- **Cleveland** ([/'kli:vlənd/ KLEEV-lənd](#)) is a major city in the [U.S. state of Ohio](#), and the [county seat](#) of [Cuyahoga County](#). The city proper has a population of 388,072, making it the [51st-largest city](#) in the [United States](#), and the [second-largest city](#) in Ohio. [Greater Cleveland](#) is ranked as the [32nd-largest metropolitan area](#) in the U.S., with 2,055,612 people in 2016. The city anchors the [Cleveland-Akron-Canton Combined Statistical Area](#), which had a population of 3,515,646 in 2010 and is ranked 15th in the United States.

History

- Cleveland was named on July 22, 1796, when surveyors of the Connecticut Land Company laid out Connecticut's Western Reserve into townships and a capital city. They named it *Cleaveland* after their leader, General Moses Cleaveland. Cleaveland oversaw design of the plan for what would become the modern downtown area, centered on Public Square, before returning home, never again to visit Ohio. The first settler in Cleaveland was Lorenzo Carter, who built a cabin on the banks of the Cuyahoga River. The Village of Cleaveland was incorporated on December 23, 1814. In spite of the nearby swampy lowlands and harsh winters, its waterfront location proved to be an advantage, giving access to Great Lakes trade. Growth continued with added railroad links. Cleveland incorporated as a city in 1836, the city, then located only on the eastern banks of the Cuyahoga River, nearly erupted into open warfare with neighboring Ohio City over a bridge connecting the two. Ohio City remained an independent municipality until its annexation by Cleveland in 1854

Geography.Topography

- According to the [United States Census Bureau](#), the city has a total area of 82.47 square miles (213.60 km²), of which 77.70 square miles (201.24 km²) is land and 4.77 square miles (12.35 km²) is water.^[2] The shore of [Lake Erie](#) is 569 feet (173 m) above [sea level](#); however, the city lies on a series of irregular bluffs lying roughly parallel to the lake. In Cleveland these bluffs are cut principally by the [Cuyahoga River](#), Big Creek, and [Euclid Creek](#). The land rises quickly from the lake shore. [Public Square](#), less than one mile (1.6 km) inland, sits at an elevation of 650 feet (198 m), and Hopkins Airport, 5 miles (8 km) inland from the lake, is at an elevation of 791 feet (241 m).

Architecture

- "Millionaire's Row", See also: [List of tallest buildings in Cleveland](#) and [National Register of Historic Places listings in Cleveland, Ohio](#) Cleveland's downtown architecture is diverse. Many of the city's government and civic buildings, including City Hall, the [Cuyahoga County Courthouse](#), the [Cleveland Public Library](#), and [Public Auditorium](#), are clustered around an open [mall](#) and share a common [neoclassical architecture](#). Built in the early 20th century, they are the result of the 1903 [Group Plan](#). They constitute one of the most complete examples of [City Beautiful](#) design in the United States.^[39]

Climate

- The Great Lakes region, Cleveland exhibits a continental climate with four distinct seasons, which lies in the humid continental (Köppen *Dfa*) ^{لدى} zone. Summers are warm to hot and humid while winters are cold and snowy. The Lake Erie shoreline is very close to due east-west from the mouth of the Cuyahoga west to Sandusky, but at the mouth of the Cuyahoga it turns sharply northeast. This feature is the principal contributor to the lake effect snow that is typical in Cleveland (especially on the city's East Side) from mid-November until the surface of Lake Erie freezes, usually in late January or early February
