

**My profession is
an auto mechanic.
Professional skills.**

Auto mechanic

Auto mechanic - it is a working generalist who performs maintenance and repair of motor vehicles, controls the technical condition of vehicles using the diagnostic equipment and instruments, controls motor vehicles.

The history of the profession:

First mechanics appeared in the middle 18th century in countries where previously there was just transport capable of moving yourself. Since then, self-propelled mechanisms are constantly changed and improved. But any mechanism necessary and timely care repair, so needed special education and well versed in the design of the car people. So there was a car mechanic profession.

What you should know and be able

to:

Car mechanic - car repair specialist for technical maintenance of various machines, detailed knowledge of their device.

He must know the internal combustion engine, the vehicle's electrical devices must be able to disassemble and assemble components and assemblies of the car; diagnose the car and its components using the diagnostic equipment; adjust mechanisms, parts, etc.

Mechanic work associated with high physical activity, so it is not recommended for people suffering from diseases of the musculoskeletal system, respiratory, cardiovascular and nervous system.

- Through the life of the car mechanic is greatly increased, which in turn reduces the risk of accidents and ensures the safety of the driver on the road.
