Mendeley Desktop

The screenshot displays the Mendeley Desktop application window. The interface is divided into several sections:

- Left Sidebar:** Contains navigation options like 'Literature Search', 'Mendeley Suggest', and 'MY LIBRARY'. Under 'MY LIBRARY', there are folders for 'All Documents', 'Recently Added', 'Recently Read', 'Favorites', 'Needs Review', 'My Publications', 'Unsorted', 'Economics', 'Example', 'History', 'New Horizons', 'Nihilism', 'Philosophy', 'Politics', and 'Testing for Advisor'. A 'Filter by My Tags' section lists various tags such as 'All', 'Altmetrics', 'demo', 'fluid', 'fluid dynamics', 'logrank', 'Mendeley', 'NASA', 'no idea', 'Philosophy', 'Philosophy of History', 'project x', 'Rosetta', 'senses', 'Space', 'speech', 'tagging', 'tags', and 'technology'.
- Main Document List:** A table titled 'All Documents' with columns for 'Authors', 'Title', 'Year', 'Published In', and 'Added'. The selected document is 'New Horizons: From Research Paper to Pluto' by Paul Tavner, published in 2015.
- Right Panel:** Provides details for the selected document, including its type (Report), authors (P. Tavner), year (2015), and an abstract. The abstract text reads: 'NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.' It also includes sections for 'Tags', 'Author Keywords', 'City', 'Institution' (Mendeley), 'URL' (http://www.mendeley.com/new-horizons.pdf), 'Catalog IDs' (DOI), and 'Files'.

New Horizons: From Research Paper to Pluto

Tavner P
2015

NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.

How To Choose a Good Scientific Problem
Uri Alon in *Molecular Cell* (2009)
Choosing good problems is essential for being a good scientist. But what is a good problem, and how do you choose one? The subject is not usually discussed explicitly within our profession. Scientists are expected to be smart enough to figure it out...

Journal: *Genome Research*
Year: 2010
Volume: 20
Issue: 4
Pages: 413-427

Abstract:
 Global studies of transcript structure and abundance in cancer cells enable the systematic discovery of aberrations that contribute to carcinogenesis, including gene fusions, alternative splice isoforms, and somatic mutations. We developed a systematic approach to characterize the spectrum of cancer-associated mRNA alterations through integration of transcriptomic and structural genomic data, and we applied this approach to generate new insights into melanoma biology. Using paired-end massively parallel sequencing of cDNA (RNA-seq) together with analyses of high-resolution chromosomal copy number data, we identified 11 novel melanoma gen...

New Horizons: From Res...

New Horizons

The New Horizons mission received approval in November 2001¹. Its objective was to send a spacecraft to Pluto - the only unexplored planet (still recognized as a planet at that time) in the solar system. Previous missions intended to reach Pluto - including *Pluto Fast Flyby* and *Pluto Kuiper Express* - had been cancelled, but after a thorough new profile selection process, NASA committed to launching *New Horizons* as part of its New Frontiers program.

Due to the distances involved - New Horizons would have to cover nearly three billion miles to reach its objective - the craft was designed to have as little mass as possible, but would be launched using the huge Atlas V expendable launch system. This guaranteed the greatest possible velocity for the craft.

When the mission launched on 19 January 2006, the probe left Earth on a solar system escape trajectory travelling at nearly 37,000 mph. It crossed the Moon's orbit just eight hours and thirty-five minutes after lift-off, and reached that of Mars only 78 days later. The probe gained a gravity boost from the gas giant Jupiter to accelerate past 51,000 mph, but would still have over eight years to travel to its objective. New Horizons is expected to make its closest approach of Pluto and its moons on July 14, 2015²

Mendeley Biological Sciences

Discipline summary
 Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according to the ...

Create your research profile

The screenshot displays a Mendeley research profile for David Neal, Professor and SVP Global Research (Academic) at Elsevier. The profile includes a profile picture, location (Cambridge, United Kingdom), discipline (Medicine), and interests (Urology, Surgical Oncology, Prostate Cancer, Androgen Receptor Signalling and Prostate Cancer Genomics). Key statistics are shown: 471 Publications and 5145 Readers. The 'About' section describes his role as a urological surgeon and translational researcher at the University of Cambridge. A recent publication is listed: 'New androgen receptor genomic targets show an interaction with the ETS1 transcription factor' in EMBO Rep (2007), with 42 Readers. The profile also shows a list of followers and a 'Following' section.

Literature Search

Search the catalogue

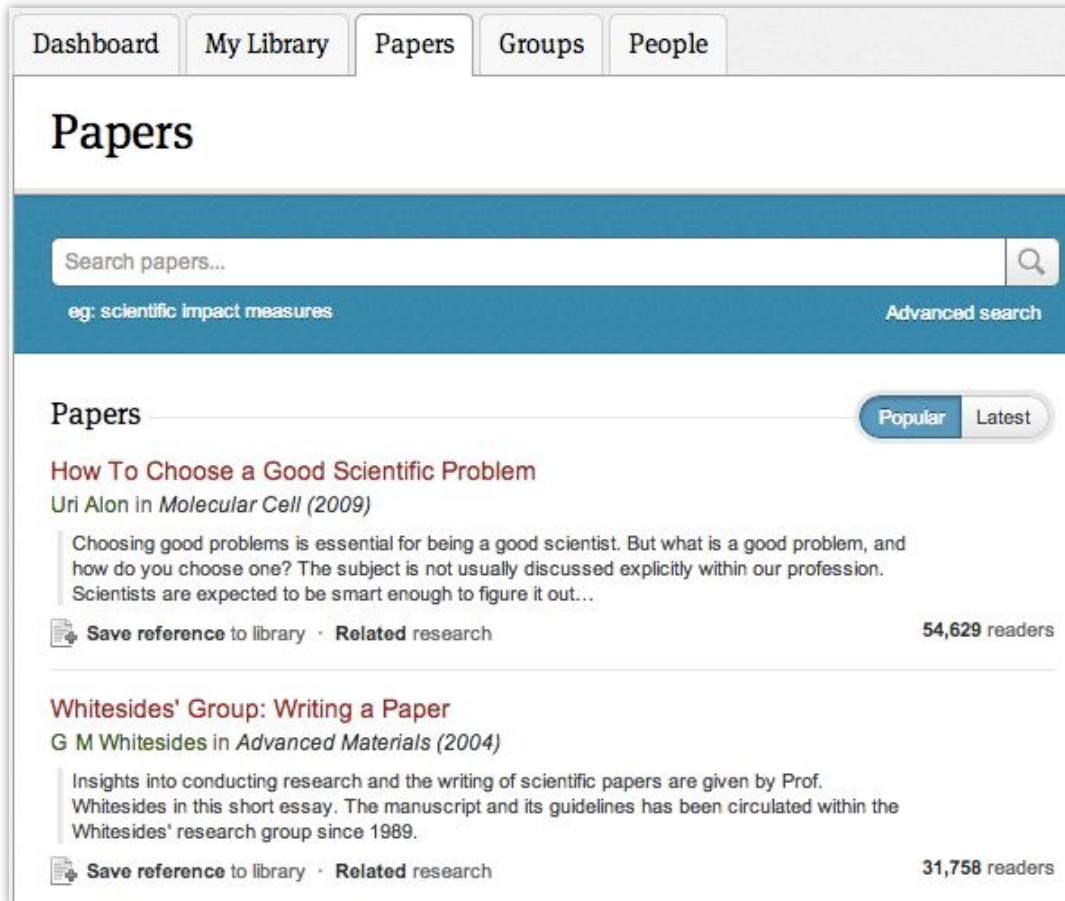

The screenshot shows the Mendeley Literature Search interface. On the left is a sidebar with navigation options like 'Literature Search', 'Mendeley Suggest', and 'MY LIBRARY'. The main area displays search results for 'cancer treatment'. One result is highlighted: 'Autophagy in pancreatic cancer pathogenesis and treatment' by Rui Kang, D Tang (2012). To the right, a details panel shows the document is not in the library and offers a 'Save PDF' button. A red arrow points from the text 'Save new research to your library with one click' to this button. Another red arrow points from the text 'If the full text is available, you'll see a download icon:' to the download icon next to the article title in the search results list.

If the full text is available, you'll see a download icon:

Save new research to your library with one click

Search the Catalog Online

The screenshot shows the Mendeley Papers search interface. At the top, there are navigation tabs for Dashboard, My Library, Papers, Groups, and People. The 'Papers' tab is selected. Below the navigation is a search bar with the placeholder text 'Search papers...' and a search icon. Below the search bar is a blue bar with the text 'eg: scientific impact measures' and a link to 'Advanced search'. Below the blue bar is a section titled 'Papers' with two tabs: 'Popular' (selected) and 'Latest'. The first paper listed is 'How To Choose a Good Scientific Problem' by Uri Alon in *Molecular Cell* (2009). The abstract reads: 'Choosing good problems is essential for being a good scientist. But what is a good problem, and how do you choose one? The subject is not usually discussed explicitly within our profession. Scientists are expected to be smart enough to figure it out...'. Below the abstract are links for 'Save reference to library' and 'Related research', and the number of readers is 54,629. The second paper listed is 'Whitesides' Group: Writing a Paper' by G M Whitesides in *Advanced Materials* (2004). The abstract reads: 'Insights into conducting research and the writing of scientific papers are given by Prof. Whitesides in this short essay. The manuscript and its guidelines has been circulated within the Whitesides' research group since 1989.'. Below the abstract are links for 'Save reference to library' and 'Related research', and the number of readers is 31,758.
