Pskov Technical Lyceum

- 1 PTL - Pskov Technical Lyceum. The main task of which is to give students physical and mathematical inclinations for entering universities by profile. Also develop student thinking. This is all done in a very interesting format .

- The lyceum is a regional experimental site on the topic "Intellectual unity of the subjects of the educational process as a condition for the development of their personal potentials." The institution was also a pilot school of the Russian-British project "Management of the quality of education based on the relationship of internal and external assessments of the results and conditions of the educational activity of the school", implemented by the Public Institute for the Development of the School with the support of the British Council

- As is clear from the name of the lyceum, bias is made on technical subjects (mathematics, physics, computer science). The Lyceum has a six-day work week. PTL provides a basic level of training in all subjects and an advanced level in subjects that are core. Since 2014, there are separate university classes with an in-depth study of information technology.

PTL education levels:

- basic general education (2 years) (209 people)
- secondary general education (2 years) (218 people)

PTL work programs:

Astronomy, biology, geography, foreign language, history, literature, mathematics, art, life safety, social studies, computer science, Russian, technology, physics, physical education, chemistry, economics, music,

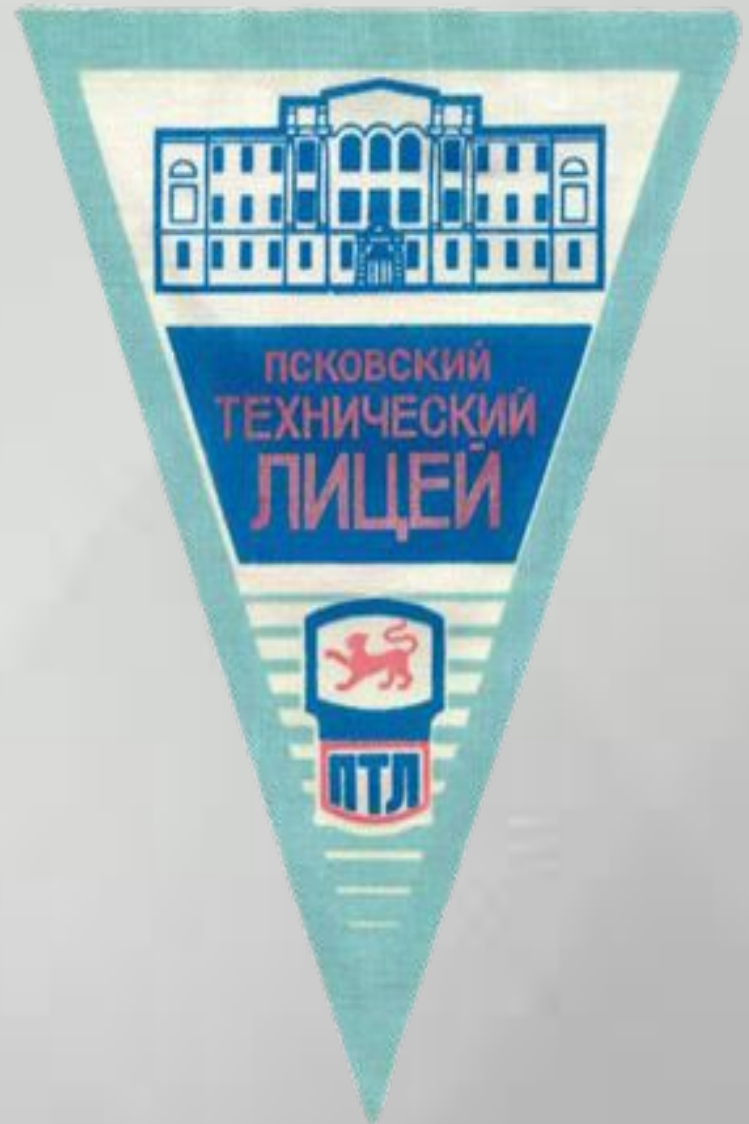

Символика лица:

Flag

Lyceum flag appeared in 2000. Stars on a blue background symbolize the number of lyceum issues. The flag of the Pskov Technical Lyceum is its pride. At the end of the lyceum, each issue leaves a memory of itself, attaching a new star to the flag. Now there are 29 such stars

There is also a pennant and a coat of arms

Features of the Lyceum:

The first and most important feature of the lyceum is the truly humane attitude of teachers to students.

Second - A large number of Olympiads.
(Mainly in specialized subjects)

Third- Young teachers who constantly improve their skills, and do not sit still.

Fourth - Couples to the place of lessons.

Fifth- The appearance of the building, looks individually compared to other schools. Also layout; the dining room in the basement is brilliant.

Sixth, very large funding

Teachers

In the Lyceum there are departments:

Mathematics and computer science. (9 people)

Natural Sciences (11 people)

Foreign languages (5 people)

Humanities (9 people)

Educational work (4 people)

Physical education (6 people)

Information incomplete due to new teachers.

results

This is a permanent victory at the Olympics. Also
high scores are not OGE and USE.

Most students go wherever they want

There are several ways to enter PTL The earliest way is through the Olympics. The second way is an entrance exam. There are 2 attempts on the second method.
