

The background is a light blue gradient with several realistic water droplets of various sizes scattered across the surface. The droplets have highlights and shadows, giving them a three-dimensional appearance. The text is centered in the middle of the image.

Why have I chosen
pharmacy as my future
speciality.

I have chosen pharmacy
as my future speciality
because

I love

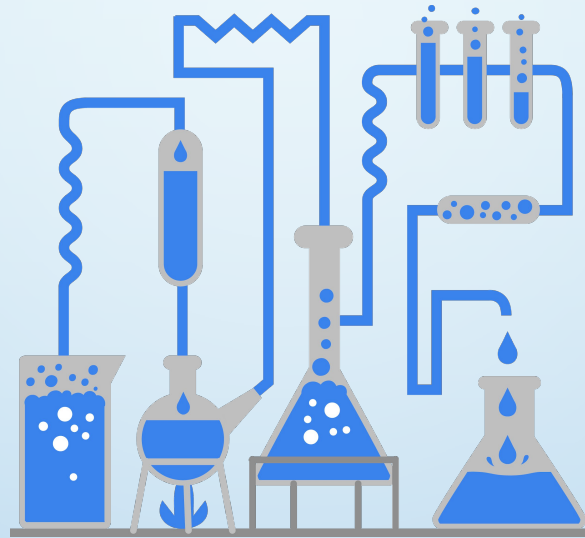

chemistry, substances
and to help people.

A pharmacist together with a doctor
devotes his life protecting people's health.

If you don't understand such subjects as:

● pharmacology,

● pharmacognosy

● and technology
prepare drugs

you won't be a specialist in the sphere of
pharmaceutical factories.

A pharmacist or a provisor is specialist with higher pharmaceutical education.

And so I can be

a manager,

or an assistant
manager,

a dispensing
pharmacist

and also work at
clinical chemical
laboratory.

I can always get
work with good

salary.

A provisor
must remember
that he works
with people.

There is no a specialist without love for his profession and respect for people.

+

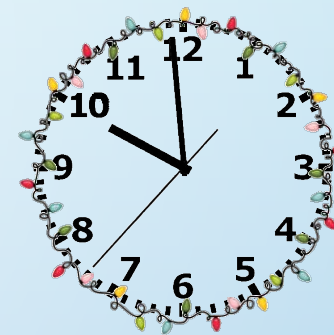

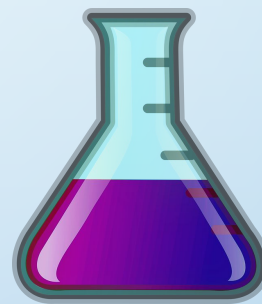

=

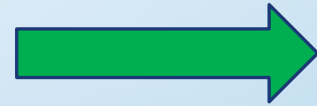

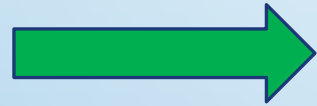

His aim is to help an ill people to create and use the prescribed medicines.

This is a very interesting and indispensable profession because I can use my knowledge of pharmacy that make my new medicines which don't can make a regular person.

A medicine like as a magic

transform ill people into healthy

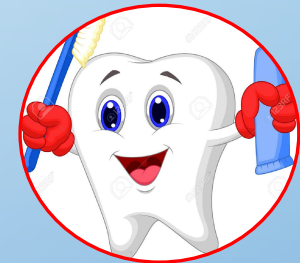

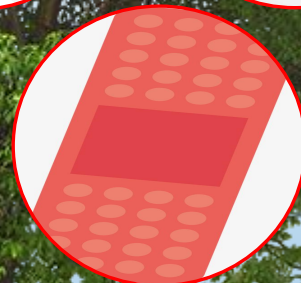

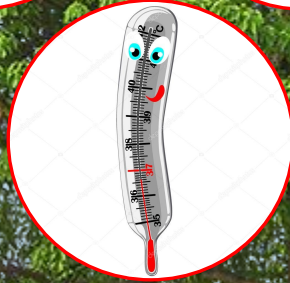

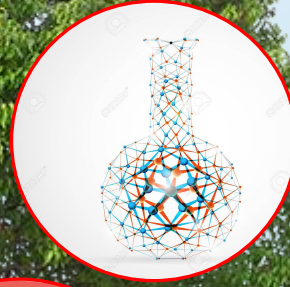

It's a complicated science and so I don't have freedom of mistake because it may change a person's life.

Rp.: Susp. Hydrocortisoni acetatis 0,5% -10 ml
D.S.: По 3 капли в глаз 3 раза в день. Перед употреблением взбалтывать.

If to study well
at university,

I will be able
to become
a part of grand
medicine.

And now I'm on the way.

Thank you for attention!
