DUBAI MARINA , UNITED ARAB EMIRATES

Dubai Marina is a district in Dubai, United Arab Emirates. Dubai Marina is an artificial canal city, built along a two-mile (3 km) stretch of Persian Gulf shoreline. When the entire development is complete, it will accommodate more than 120,000 people in residential towers and villas. It is located on Interchange 5 between Jebel Ali Port and the area which hosts Dubai Internet City, Dubai Media City, and the American University in Dubai. The first phase of this project has been completed. Dubai Marina was inspired by the Concord Pacific Place development along False Creek in Vancouver, BC, Canada.

There have been many instances of marine wildlife (especially whales and sharks) entering the lake, because of its proximity to the open sea

PERITO MORENO GLACIER ARGENTINA

The Perito Moreno Glacier (Spanish: *Glaciar Perito Moreno*) is a glacier located in the Los Glaciares National Park in southwest Santa Cruz Province, Argentina. It is one of the most important tourist attractions in the Argentinian Patagonia.

The 250 km² (97 sq mi) ice formation, and 30 km (19 mi) in length, is one of 48 glaciers fed by the Southern Patagonian Ice Field located in the Andes system shared with Chile. This ice field is the world's third largest reserve of fresh water. The Perito Moreno glacier, located 78 kilometers (48 mi) from El Calafate, was named after the explorer Francisco Moreno, a pioneer who studied the region in the 19th century and played a major role in defending the territory of Argentina in the conflict surrounding the international border dispute with Chile.

The Perito Moreno Glacier is one of only three Patagonian glaciers that is growing. The reason remains debated by glaciologists. The terminus of the Perito Moreno Glacier is 5 kilometers (3 mi) wide, with an average height of 74 m (240 ft) above the surface of the water of Argentino Lake, in Argentina. It has a total ice depth of 170 metres (558 ft).
