

TOWER BRIDGE

A nighttime photograph of the Tower Bridge in London, England. The bridge is illuminated with warm yellow lights, highlighting its two massive towers and the suspension cables. The bridge spans the River Thames, and its lights are reflected in the dark water below. The sky is a deep, dark blue, and the overall scene is a classic view of the bridge at night.

Historical facts:

In February 1876, the London government announced an open tender for a new bridge project.

The best project was recognized as the lifting-opening bridge of Sir Horace Jones, the chief architect of the city.

A huge amount of £ 585,000 was allocated for the creation of the grandiose building.

Construction started In 1886 and was completed in 8 years.

The grand opening of the new bridge took place on June 30, 1894, by Prince Edward of Wales and his wife Princess Alexandra.
