

# The only purpose of school education is gaining academic knowledge

- 1) Выделяем ключевые слова в задании

**The only purpose** of **school education** is **gaining** academic **knowledge**

У нас сильный ограничитель **THE ONLY** (это означает что в одной позиции мы должны обозначить что получение знаний единственная цель )

- 2) Определяем две противоположные позиции (позиция автора и позиция оппонента) В задании уже одна позиция нам дана. Вторую просто ей противопоставляем
- 1) The only purpose of school education is gaining academic knowledge (только академические знания по предметам)
- 2) Gaining academic knowledge is not the only purpose of school education (практические навыки , воспитание EXPERIENCE and EDUCATION)
- 3) Продумайте два вопроса, ответы на которых помогут привести аргументы и доказать позицию
- Можно считать получение академических знаний единственной целью учёбы в школе? ?
- Какие основные цели школьного образования?
- 4) Обозначьте границы, за рамки которых мы не можем выйти и держать мысли в теме.
- Мы не можем писать о проблемах образовании в мире, о перспективах образовании в школе
- 5) составьте небольшой список синонимов для ключевых слов

# Подготовка к работе

---

## **The only purpose**

---

- The main Aim
- The prime objective
- The only target
- To be mostly aimed at doing
- The school's primary purpose
- The school's sole purpose/objective

## **Gain knowledge**

---

- Receive knowledge
- To acquire knowledge
- Detailed/ extensive/ basic knowledge
- Academic subjects (connected with studying, not practical skills)
- Academic standards

# **СИНОНИМЫ**

---

- To assimilate information – to make it a part of your basic knowledge
- To absorb information – to remember facts and ideas
- To use a blended learning model (about schools) – to use computer technologies
- To learn by experience – to learn by doing things
- To cram for the exam – to learn a lot very quickly before the exam
- To learn by heart / to know by heart

# Learning and knowing

---

- Nowadays the prime aims of school education have been re-estimated by leading scholars and teachers. Some people still think that the only purpose of a school is to educate a student basic academic subjects , while others think differently. 38

# **Введение**

---

- In my opinion, to receive academic knowledge is not to be prioritized in schools. The best argument is that a student has to solve a variety of tasks using their logic and practical skills. Moreover, it would be wrong to deny the cultural aspect of education when a young person learns to live a social life. There is also a belief that students should be taught to survive and to cope with different problems in their life.

# **Мнение автора**

---

However, there are people who are sure that the primary purpose of school education is to study basic academic subjects. Firstly, academic knowledge is mostly essential to continue education in universities and to succeed in career . Secondly, academic studying teach students to be analytical and organized.

# **Мнение оппонента**

---

- I appreciate the view stated above, but I cannot share it. When students are mainly focused on academic subjects, their personality lacks an opportunity to develop practical and social skills in a sufficient way and think independently. There are students who do not aim to get a university degree as they are not interested in intellectual jobs.

# **Опровергаем оппонента**

---

- В этой части работы важно ещё раз подтвердить мнение автора
- In conclusion, school education is definitely not to be based only on teaching academic subjects.
