Use a **title** with specific & relevant (only) **content**

- People CAN'T listen while reading your slide.
- Always stick to the most important message.
- Less is more... be concise.
- And don't kill your presentation with too many bullet point slides. Use visuals instead!

Using a **light background** is an option to be considered

- A light background might be easier to read
- Is a better option if you intend to print your document
- Suits diagrams or graphics insertion

Relevant content displayed with **2 columns** is also nice!

- Lorem ipsum dolor sit amet, duis eu. Metus tortor. Eu ut lorem, est sodales amet.
- Maecenas nam mattis, condimentum semper tristique. Morbi sed diam ullamcorper cubilia et.
- Lectus mi at, inceptos lacinia necessitatibus. Velit risus suspendisse.
- Tempor ut id, nam praesentium, ridiculus dui sodales. Justo ipsum magna, massa nec

The mind must be exercised just like any other muscle in the body

The storage capacity of the human brain is virtually limitless.

An adult can remember twenty to one hundred thousand words

Sleep aids storage and retrieval of long-term memories

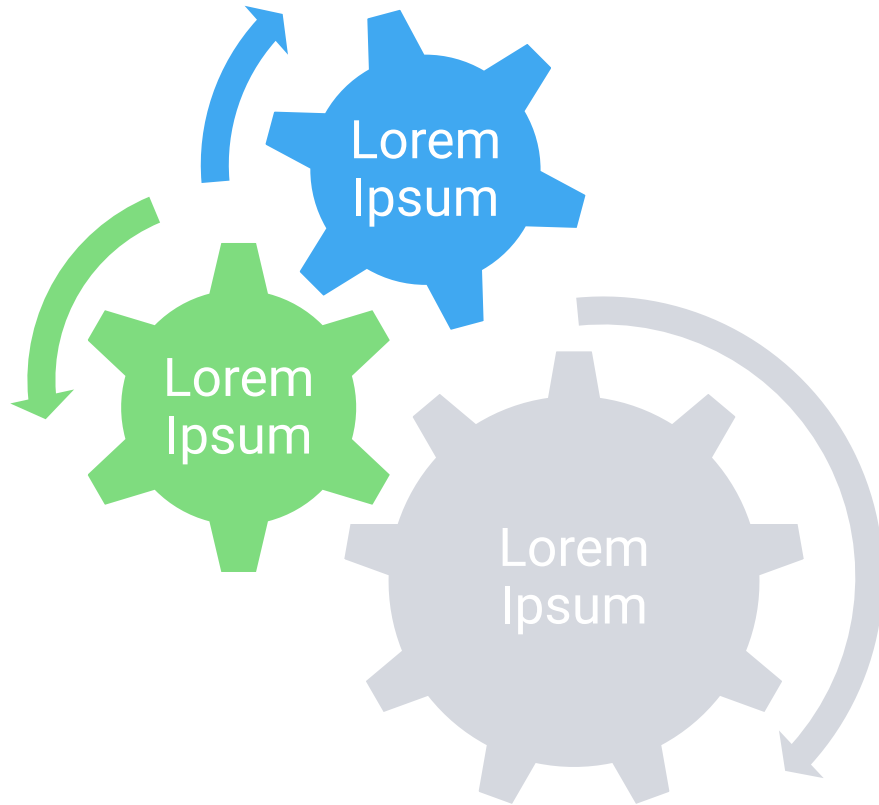

Caffeine doesn't maintain memory performances, it only increases alertness.

A swimmer is shown in a blue pool, performing a stroke. The swimmer's right arm is extended forward, and water is splashing around the hand. The swimmer's head is above water, wearing goggles. The background shows a hazy, green landscape with hills and a path. A white-bordered box is overlaid on the left side of the image, containing text.
