Object of investigation

Global network Internet as a way of organizing of virtual communication

Practical meaning

The knowledge obtained in the course of writing and research results can be used when working at school English teacher, also it will be useful in preparing for lectures and workshops concerning the topics of communication on the Internet.

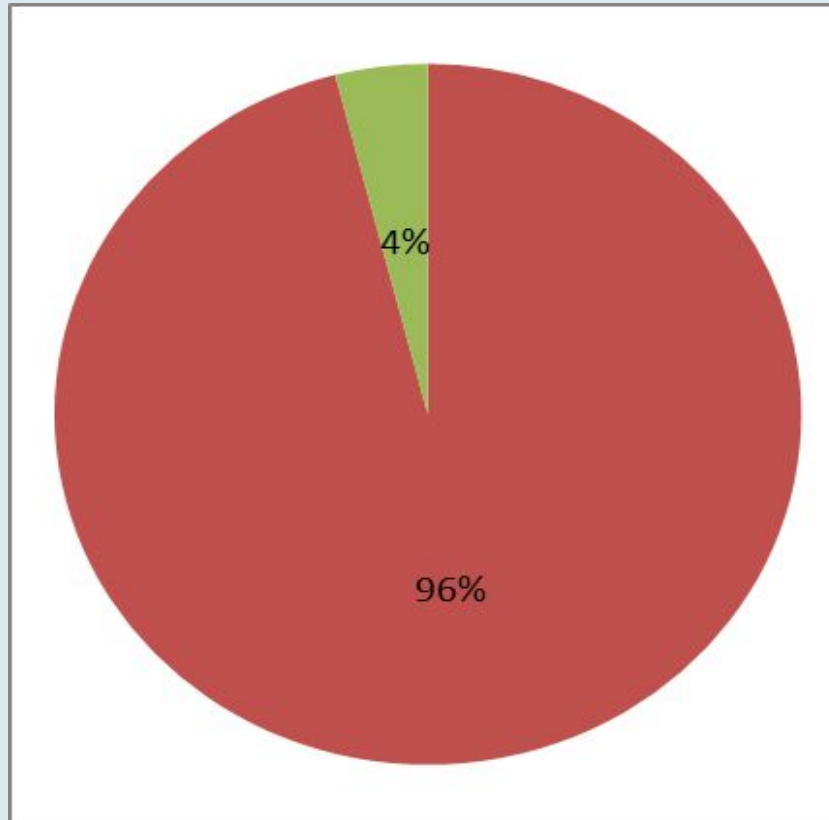

The Internet – the most powerful “changer” of modern society

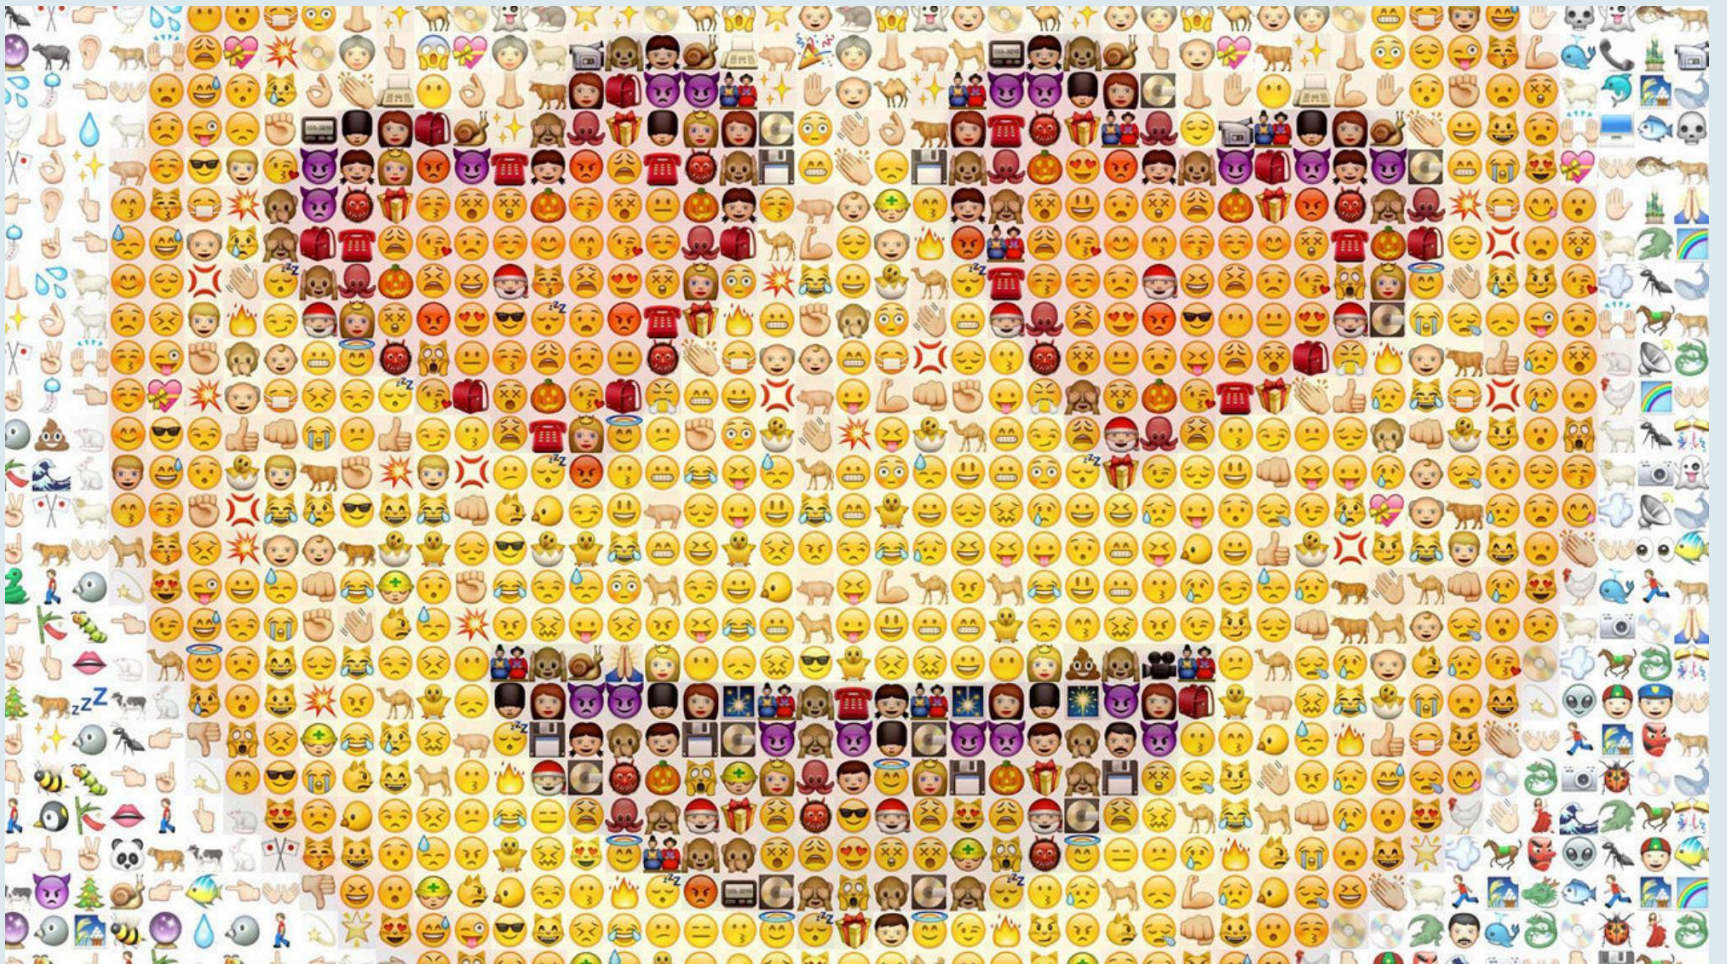

Question №1: “Do you know about the existence of such a way of expressing emotion in internet dialogue as smile or emoticon?”

Diagram №1

Hi. What's happening tonight?

These emoticons could be arranged in any order and still convey the same meaning

What did you do last weekend?

In certain circumstances, emoticons follow sequences that represent the order of events

Subject is placed before the verb of a sentence

Conclusions

Lack of a verbal component of the Internet communication led to the creation of smileys and emoticons, which helped users to deal with the problem of emotional depletion in the virtual world. This way humanity created kind of a new form of language that has its own features connected with user's age, nationality, profession and way of life.
