

My future
profession is
a chemistry
teacher

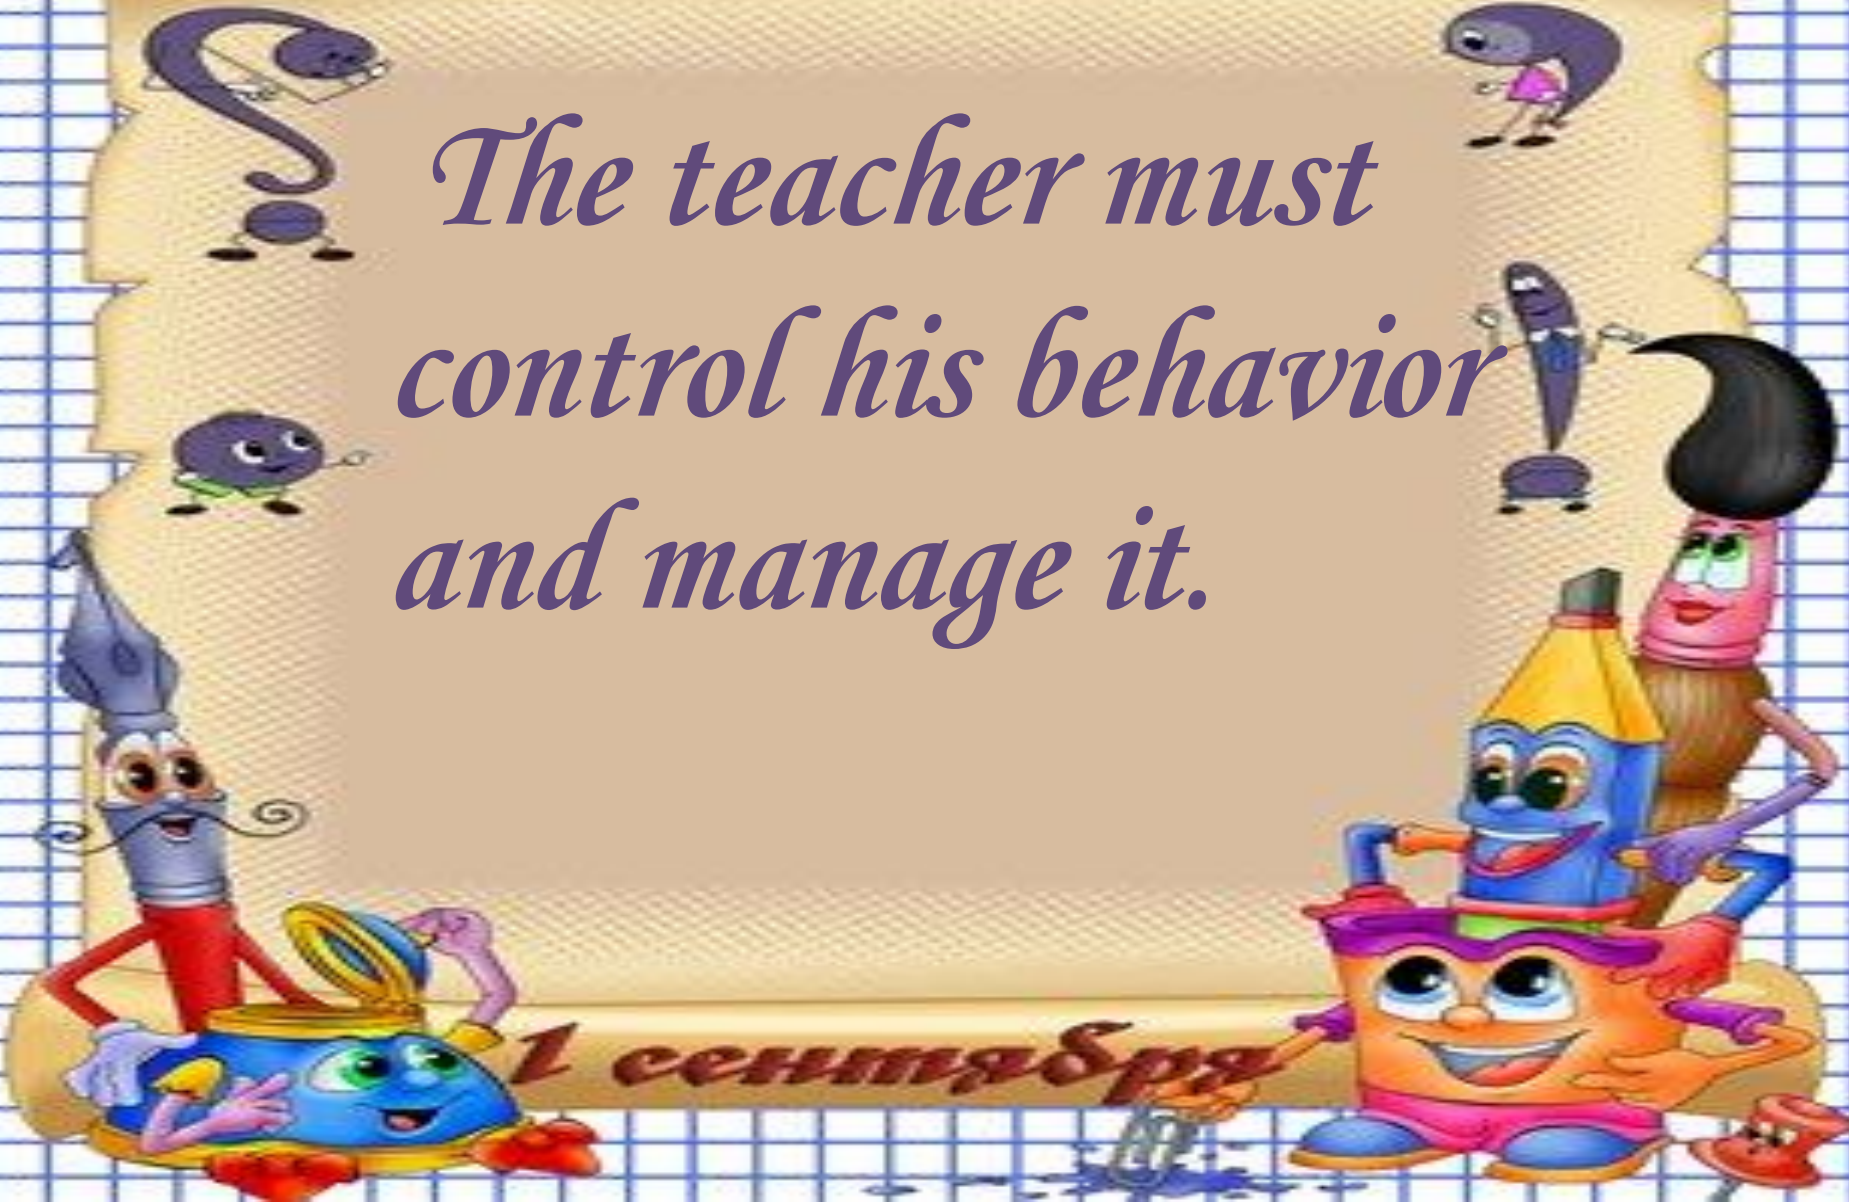

The background is a light blue grid pattern. Various school supplies are scattered around: a silver pen at the top, a wooden ruler at the top right, a paper clip on the left, two balloons (yellow and red) on the left, a spiral notebook in the center, a cup of pencils and pens at the bottom left, a pencil sharpener and eraser at the bottom, and a stack of books at the bottom right. Green musical notes and yellow lines are floating across the scene.

*The teacher should be
able to express his
thoughts
competently, clearly,
understood for
students*

День знаний

*The teacher must
control his behavior
and manage it.*

The teacher is an eternal student. He must work resolutely on himself

This profession is eternal. No matter how the society changes, no matter how far it goes in its development, it will never be without a teacher. In the future, some professions will disappear, but teachers will always be.

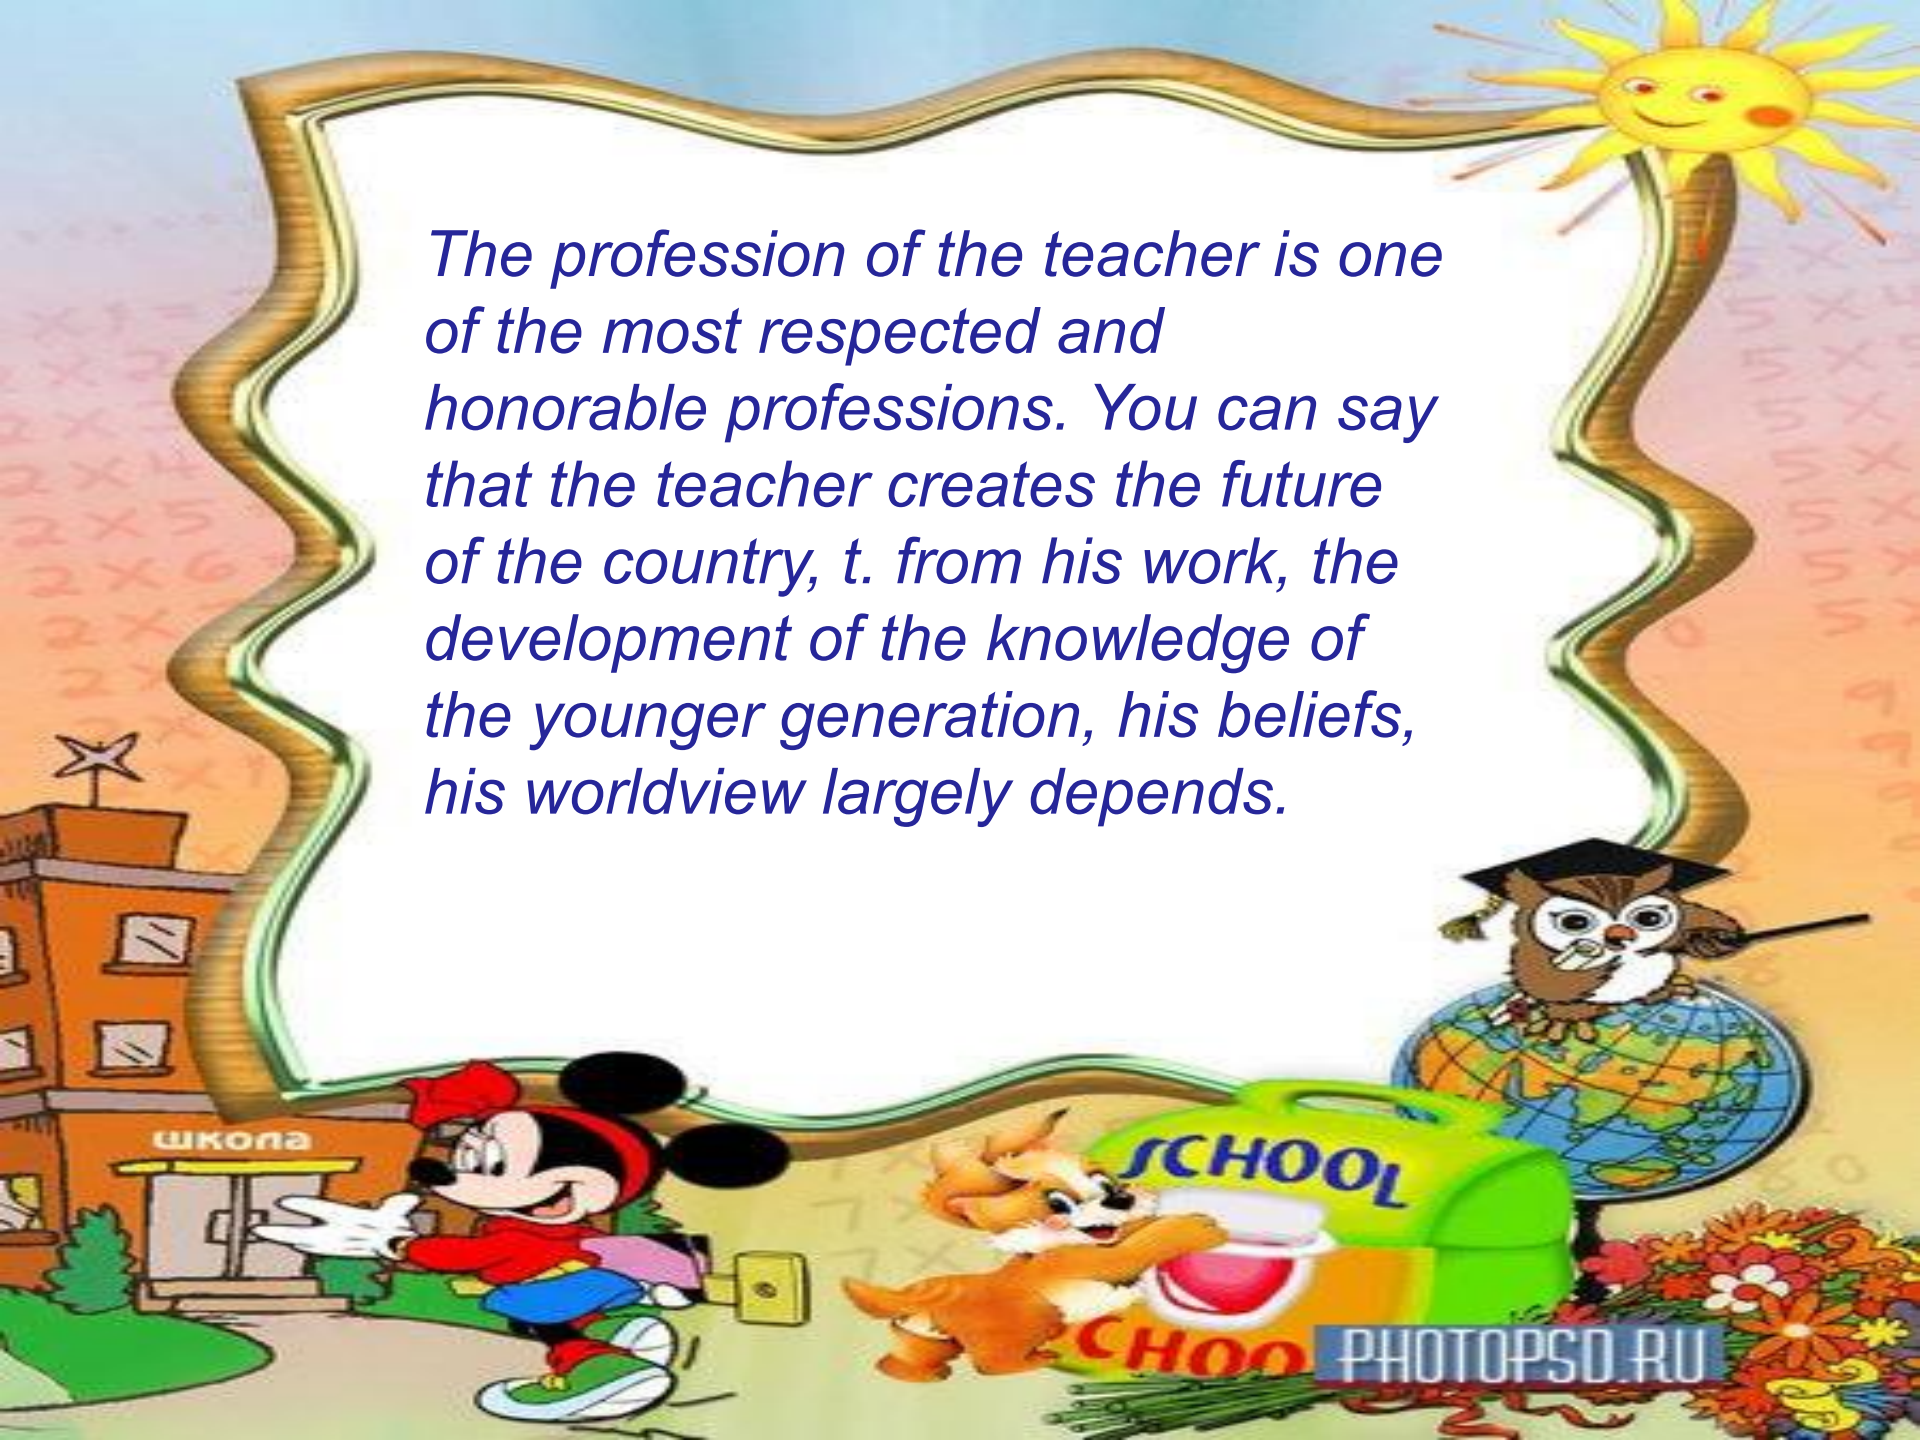

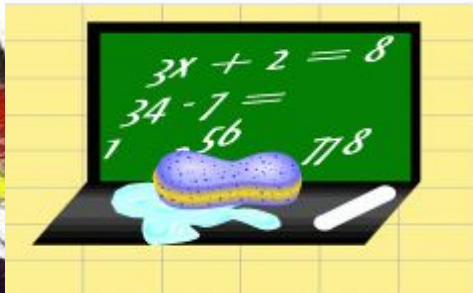

«
***The teacher
should be
able
To interest
children in
their subject***

Здравствуй,
школа!

The profession of the teacher is one of the most respected and honorable professions. You can say that the teacher creates the future of the country, t. from his work, the development of the knowledge of the younger generation, his beliefs, his worldview largely depends.

Thank you for attention
