

A black and white photograph of an astronaut in a full spacesuit standing on the lunar surface. The astronaut is wearing a helmet with a clear visor and has a large life-support backpack. The ground is covered in dust and small rocks. The text 'Высадка на Луну' is overlaid in the center of the image.

Высадка на Луну

APOLLO 11

ORBITED MOON
28/7/68
First Lunar Landing
24/11/68

APOLLO 11 was the first mission to land humans on the Moon. The Lunar Module (LM) was the only part of the spacecraft to touch the lunar surface. The LM was designed to carry two astronauts to the Moon and back. It was launched on 16 November 1968 and landed on the Moon on 20 November 1968. The LM was used for 21 hours and 31 minutes. The LM was launched from the Earth on 16 November 1968 and landed on the Moon on 20 November 1968. The LM was used for 21 hours and 31 minutes. The LM was launched from the Earth on 16 November 1968 and landed on the Moon on 20 November 1968. The LM was used for 21 hours and 31 minutes.
