

Green Energy
Made by Tsay Vitaliy
ICS9-11

Contents

- .The importance of green energy
- .Green energy in Russia

Types of green energy

- Wind power
- Solar power
- Hydro power

Wind Power

- Kinetic energy of wind
- Produce 4% of global electricity

Solar Power

- High cost of solar panels
- Solar panels takes a lot of space

Hydro Power

- Produce 17% of world electricity
- 70% of renewable electricity
- Cheap cost of producing

Green energy in Russia

- One of the largest producer of green energy in the world
- Mostly consists of hydroelectric energy
- All other sources only 1% combined
