What is Welding positioner?

Welding positioner is a device that rotates around 360° rotation which allows a welder to stand in one position and constantly work on a plane surface. It adds comfort for the welder who must work on odd shaped parts, such as tubular pipelines.

Imensys

Welding Positioner

- Capacity : 1-50 ton
- Drive : Motorized with VFD control for all motions
- Operation : Manual
- Rotation : 359° or Continuous 360° Rotation type
- Tilt : 135° Max

Features?

Specifications?

Imensys

Welding Positioner

- Quick & Easy Alignment
- No repetitive clamping, de-clamping of component
- Precise & rigid positioning of workpieces
- Reduce worker fatigue & safety

Imensys

Applications ?

Imensys

Welding Positioner

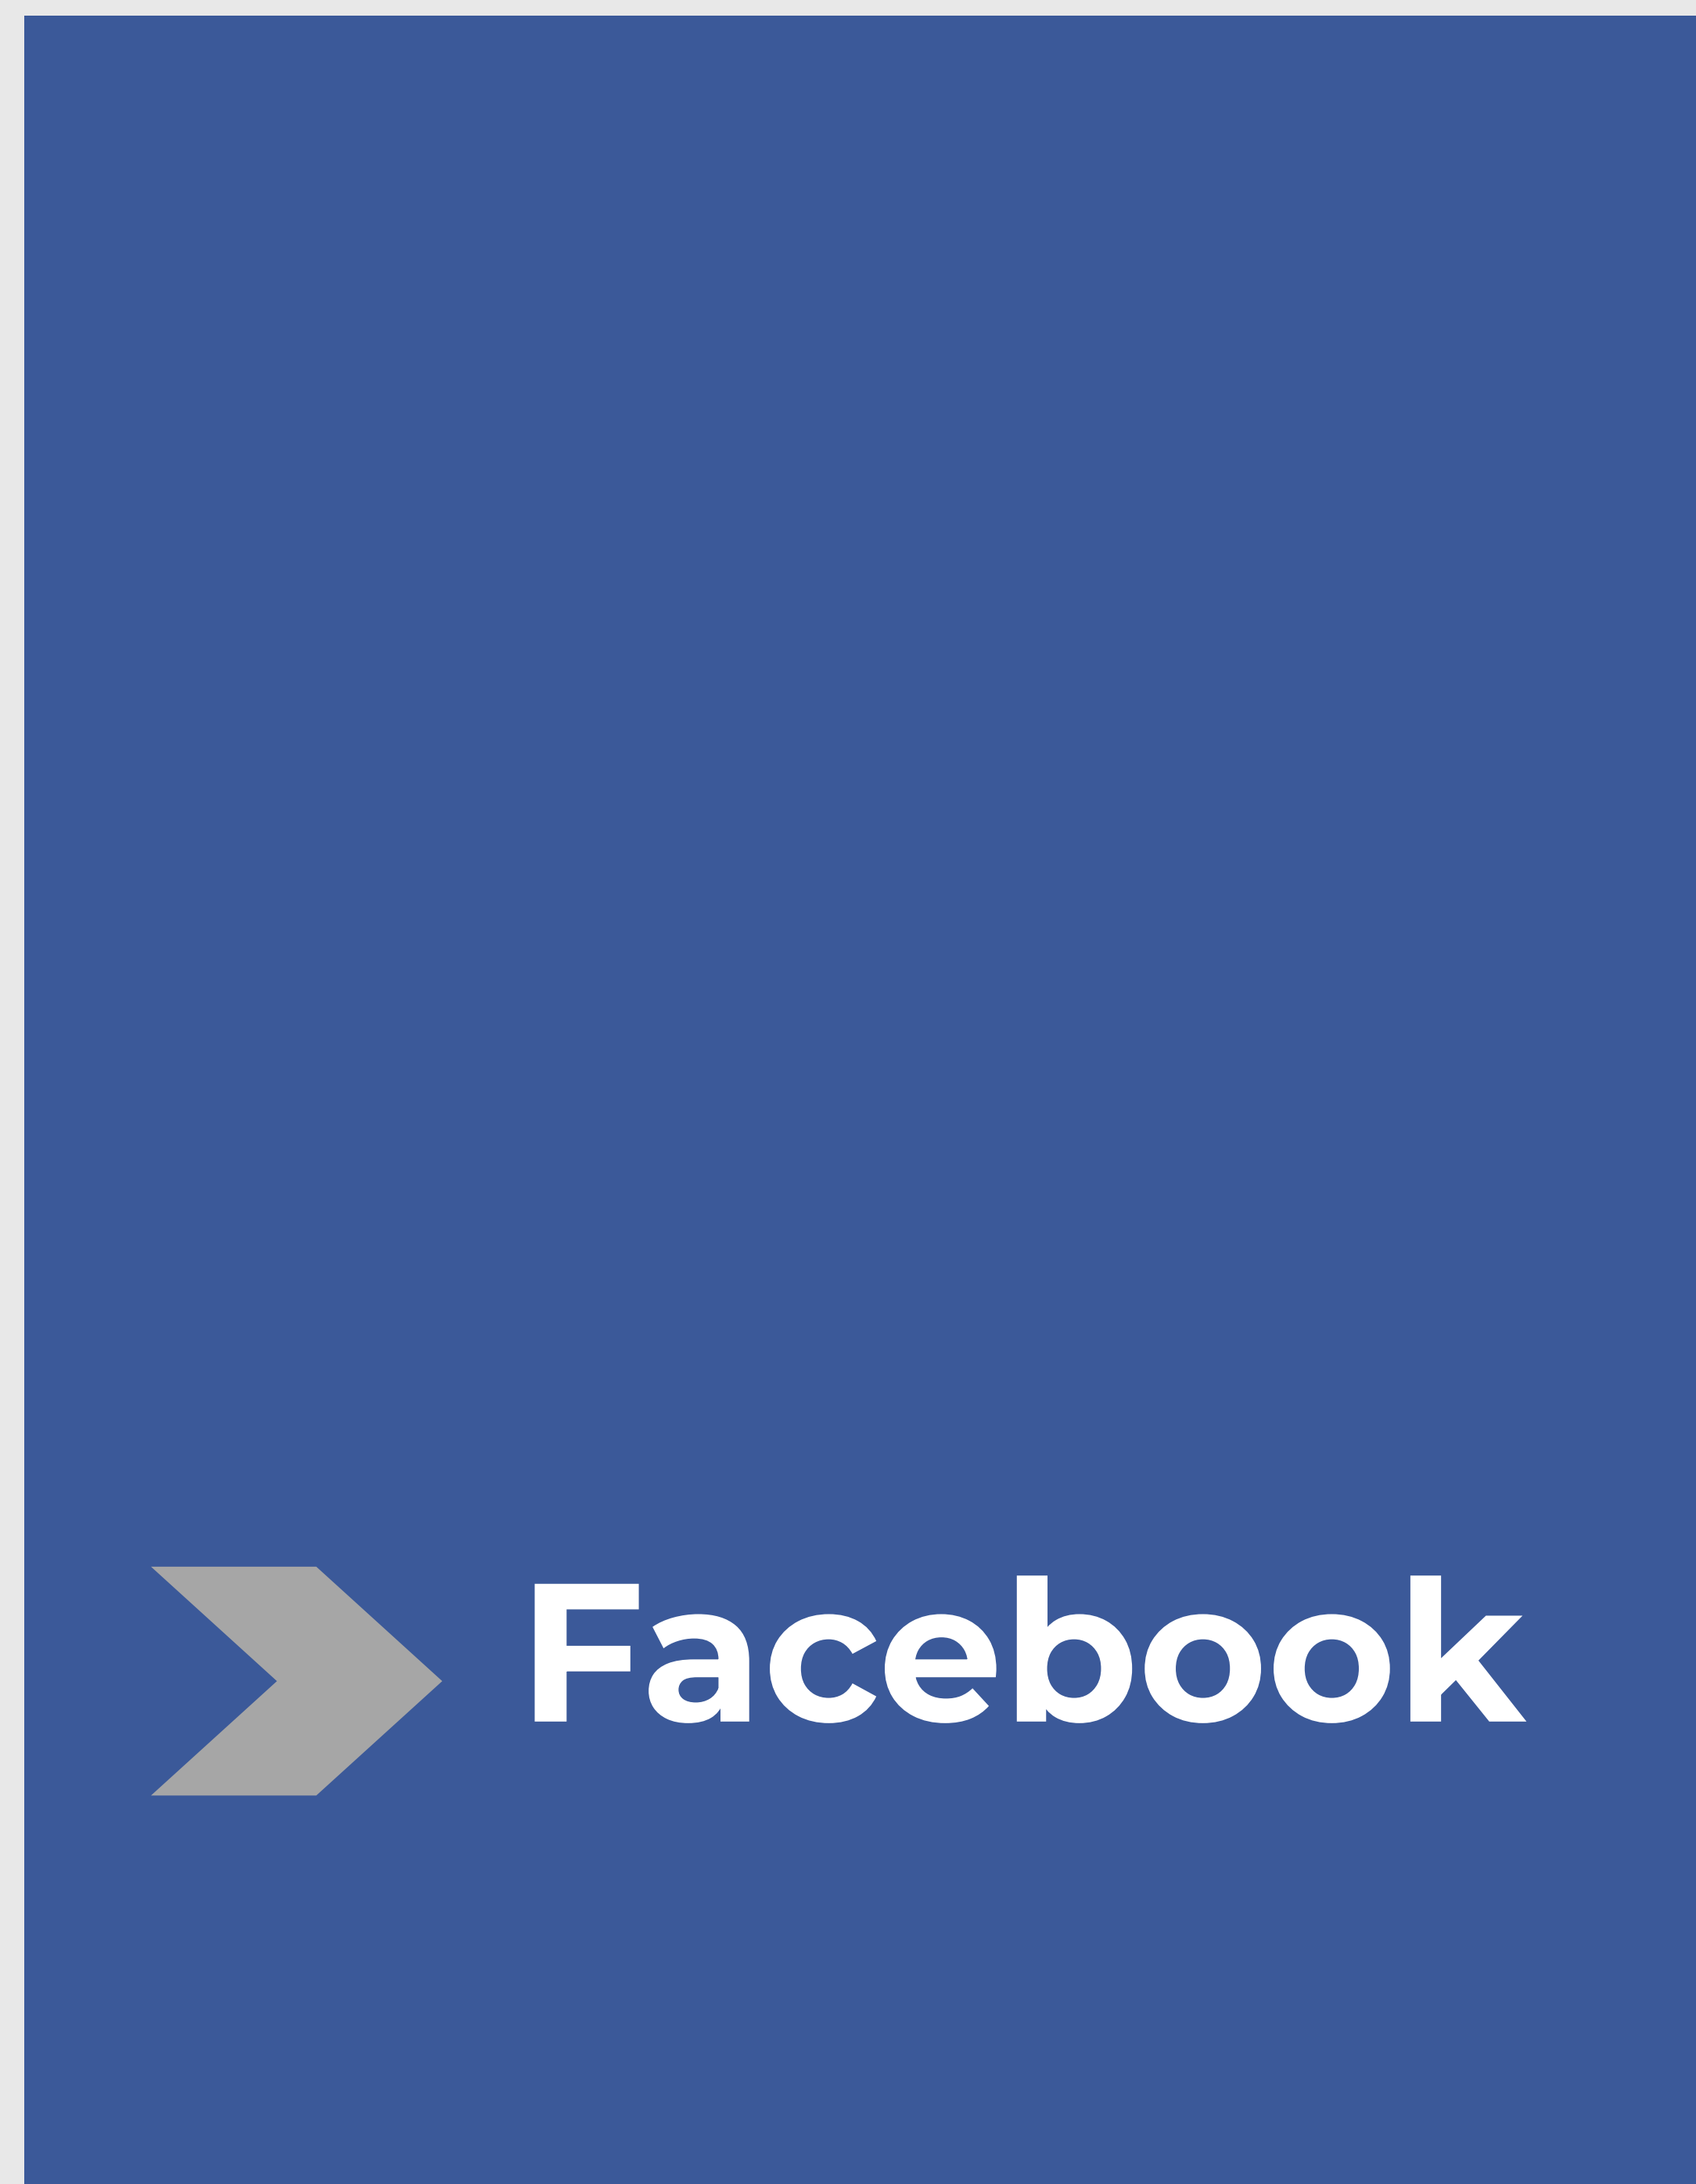

- Achieves 'Down Hand' welding position without the need of overhead cranes!
- Achieve efficient welding procedures with maximized deposition rate
- Achieves Safe and efficient production requirements
