My future profession

Dmitry Lebedev,
group 015

My future profession is a computer programmer.

I get this profession in Polytechnic Department of our college. The studing here gives me the opportunity to get new skills, knowledge and at last a diploma.

Who is a programmer ?

Programmer is a specialist who deals with the design, development and maintenance of computer programs.

Programmers may be

a computer system architect

a computer analyst

A computer system architect

A computer system architect creates programs for users.

They work with games, multimedia and Web-pages.

A computer analyst

A computer analyst is called the person, whose programs are designed to provide the computer and used by other computer professionals.

Programming languages

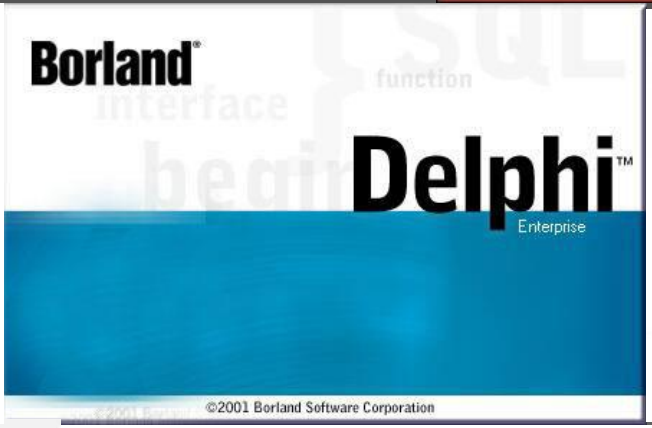
For programmers there are many programming languages.

The most common programming languages are **C++**, **Delphi**, **Pascal**, **Visual Basic**, **HTML**, **PHP**, **Oracle**.

php

ORACLE®

Microsoft
Visual Basic 2010



Borland
Delphi
Enterprise
©2001 Borland Software Corporation

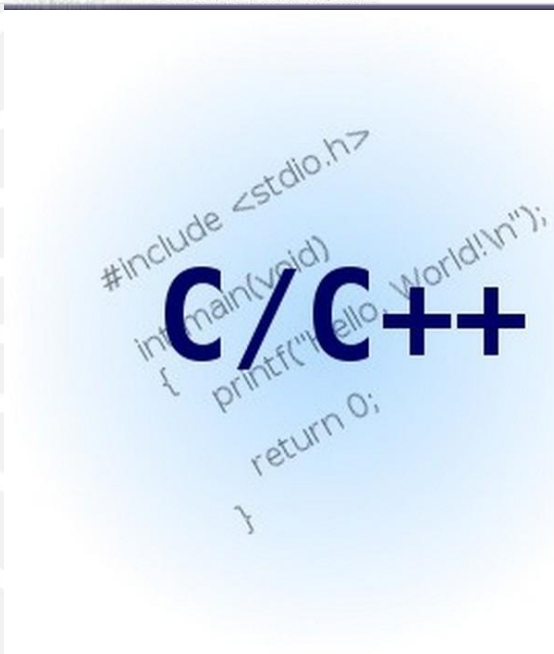
Макроязык и макропроцессор

HTML
5



#include <stdio.h>
int main(void)
{
printf("Hello, World!\n");
return 0;
}
C/C++

A
B
C
Pascal

Advantages of my profession

Advantages of my profession are

- ✔ good wages and working conditions demand;
- ✔ programmers have the ability to work at home.

Disadvantages of my profession

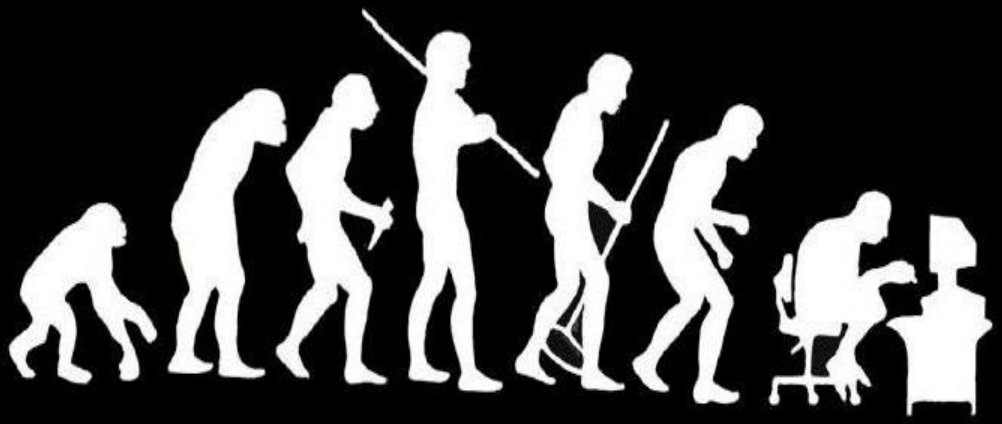
Disadvantages of profession are

- ✔ the loss of vision,
- ✔ the job requires a lot of time,
- ✔ a large mental load.

Successful	Unsuccessful

As you can see, the knowledge of foreign languages is necessary for our great success in the future.

Thank you!



Something, somewhere went terribly wrong
