

Personally, I believe/suppose

7
Technology makes us lazy.

On the one hand/on the other hand

8
People are too obsessed with gadgets.

I agree/I disagree

9
All schools must have free WI FI for students.

In my opinion

10
Robots are better than humans.

I definitely think that

11
Kids under 10 mustn't use smart phones.

Personally, I believe/suppose

12
Our gadgets spy on us.

I am convinced that

Have you ever noticed the popularity of white robots? The reason for these shades of technological white may be racism, according to new research.

Robot racism? Yes, says a study showing humans' biases extend to robots

1997: "Don't sit too close to the tv it will damage your eyes"

2017:

Technology Helps Archaeologists

Archaeologists study old things. Archaeologists help us understand history. They dig in the ground. They discover old things and towns. However, the work is not easy. Modern buildings make it sometimes impossible to dig in the ground.

Now, new technology exists. It is a special radar. The radar scans the ground. It sends pictures to a computer. Archaeologists can see what is under the ground. This technology is great. Scientists can discover more places.

Scientists study an old town of Falerii Novi. The town is near Rome in Italy. The first people live in Falerii Novi in 241 BC. The radar searches the town. Scientists discover baths, a market, and also a system of water pipes.

Do you get excited by new technology? What kinds of technology interest you?

Which electronics brands do you trust most? Are you loyal to one brand?

Is there an electronic product you want these days? What is it? How will it make your life better?

Do you play computer games? What do you say to people who believe they are a waste of time?

What crazy future technology are you looking forward to? For example, *flying cars* or *personal robots*.

Which social networking services do you use? What do you like or dislike about them?

Some people prefer to live with less technology in their lives. Can you understand the desire to live *a simpler life*?

Many science fiction movies present a dark vision of the future. Are you optimistic or pessimistic about the future of humanity?

What do you think robots should be used for?

Do you think modern technology reduces or increases stress? Why?

Have you heard about such devices?
