Квартира в жилом комплексе "Южный берег". Игорь Гошовский, Илья Немков

- For applying an entry to the banquet hall section of the wall under the window opening was demounted
- The space of the hall is formed by changing the existing situation by building up with laid brickwork and suturing by the plasterboard opening in the wall between the hall and the adjacent room. The flight of stairs, a wall of glass bricks and opening next to them are sutured by plasterboard. In the lobby of the partition is set for dressing and protecting the space under the stairs to the room inventory. The floors in the lobby stay as it is.
- The walls of the corridor between the hall and the hall are arranged mirror facets. The ceiling is formed by plasterboard boxes.
- The floor in the hallway and into the room of the PVC tiles (AI-13,14) is higher than in the lobby. Between the corridor and hall - transition nut. Plinth in all areas should be on the same level on the top edge.
- The hall is formed of two rooms, among which are projected the dismantled wall. The partition is added to create boundaries between the hall and office space. On the contour of the room sound insulation is laid. The ceiling ventilation ducts are sewn plasterboard. Important to note the ceiling will be suspended luminaries in addition to air conditioning, overhead projector, projector screen frames spotlights, mirror ball. For the walls in the room to be attached: TV, audio speakers and paintings. The hall should be formed podium to DJ equipment.

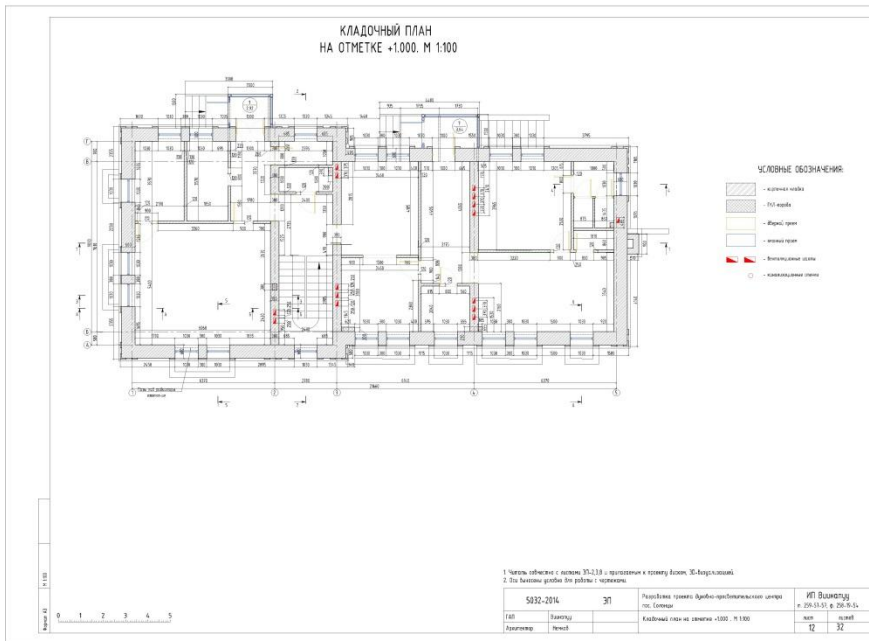

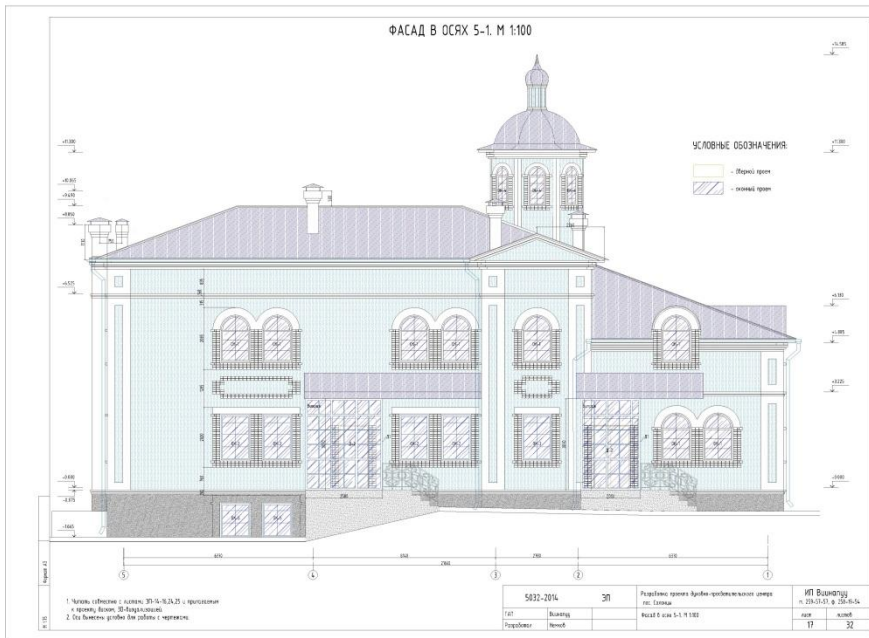

- Elaboration of drawings album for interior design of restaurant 'Urartu'. Krasnoyarsk.
- 40 sheets
- Chief architect: Viinapuu
- Architectural designer: Nemkov

- Hall:
 - decorative column (pilasters), framing the mirror to the left of the entrance, formed by plasterboard and metal profiles. Deepening in pilasters made by superimposing two layers of plasterboard, in one of which rectangular hole is cutted. Decorative columns flanking the corridor between the hall and the dining-hall are invoiced (elevation of the walls on AI-26-32 and list of decorative elements on AI-25)
- The corridor between the hall and the dining-hall:
 - jumpers of openings in the corridor at the same level (overall section on AI-33);
- The dining-hall:
 - ceilings in the room to mount based insulation layer (ceiling plan and cuts across the ceiling to the AI-15, 16 and elevation of the walls of the AI-26-32, the general section of the hall on the AI-33);
 - the installation of plasterboard ceilings has to make with consideration of the location of ventilation, also important the box glued over decorative cornices (ceiling plan and cuts across the ceiling to the AI-15, 16 and elevations of the walls of the AI-26-32);
 - air conditioning and ventilation diffusers have, depending on the location of lighting fixtures, decorative elements, according to the scheme presented in the draft, if necessary, make adjustments, coordinating them with the designer;
 - in the walls under the windows are made with indents for "embedding" of radiators.
 - all the walls in the hall spliced by plasterboard. Between the plasterboard and the load-bearing walls is laid sound insulation.
- The walls and wall openings have decorative moldings and elements:
 - the cost estimate of the work should be guided by the number of finishing materials according to the statements of the walls and ceilings;
 - when ordering custom-made furniture, be sure to specify the dimensions of the place.

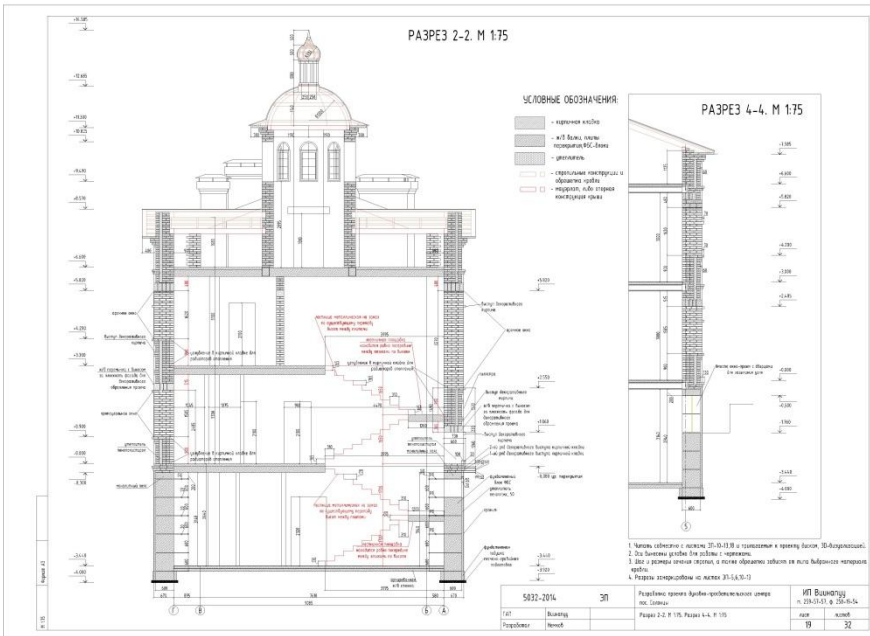

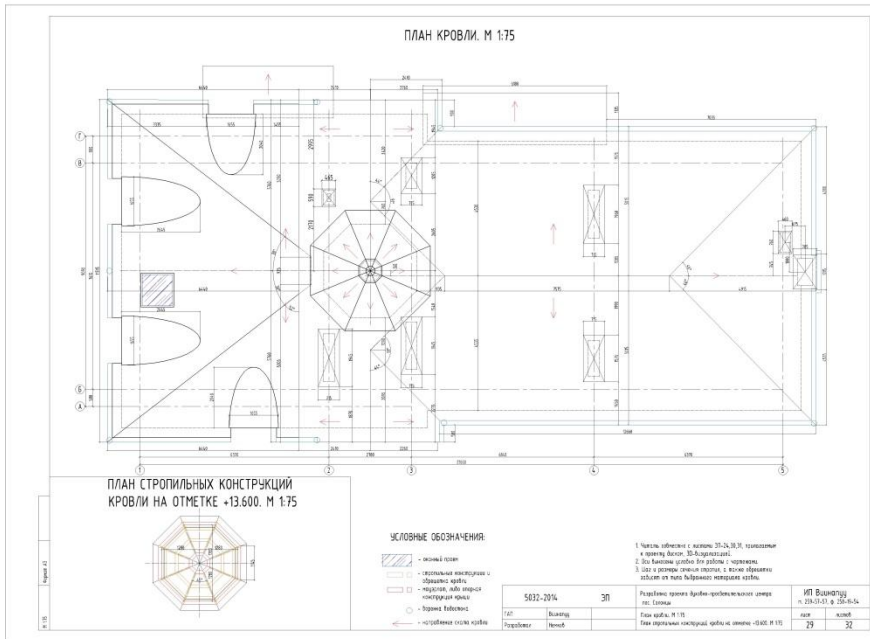

- Elaboration of drawings album for interior design of restaurant 'Urartu'. Krasnoyarsk.
- 40 sheets
- Chief architect: Viinapuu
- Architectural designer: Nemkov

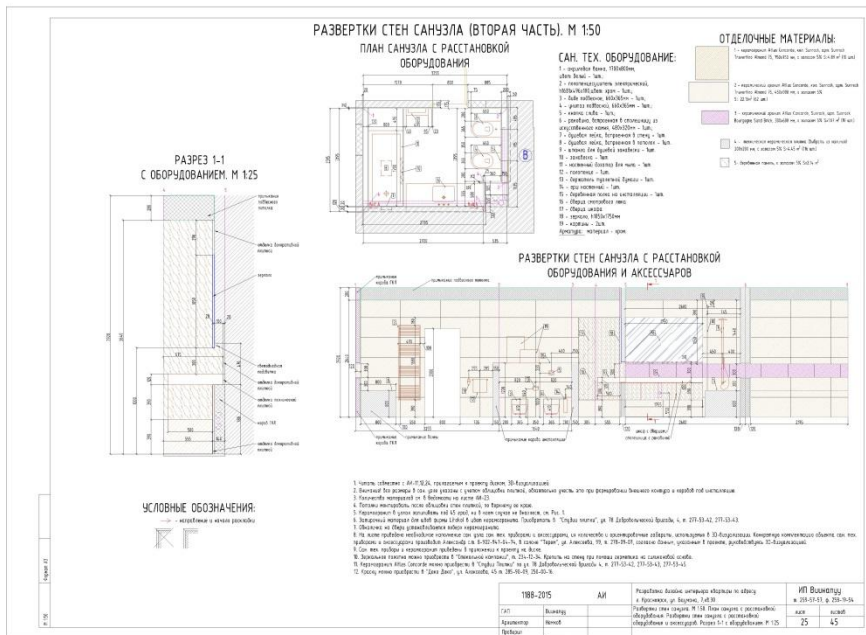

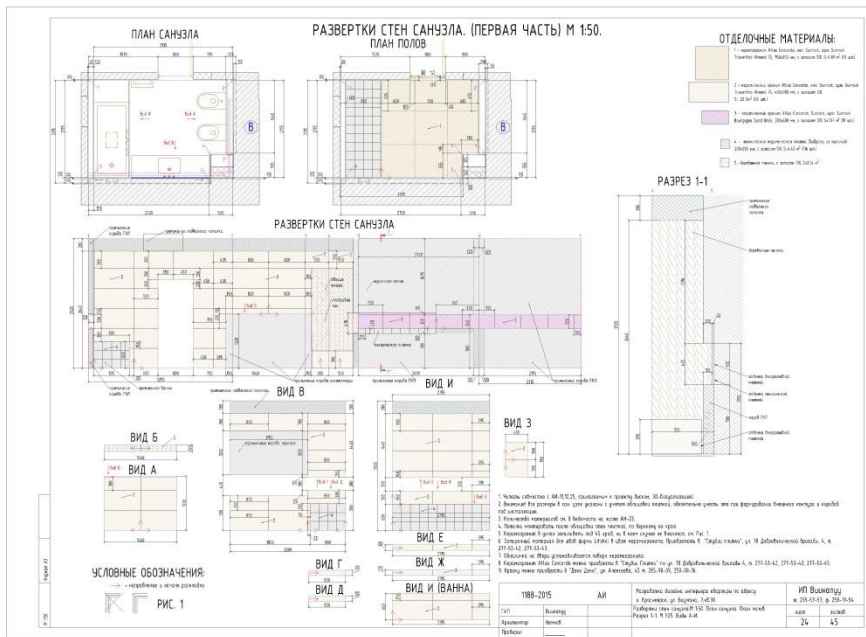

- • Structural system - frameless transverse load-bearing walls.
- • Communication between the basement, first and second floor is provided by the internal staircase.
- • The connection between the second floor and technical floor is provided by folding ladder.
- • TECHNICAL AND ECONOMIC PERFORMANCE
- Built-up area, taking into account the input of stairs -243.55 m²
- The total area of the premises, excluding a technical floor (attic) - 501.43 m²
- • The area of technical floor -112.94 m²
