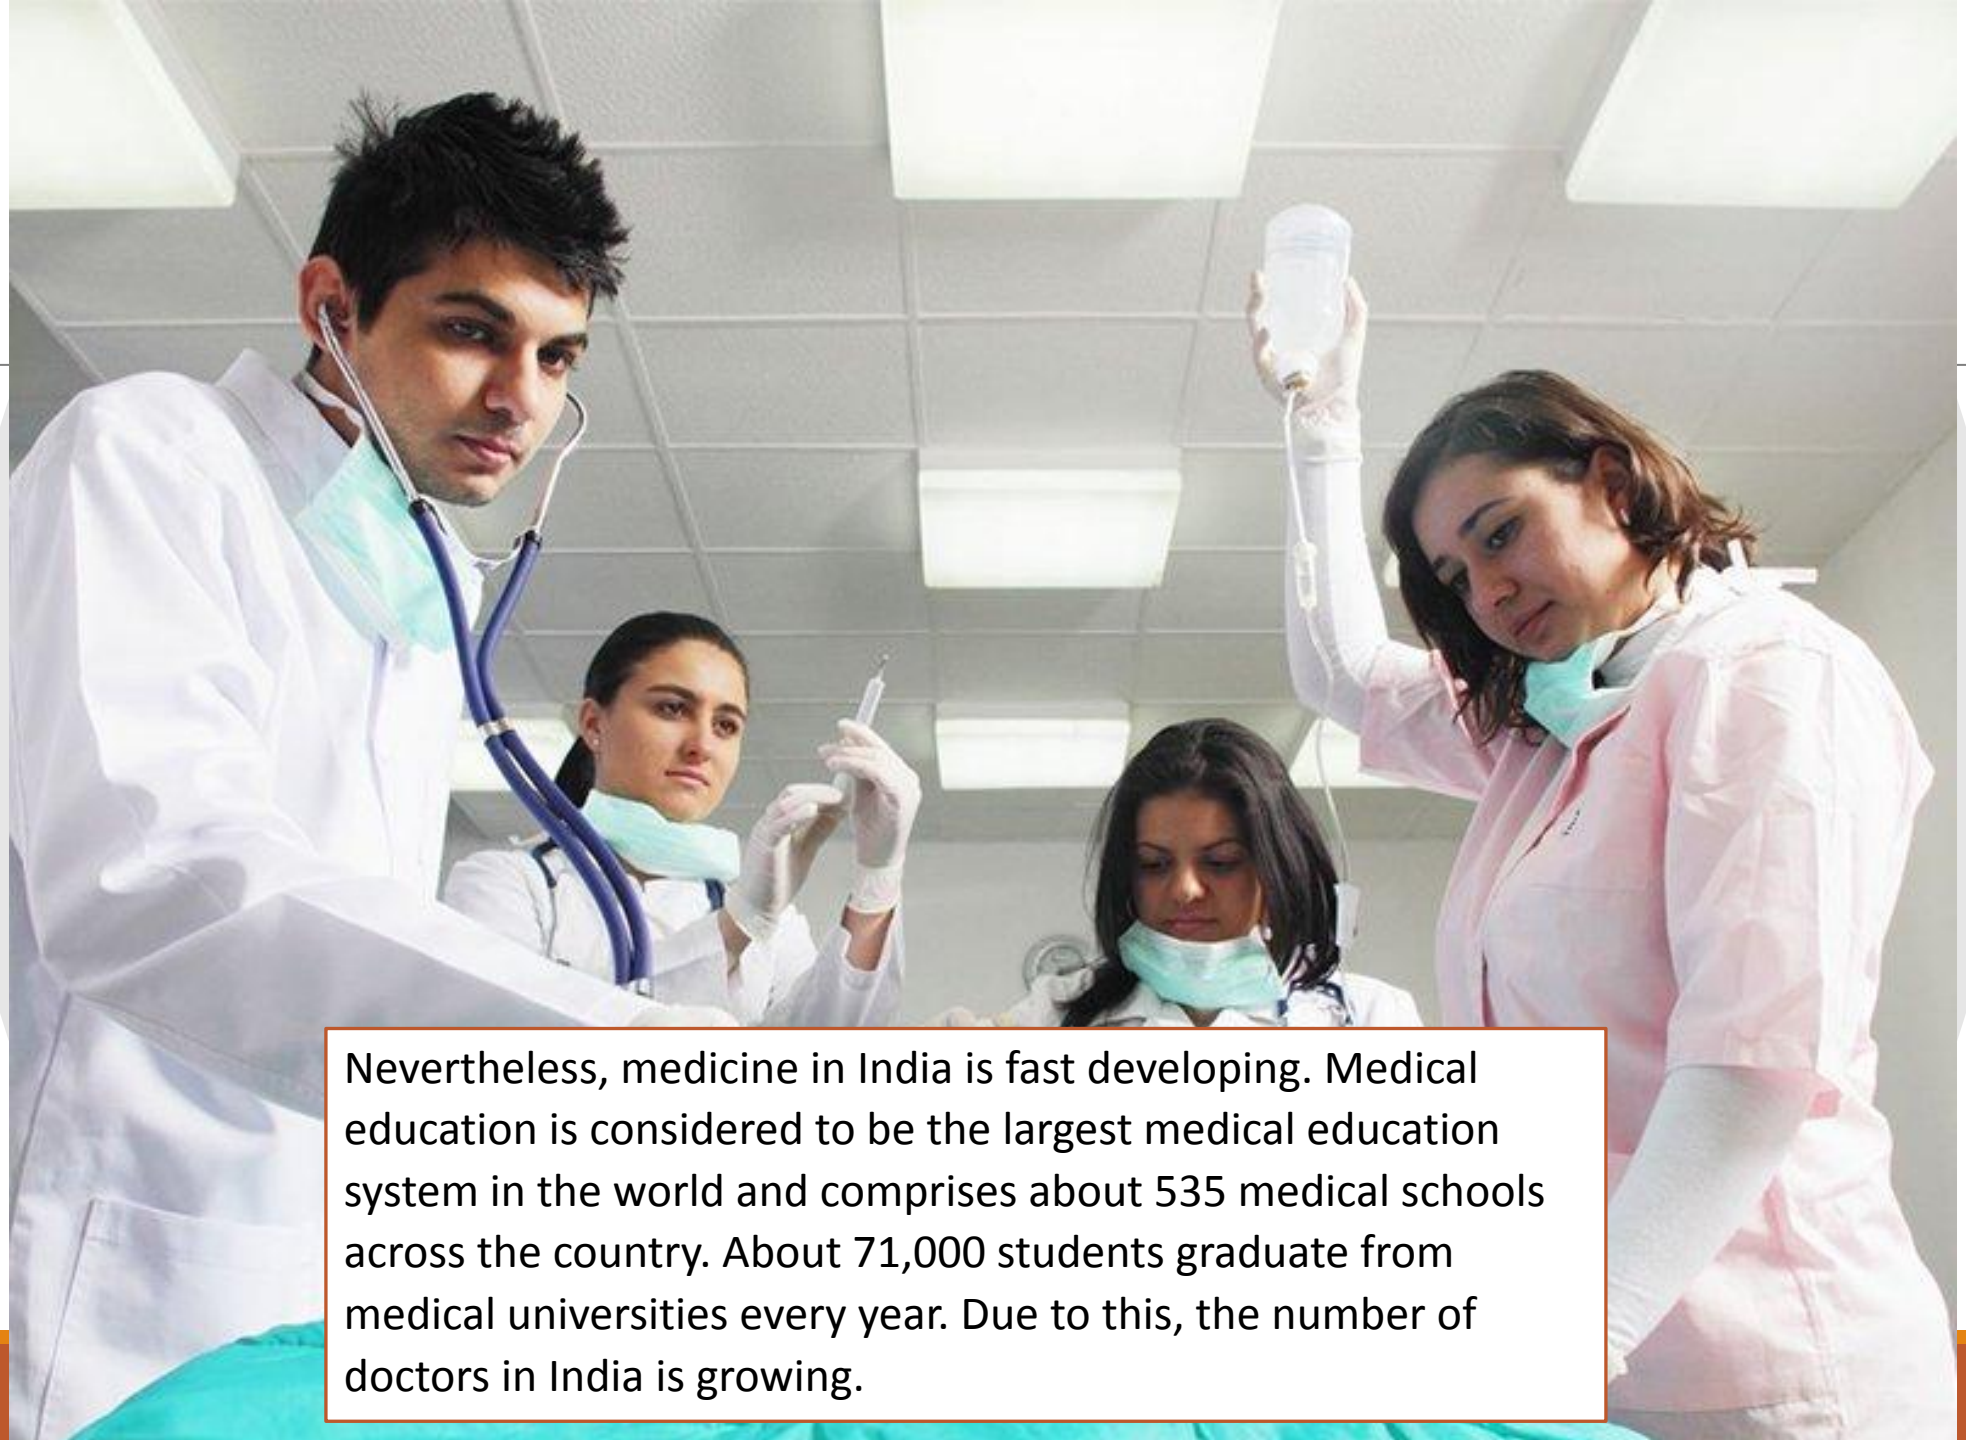
Medicine in India

Medical education in India is considered to be the largest medical education system in the world and comprises about 535 medical schools across the country.

About 71,000 students graduate from medical universities in India every year. Due to this, the number of doctors in India is growing.

So now the number of doctors to patients is over 1:1500.



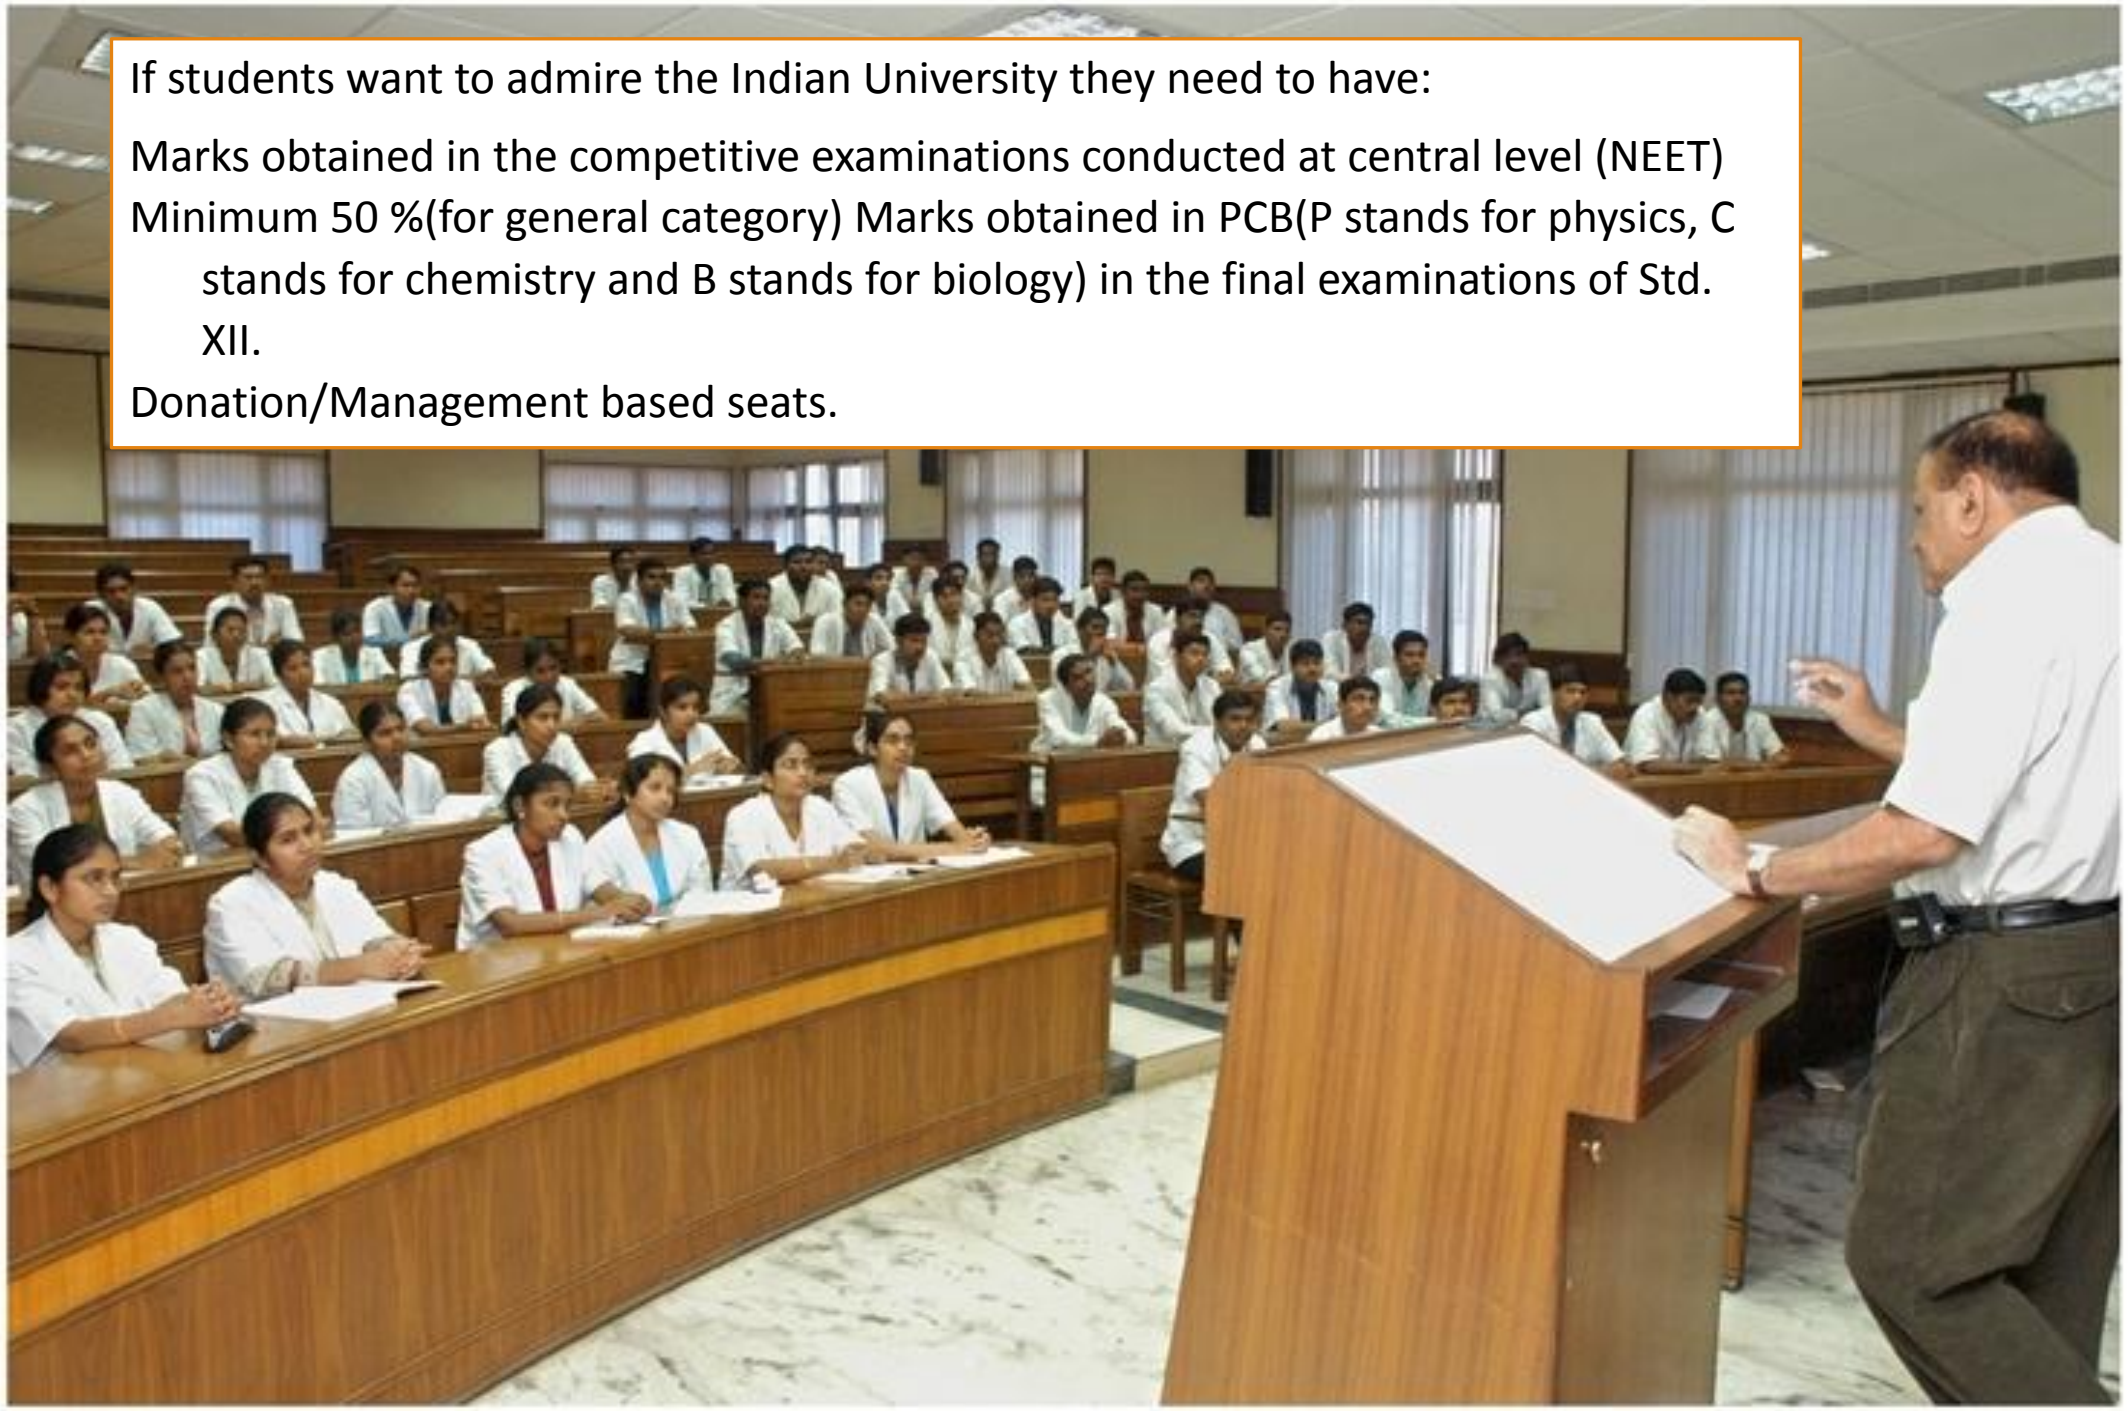
Nevertheless, medicine in India is fast developing. Medical education is considered to be the largest medical education system in the world and comprises about 535 medical schools across the country. About 71,000 students graduate from medical universities every year. Due to this, the number of doctors in India is growing.

If students want to admire the Indian University they need to have:

Marks obtained in the competitive examinations conducted at central level (NEET)

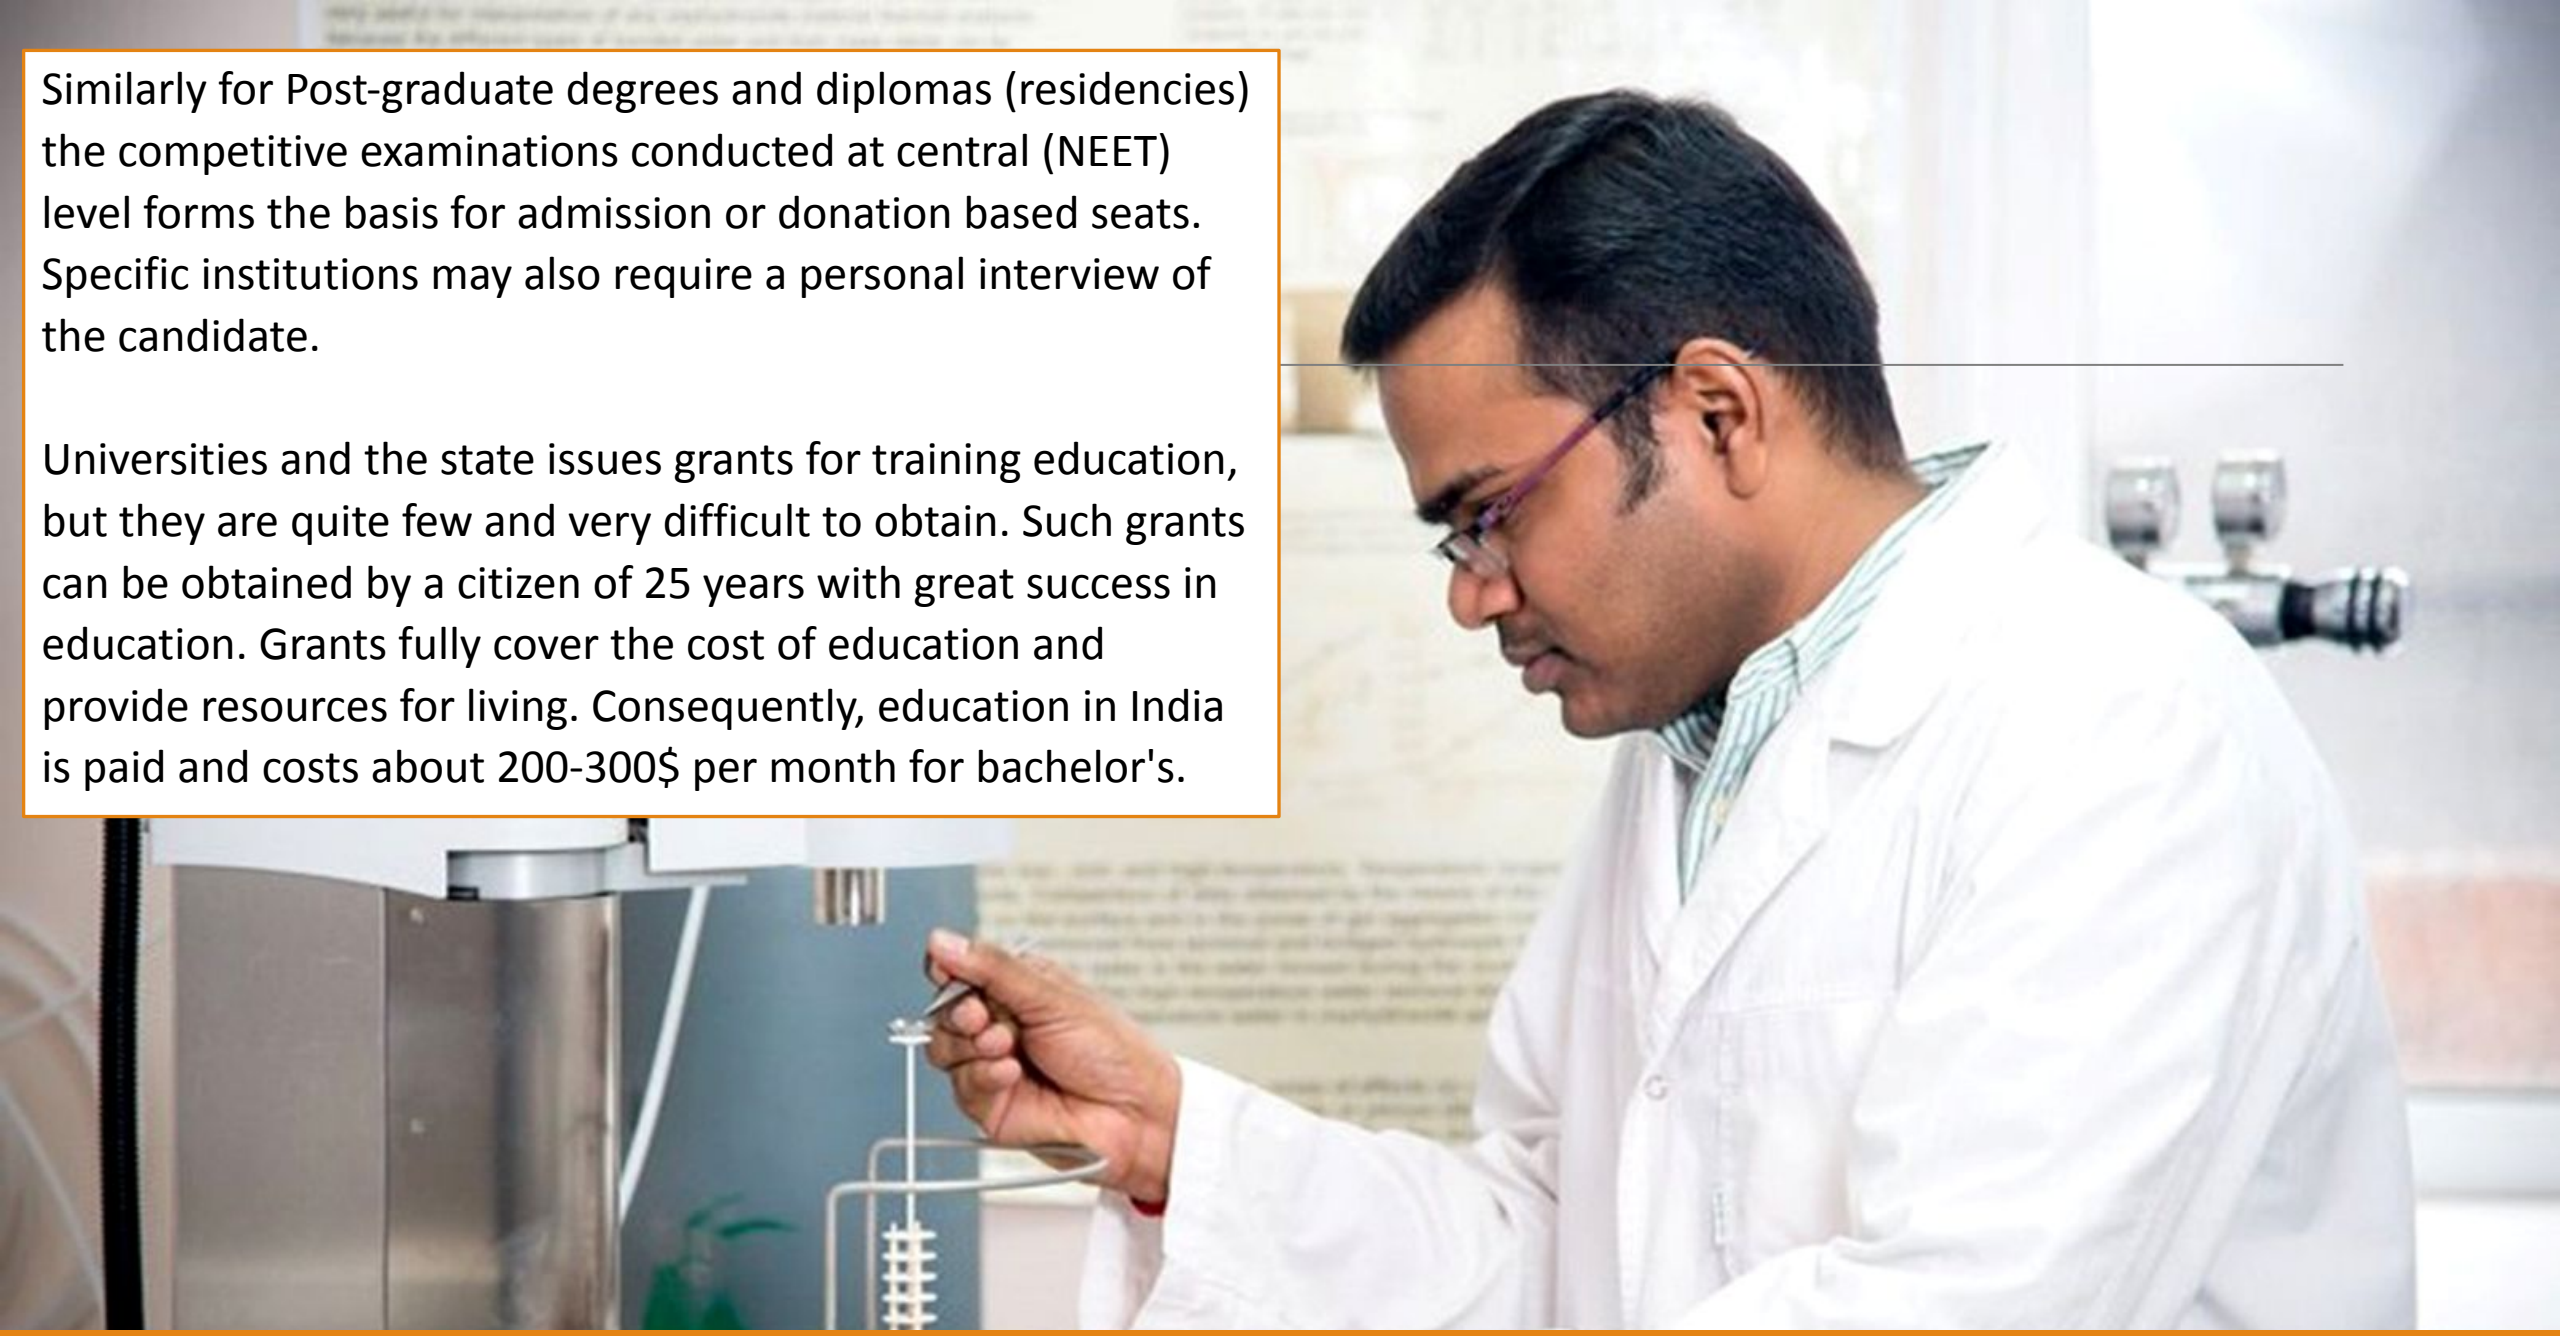
Minimum 50 %(for general category) Marks obtained in PCB(P stands for physics, C stands for chemistry and B stands for biology) in the final examinations of Std. XII.

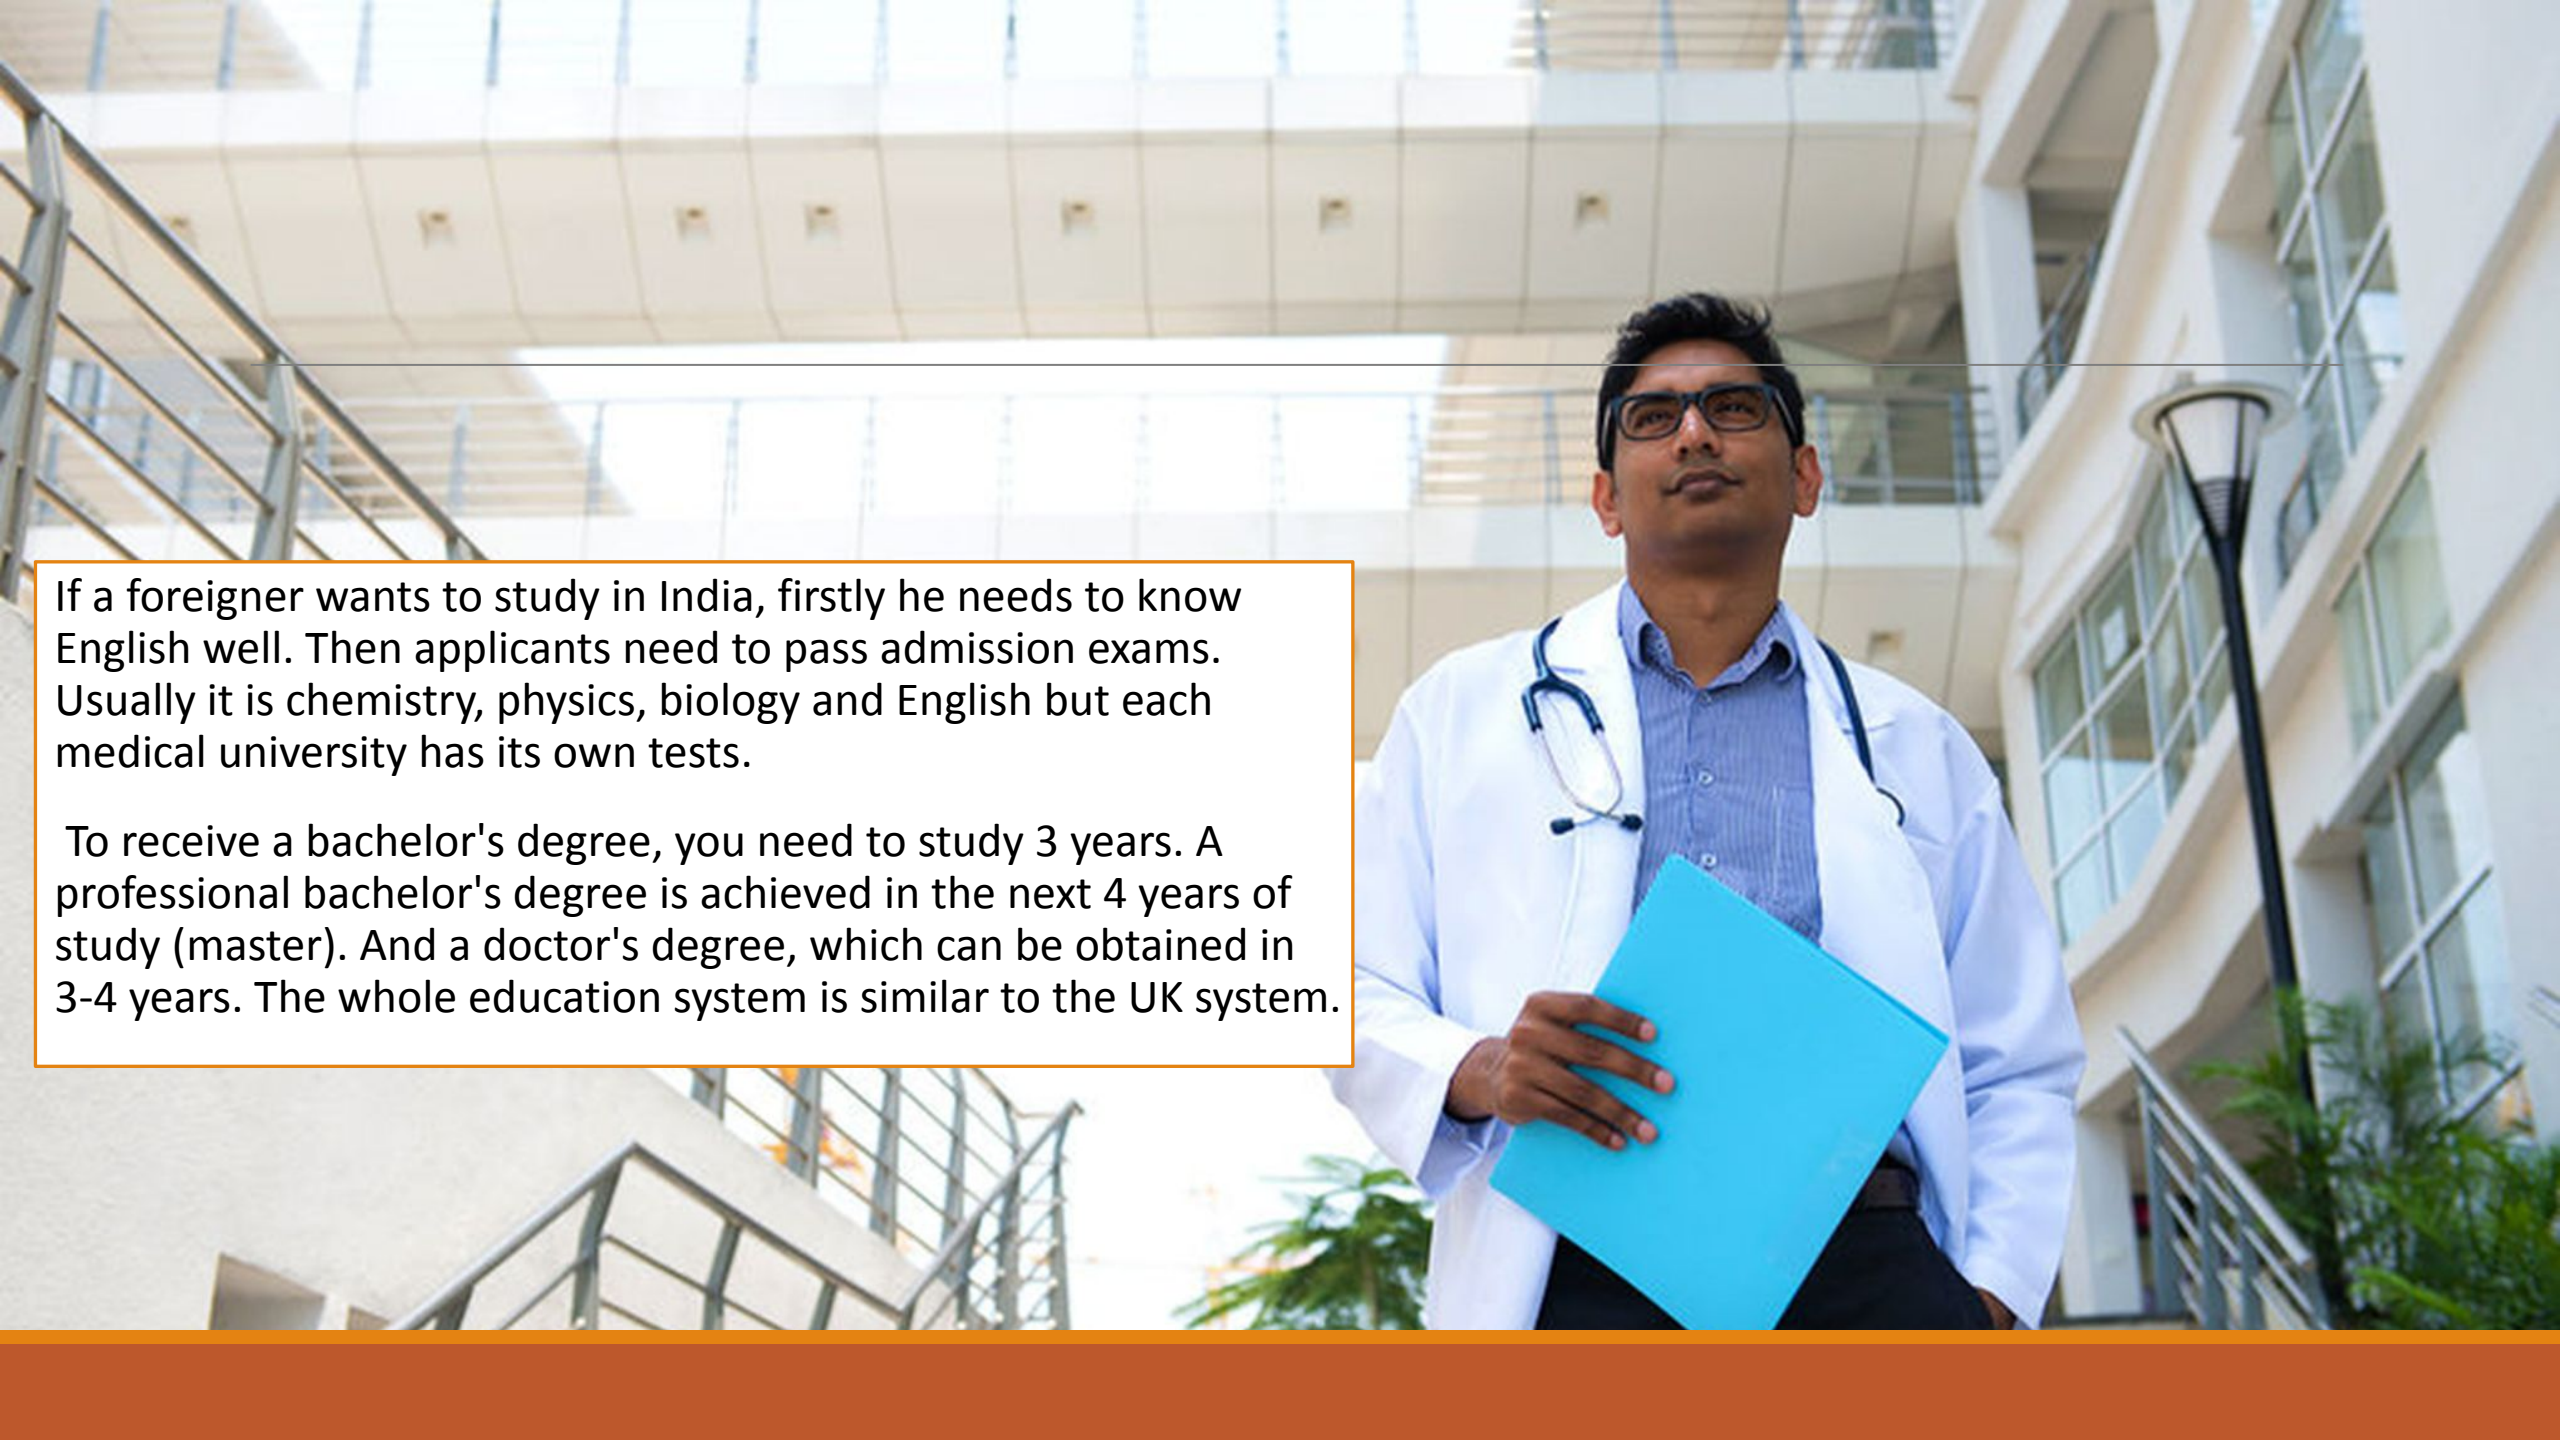
Donation/Management based seats.



Similarly for Post-graduate degrees and diplomas (residencies) the competitive examinations conducted at central (NEET) level forms the basis for admission or donation based seats. Specific institutions may also require a personal interview of the candidate.

Universities and the state issues grants for training education, but they are quite few and very difficult to obtain. Such grants can be obtained by a citizen of 25 years with great success in education. Grants fully cover the cost of education and provide resources for living. Consequently, education in India is paid and costs about 200-300$ per month for bachelor's.





If a foreigner wants to study in India, firstly he needs to know English well. Then applicants need to pass admission exams. Usually it is chemistry, physics, biology and English but each medical university has its own tests.

To receive a bachelor's degree, you need to study 3 years. A professional bachelor's degree is achieved in the next 4 years of study (master). And a doctor's degree, which can be obtained in 3-4 years. The whole education system is similar to the UK system.

Wagner Academy is associated with India. About a hundred Indian students enter the university every year. According to the rector of Perm State Medical University, Perm doctor's degrees are accepted in all countries whose students study in Perm. So, to confirm competencies in Germany, you will need to pass a four-hour test, in India – an one hour exam.
