Oleg Antonov

**Evgeny Paton
Oskarovich.**

**Nicholas
Amos.**

Borys Paton

Oleg Antonov-known aircraft (1906–1984)

The person who created the world's largest transport aircraft. This is it - the father of Kyiv Design Bureau, which for many years named after him.

Oleg Antonov

During his life he created more than 50 types of gliders and more than 20 types of aircraft.

From An-2 to the giant Ruslan. With - in pencil engineer came many revolutionary technical solutions.

**Oleg Antonov
has developed a
new plane called
the Antonov
An-2 "Colt".
Whose motto
could be: "Do all
fly every
where."**

An-2

Ан-28

Ан-26

Ан-148-100В

Ан-124 «Руслан»

"Ruslan" carries subway cars, cars.

**During a test flight of An-225 "Mriya"
Ukrainian production is set 109 world records.**

AN-225 ("Dream") - the largest aircraft in the world

Evgeny Paton

(1870 -1953)

**world-renowned
scientist in the field
of bridge
construction and
welding, Honored
Scientist of
Ukraine, Hero of
Socialist Labor,
academician.**

Kyiv bridge that connects the two banks of the Dnieper River, a popular place for Kiev - "Lovers Bridge", and even about fifty bridges and overpasses owe their birth to Academician Yevgeny Paton Oskarovich.

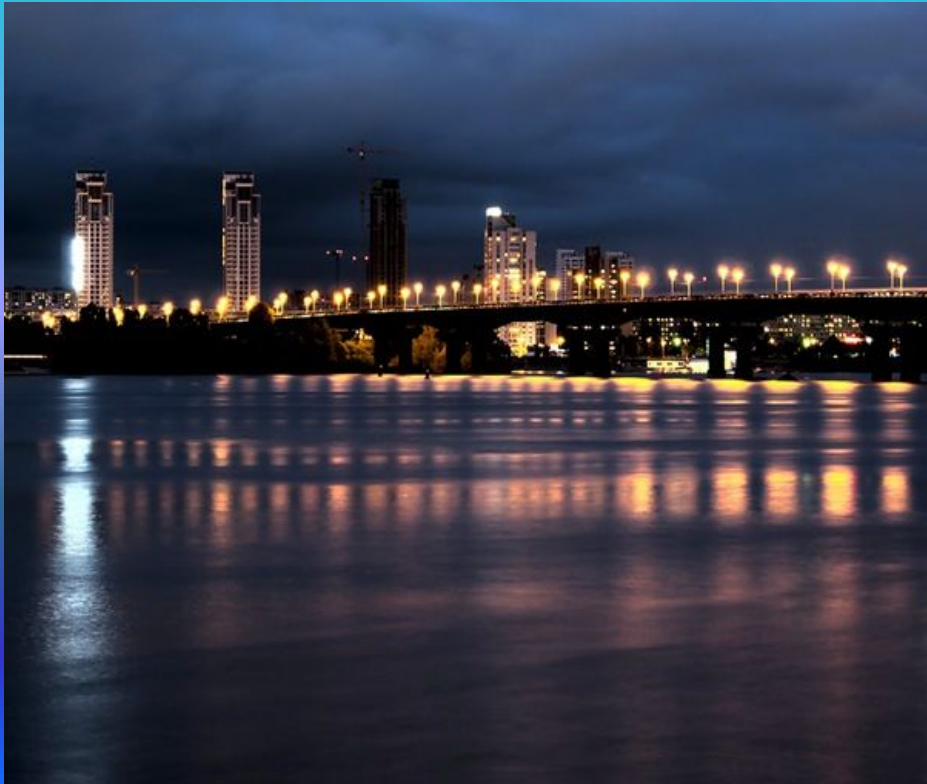

In Ukraine Yevhen Paton know well. His name is given bridge across the Dnieper in Kiev. This bridge was first built by the world's Electric (through scientific inventions Yevhen Paton).

Paton Bridge is interesting because it is one of the largest bridges in Europe.

**It consists of 26 spans, Length of bridge 1543 meters
Width between curbs 21 meters pavement width of 3 mm**

The famous first entirely welded cities in the world, named after Academician Paton, long ago turned into an element of Kiev landscape.

Thank you for
attention!
