The Market

How can we prevent security breaches?

Am I safe living here?

Why is there a need for Command & Control?

Germany December 08

Teenagers smash man's skull in Munich U-Bahn

Published: 9 Dec 08 16:31 CET

Police on Tuesday reported a group of at least six teenagers recently attacked a 24-year-old man in the Munich U-Bahn station, causing skull and facial fractures. His brother suffered a broken nose when he tried to intervene.

Atomkraftwerk Krümmel nach Brand abgeschaltet

28.06.2007

Nach Augenzeugenberichten hüllten riesige schwarze Rauchwolken das Atomkraftwerk ein. Über die Trafostation wird der Atomstrom in das Netz eingespeist. Wann das Atomkraftwerk wieder ans Netz gehen kann, war zunächst offen.

Das Atomkraftwerk wird von der Kernkraftwerk Krümmel GmbH betrieben, die jeweils zur Hälfte Vattenfall Europe und E.on Kernkraft gehört. E.on Kernkraft verwies gegenüber SPIEGEL ONLINE darauf, dass die "Betriebsführung" für das KKW Krümmel bei Vattenfall liege und wollte deshalb keine Angaben machen.

At least nine killed as Turkish Airlines plane crashes near Amsterdam

More than 50 injured as plane carrying at least 127 passengers splits in three on approach to Schiphol airport

At least nine people were killed today when a Turkish Airlines plane crashed into a field as it came in to land at Amsterdam's Schiphol airport, breaking into three sections on impact.

Among these who died were the three flight crew, whose bodies remained on the stricken plane, officials said. A total of 80 people had been taken to 11 hospitals around the region, a medical official told a press conference. Six of these were very critically hurt and it was not known whether they would survive. Five others were seriously hurt, she said.

What is Command & Control?

Personnel

Equipment /
systems

Communications

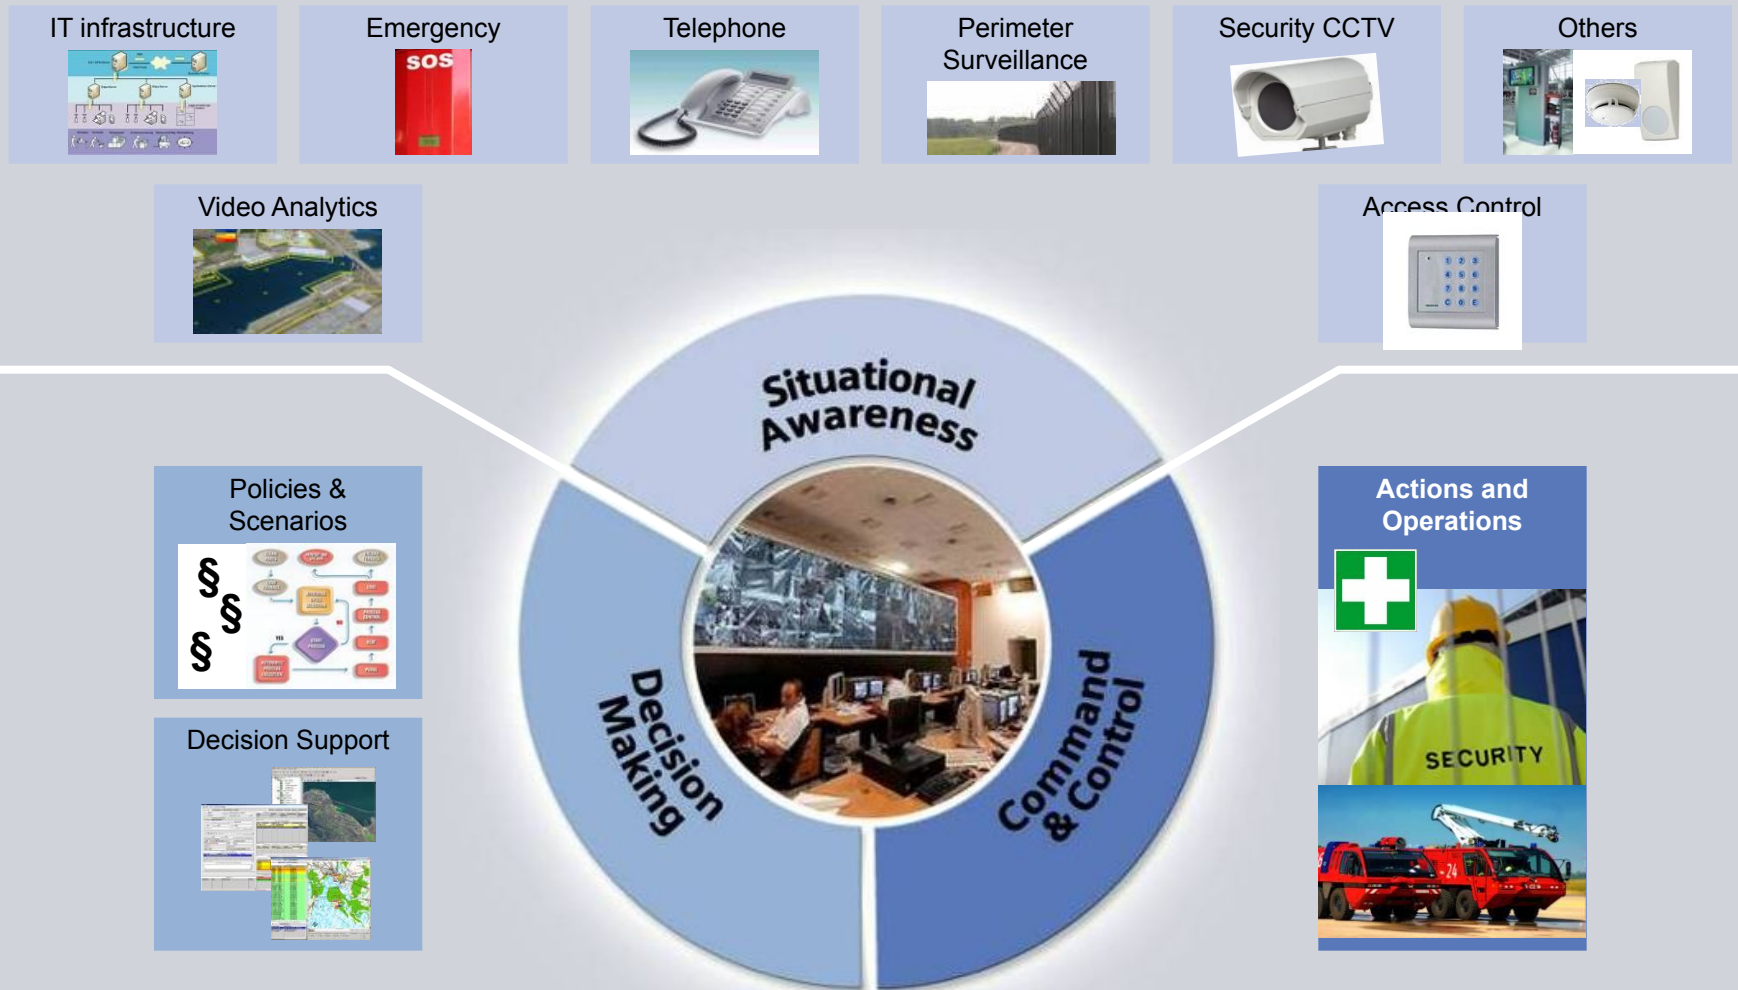

Facilities

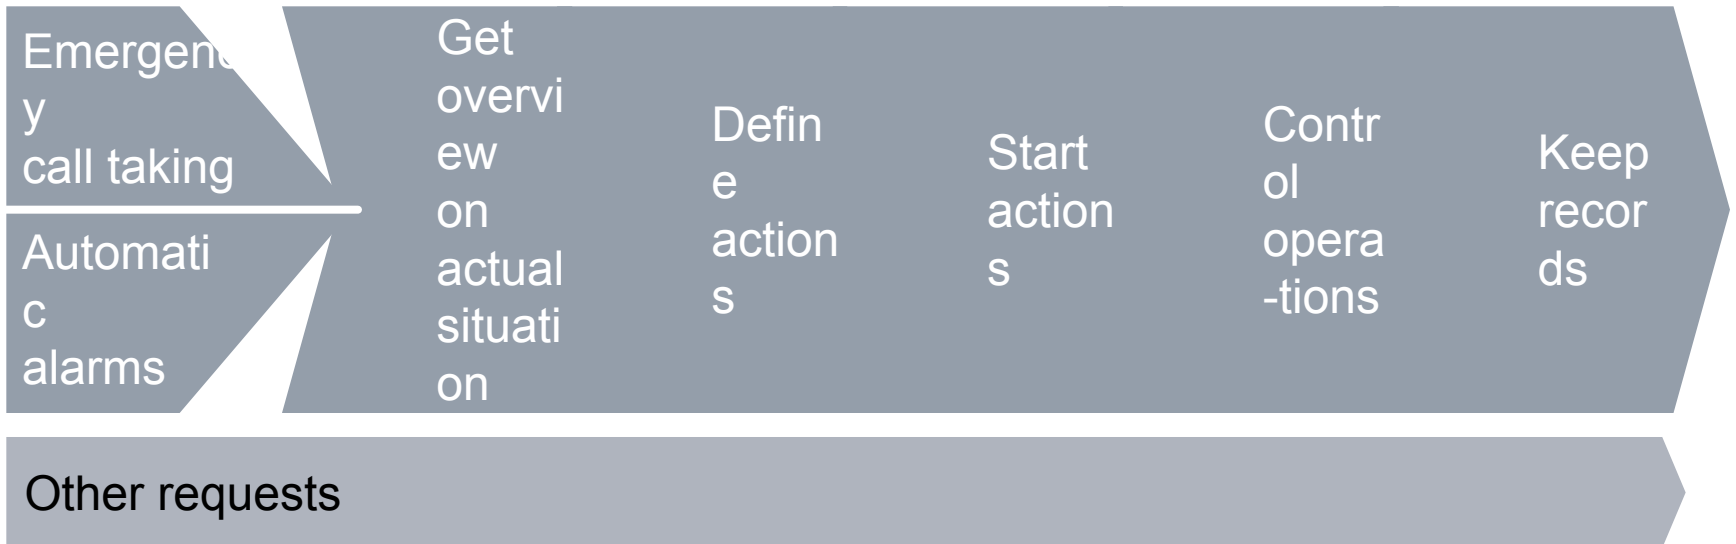

Procedures

Command and Control is an approach in which functions are performed through management of personnel, equipment/systems, communications, facilities and procedures

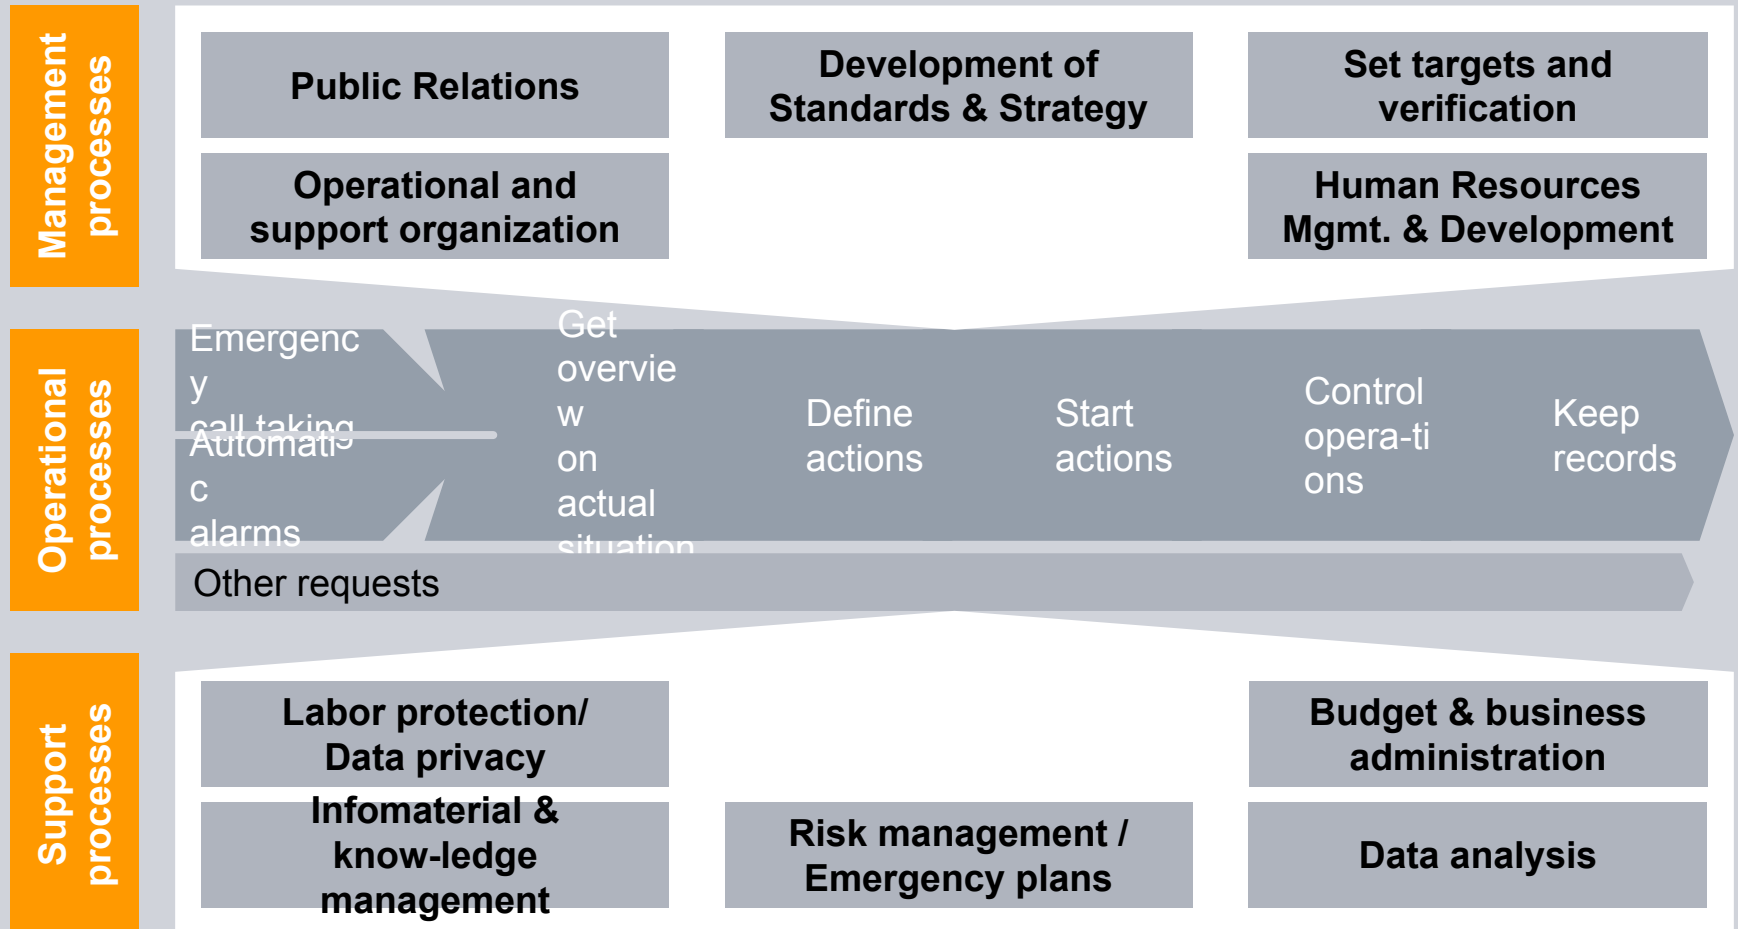

Three main elements of Command & Control

Operational processes

Management and Support Processes

Command & Control Centers

Areas of application

Public Security

- Computer Aided Dispatch for Fire Brigade, Police, Rescue / Ambulance
- "112" / "911" emergency calls
- Crisis Management

Security Management Services

Remote monitoring and special application, MSS Project Columbus

Critical Infrastructure

Applications in the Heavy Industry, Power Generation & Distribution, Oil & Gas, Transportation, Ports, Airports ...

Tactical Defense, Ground Traffic

Not targeted

Security in Critical Infrastructure

Characteristics

- Covering geographically large areas
- Extensive security policies
- Need for situational awareness
- Multi vendor subsystems
- Handling of tasks and operations, not just alarms
- Number of operators typically 3-8
- High workload 24/7 operation
- Highest availability
- Integration with communication systems
- Management and dispatch of security forces

Foto: Evonik Steag GmbH

Critical infrastructure

There are risks in case of an incident

Critical infrastructure:

- Heavy Industry
- Pharma
- Power Generation & Distribution
- Oil & Gas
- Transportation
- Ports
- Airports
- ...

Vital need for operational continuity
High risk of financial damage
High risk of losing reputation

Why should the customer invest?

To secure operational continuity!

| What | Why |
|---|--|
| Situational awareness | <ul style="list-style-type: none">▪ Allows to take the correct decisions |
| Integration of communication | <ul style="list-style-type: none">▪ Ensure fast reaction in stress situations |
| Implementation of security policies | <ul style="list-style-type: none">▪ Ensure that the defined action is taken▪ Safe vital seconds for counteractions▪ Minimize impact of an incident |
| Unified and homogeneous handling of subsystems | <ul style="list-style-type: none">▪ Allows the operator to act as quick as possible |
| Redundancy, high availability for 24/7 operations | <ul style="list-style-type: none">▪ Ensure that no incident is missed |

Minimize the impact of an incident

Why should the customer invest?

To secure operational continuity!

| What | Why |
|---|--|
| Complete operational picture, from beginning to the end of an event | <ul style="list-style-type: none">▪ Allows to keep control |
| Display data in geo-referenced maps and site plans, 2D or 3D | <ul style="list-style-type: none">▪ Ensure a quick reaction |
| Statistics and reports | <ul style="list-style-type: none">▪ Allows to analyze effectiveness▪ Improve processes and organization |
| Online configuration | <ul style="list-style-type: none">▪ Security around the clock |
| Web based solution, role based user concept | <ul style="list-style-type: none">▪ Support a flexible organization |

Run a professional security organization

Application example

Why should the customer invest?

For interoperability!

| What | Why |
|--|---|
| Open interfaces to subsystems | <ul style="list-style-type: none">▪ Allows to implement the scope of interaction as needed |
| Standard protocols (e.g. OPC), SDK interface | <ul style="list-style-type: none">▪ Allows integration of existing systems▪ Future-oriented support of new systems |
| Centralized or decentralized multi-site application through IP & Web | <ul style="list-style-type: none">▪ Ensures most effective security organization |
| Communication protected through VPN or HTTPS (SSL) means | <ul style="list-style-type: none">▪ Ensure privacy and consistency of data |

Flexibility and investment protection

Why should the customer invest?

For profitability!

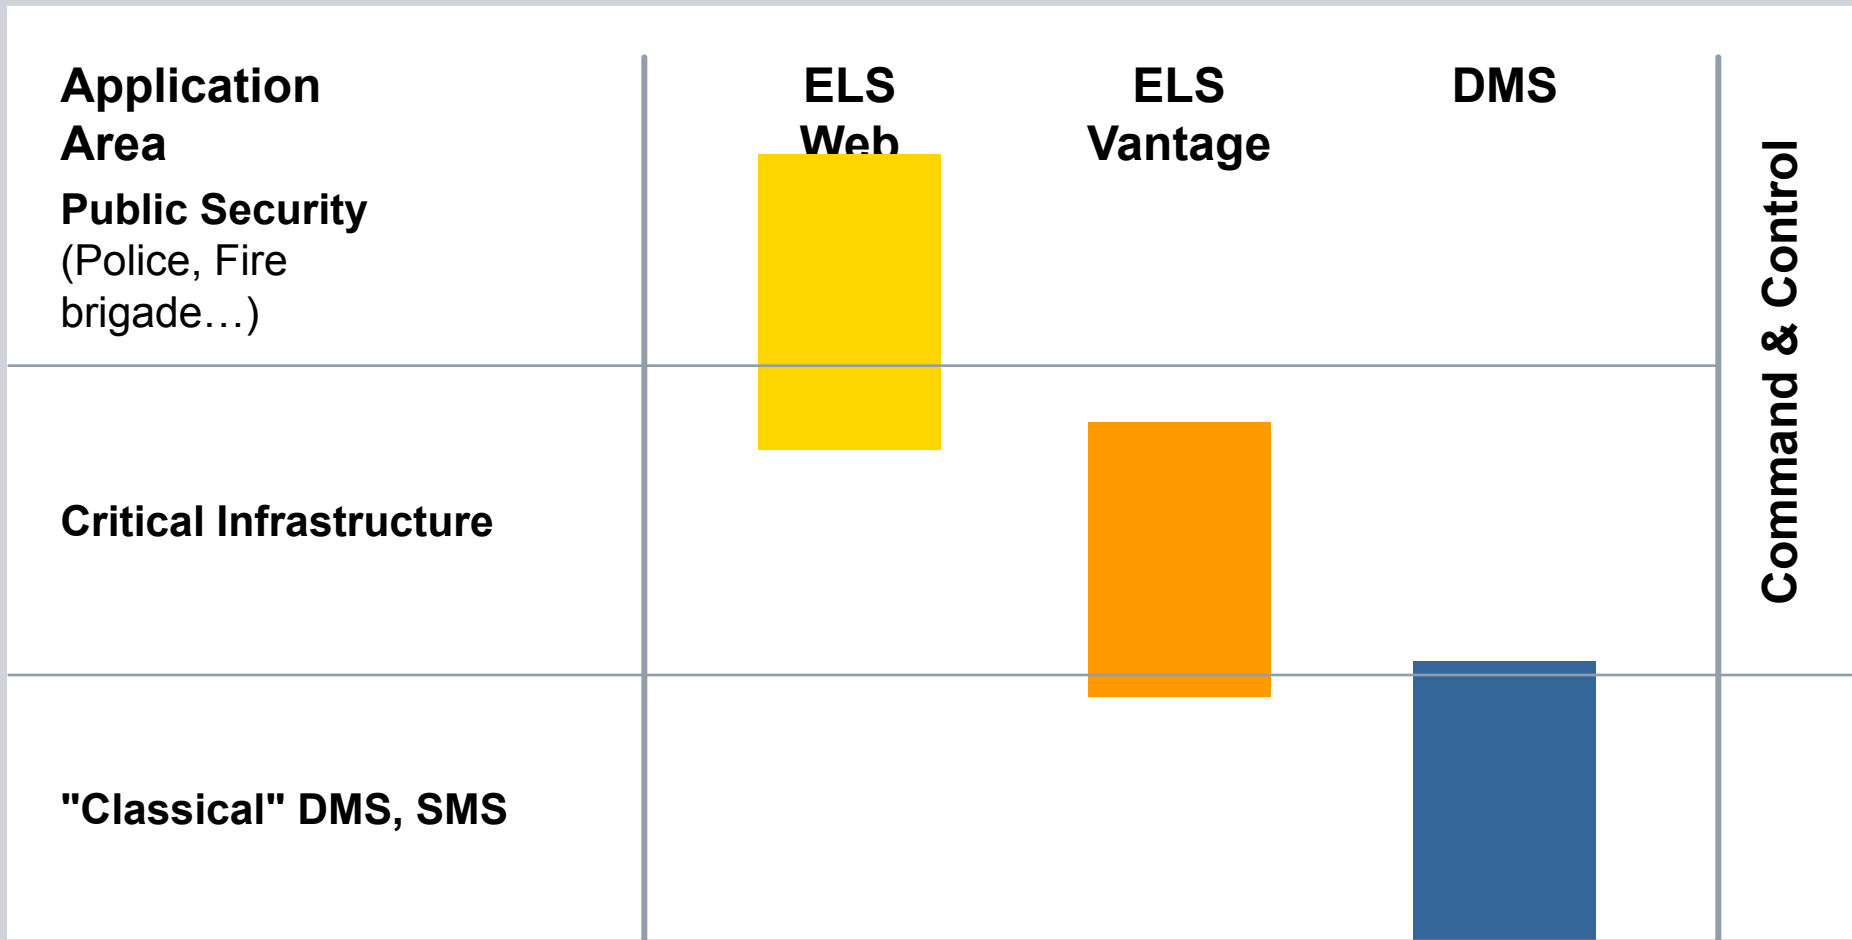

| What | Why |
|---|--|
| Faster and well organized responds to incidents | <ul style="list-style-type: none">▪ Minimize potential damage |
| Upgradability and "future proof", compatibility and open interfaces | <ul style="list-style-type: none">▪ Lower costs for future extensions and subsystem replacements |
| Well defined security policies implemented in the C&C tool | <ul style="list-style-type: none">▪ Possible lower insurance costs |
| Logging of all events | <ul style="list-style-type: none">▪ Give evidence in liability issues |
| Supports of a most effective and professional security organization | <ul style="list-style-type: none">▪ Less people required |

An effective security organization minimizes your risks

Our Management Station Offering

DMS: Danger Management Station / SMS: Security Management Station

Criteria from Selection Matrix

When a Command & Control solution fits

Here it fits perfectly ...

- Security Centers, multiple disciplines in Engineered and Value Solutions, with high security focus
- Extensive security policies
- Multi-site integration
- Remote site management
- Information system integration
- Integration of external databases
- High reliability operation – minimum downtime
- Resource and operational management
- Analog / digital radio system integration
- Telephone system integration (CTI)
- Geographical information system GIS

Depending on application ...

- High workload 24/7 multi-seat operation
- Multi vendor subsystem integration
- Intelligent video analytics

Highlights

Siveillance™ ELS Web and Siveillance™ ELS Vantage

- Integrate Safety and Security subsystems and communication systems
- Provide tightest integration of Intelligent Video Analytics
- Avoid information overload by consolidated and prioritized visualization of all essential information to the operator
- Fully adapt security policies for decision support
- Offer full management of resources, including AVL (ELS Web)
- Role based user management
- Transparently manage the intervention operations
- Log all events and actions related to an incident
- Optimize the companies' security organization and processes

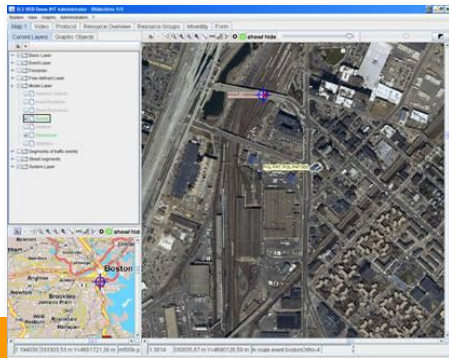

Integration platform

| | | | | | | | | |
|----------------------------|--------------------------------------|---|--|-----------------------------------|--|-------------------------------|--|---|
| Multiple Subsystems | Emergency | Fire Safety | Access Control | Video Management | Video Content Analysis | Other Security Systems | Building Comfort | Communication |
| | Emergency call systems Evacuation | Smoke and fire detection Evacuation Extinguishing | Access control Gate control Perimeter detection Intrusion detection | Display Recording Retrieval | Detect Tracking Perimeter surveillance Classification | IT Security Others | Building automation Energy management Lighting control | Telephone integration (CTI) Public address |

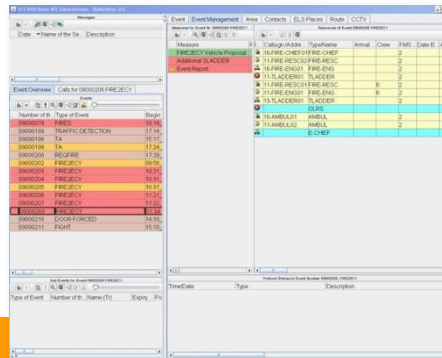

3/4 screen layout

GIS and information

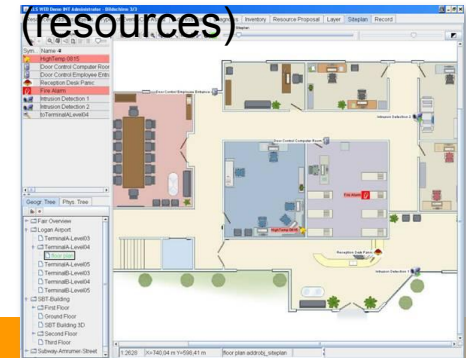

3-screen

Events and measures

Site plans and details (resources)

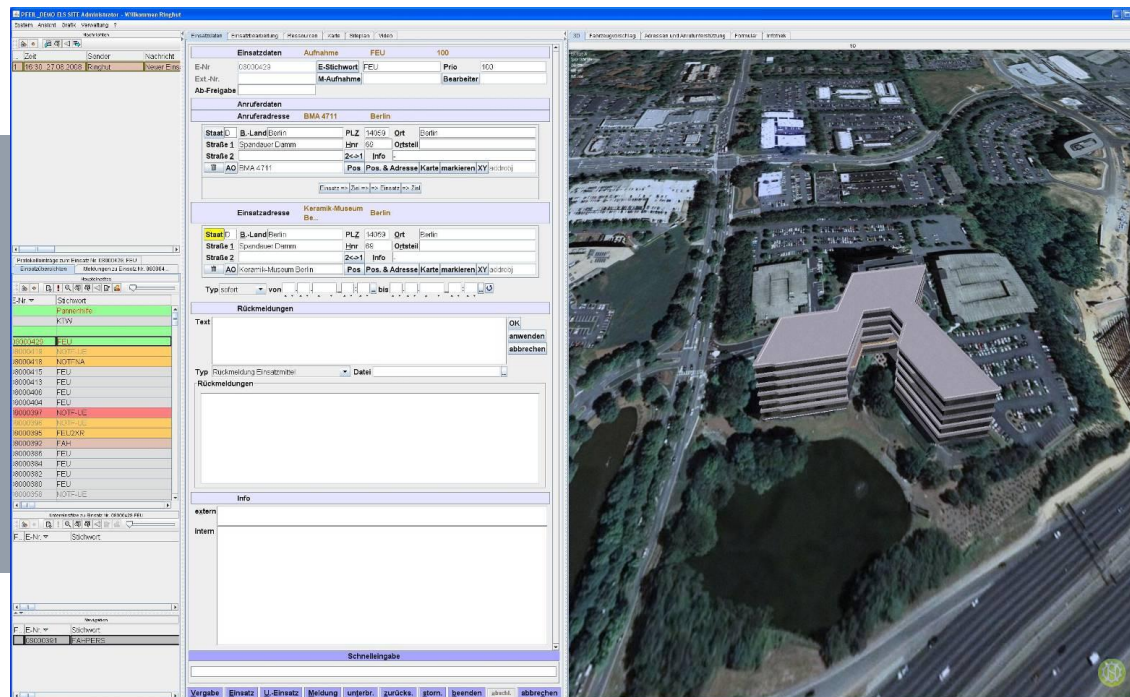

Communication touch screen

Optional touch screen for

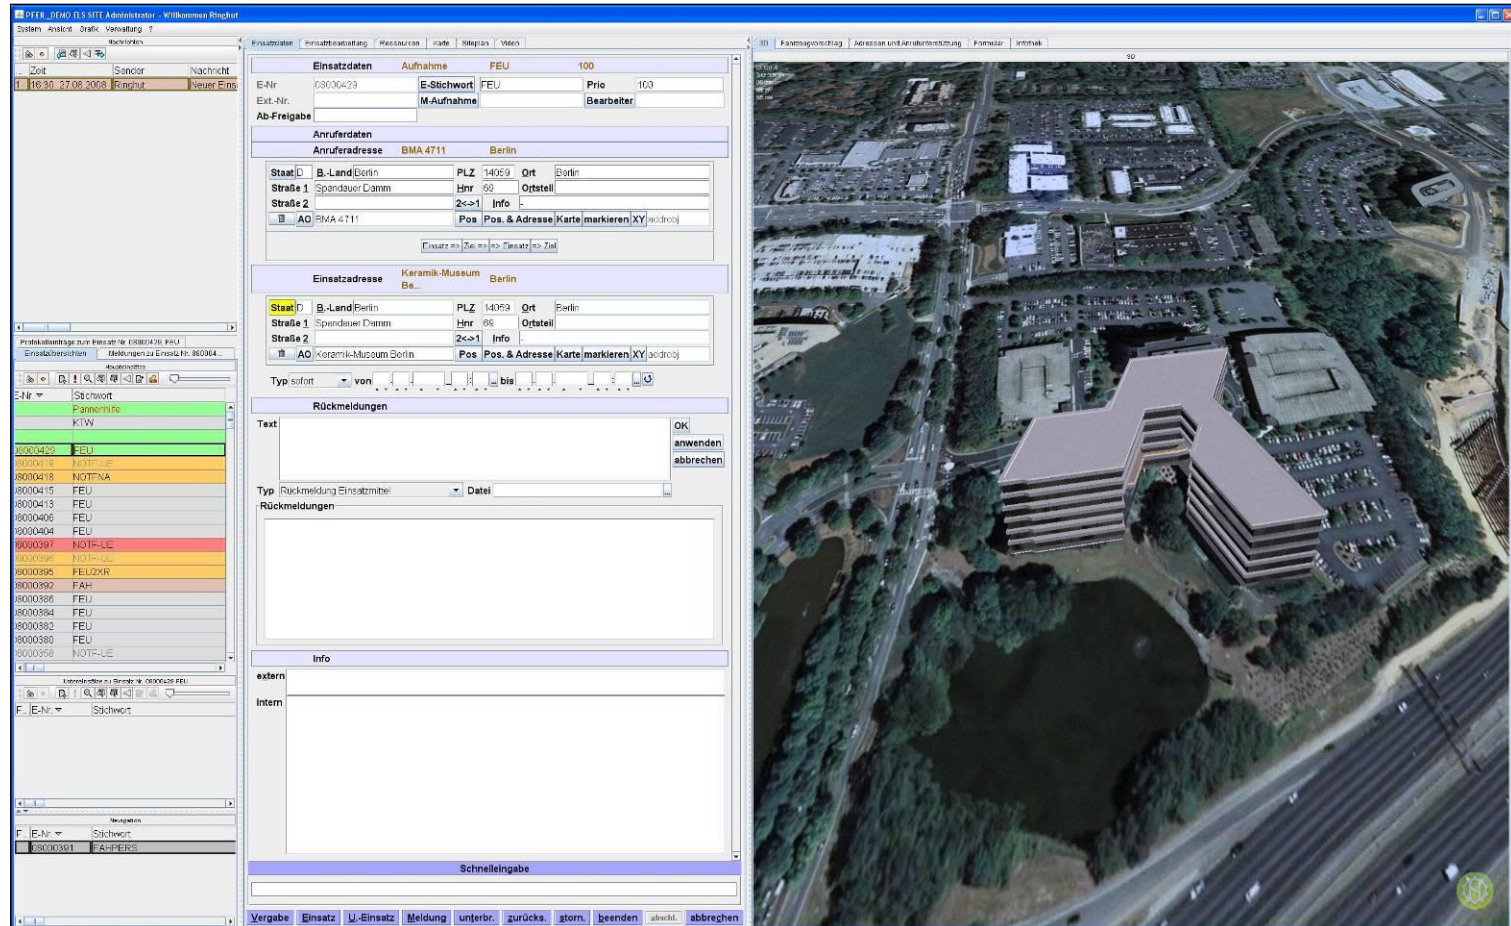

Unique User Interface

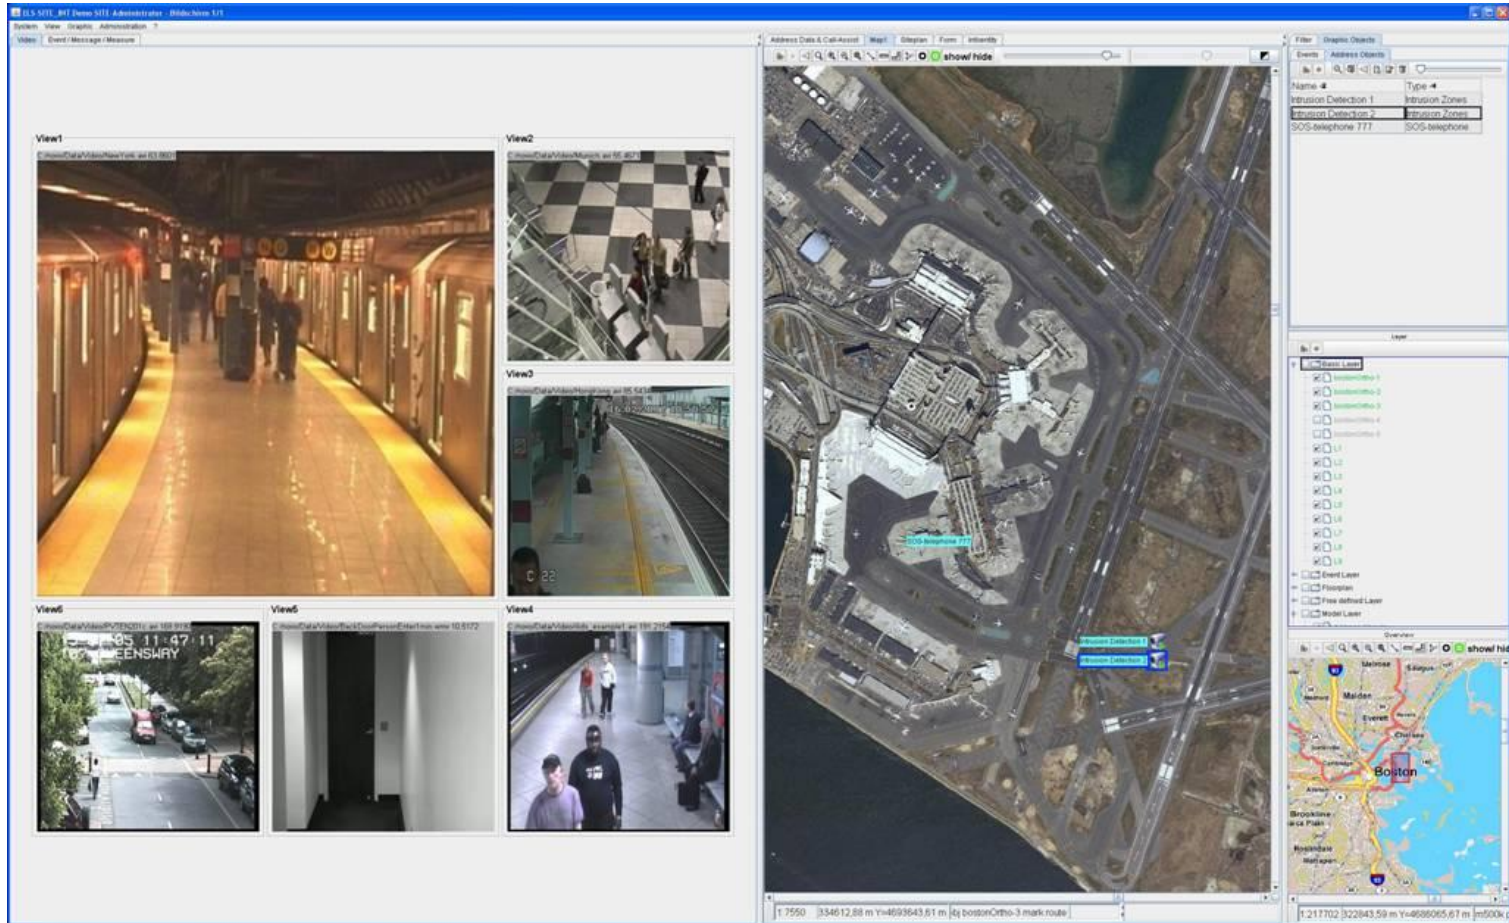

Single Screen Solution - monitor 1920x1200 or 2560x1600 resolution

Innovative high resolution screen Event handling and 3D graphics

SIEMENS

Innovative high resolution screen Video feeds

Unique selling points

Architectural

- Unique fusion of Command & Control Center with intelligent video analytics
- Innovative high resolution screen with dynamic workflow driven layout
- Adaption of customers' security policies
- Assured situational awareness, avoiding information overload
- Open interfaces for subsystem integration
- Full operation via internet with low bandwidth requirements
- Thin web client / zero admin client
- Proven competence in lots of international applications

Unique selling points

Functional

- Full interoperability within
 - Geographic Information System
 - Site plans
 - Information work flow
- 2D or 3D graphics
- CTI-interface to integrate telephone systems
- Customer specific information library
- Decision support minimizes faults and maximizes reaction time
- Embedded resource management and resource tracking

Communication messages

| Main communication message | Promises and values | Reason why? |
|----------------------------------|--|--|
| Reliability and stability | Being a long-term partner | Investment is save |
| Flexibility | We are able to adapt the system to customers needs | Customer stay technically up to date |
| New technology | We produce cutting edge systems | We introduce new technology whenever customer would like |
| Full offer | We are able to sell a full fledged system | Customer get everything from one provider |

Integration of subsystems

Master of the situation ...?

SIEMENS

Return on investment

What you can count ...

- Reduced insurance costs due to professional security concept
- Effective guards organization
- Charging of actual security services, internally or externally

Priceless ...

- 5 minutes – in case of an fire or intrusion alarm
- 10 days production stop in a car factory
- 10 km² contaminated next to chemical plant
- 1 minute delay in finding the next first aid in case of a heart attack
- 10 minutes access to your data for an industrial spy
- ...

Sales material for critical infrastructure

- Brochure
 - Flyer "ELS Mobile"
 - Product datasheets
 - Planning poster
 - Sales presentations
 - Short description
 - Case studies
 - Specification texts
- Demo version with Boston GIS data
 - Interactive movie
 - List of implemented interfaces
 - Reference list
 - White Papers
 - Articles
 - Etc.

Worldwide expertise and ready to sell

Engineered Solution

Software Development Kit SDK

Standardized interface to other systems: Allows independent project implementation

Incoming communication

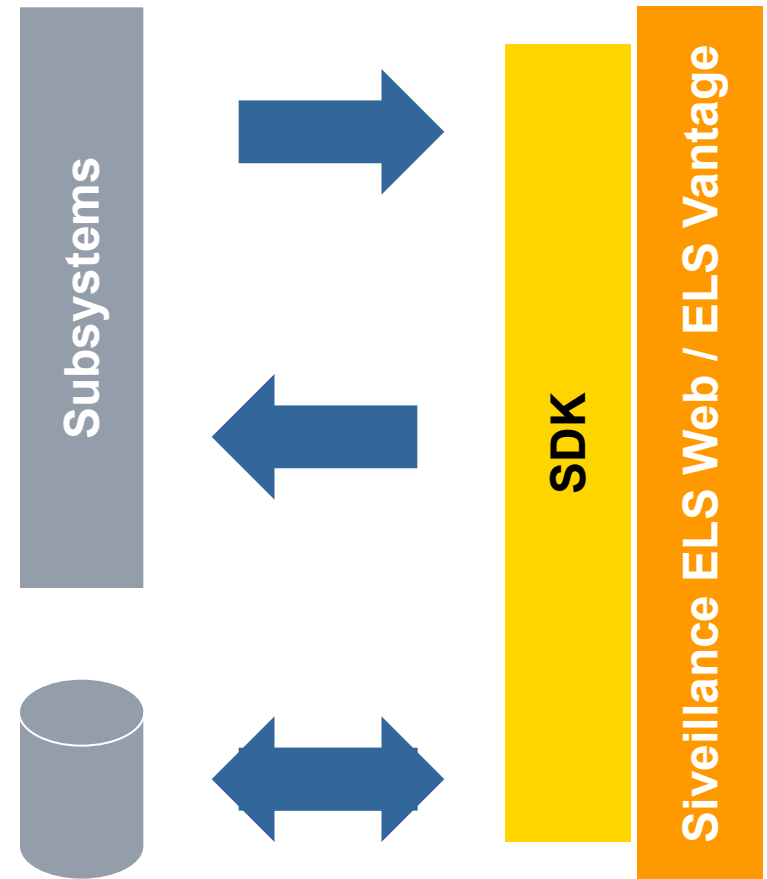

- ELS receives information on from subsystems
- Situational awareness

Outgoing communication

- Reaction to incidents
- Controls

Administrative Tasks

- Queries of master data

Implemented interfaces

Alarm / Subsystems

- CCTV Siemens IVM, Pelco, Plettac
- Access SIPASS
- Fire / Intrusion Bosch UGM / (VdS 2465), SM88, SIGMASYS
- Emergency calls Schneider Intercom, Sigenio
- DMS, others MSD4000, Netcom, GMA-Manager TOPSIS

Communication System

- Pager / email / SMS Rescuecall, SMSC, various SMTP / HTTP / email alarms
- CTI Hipath / Procenter, Cisco Call Manager, Frequentis
ILLProxy (Nortel), Thales Norumat, Alcatel-Lucent
- Analog radio Siemens VAS-B, Weda RCA, Carls (AG595, Dat855)
- TETRA EADS, Motorola, Rhode & Schwarz
- Voice recording Voxlog, ASC

Others

- Databases Herold, Safenet
- Video Walls Barco, Mitsubishi

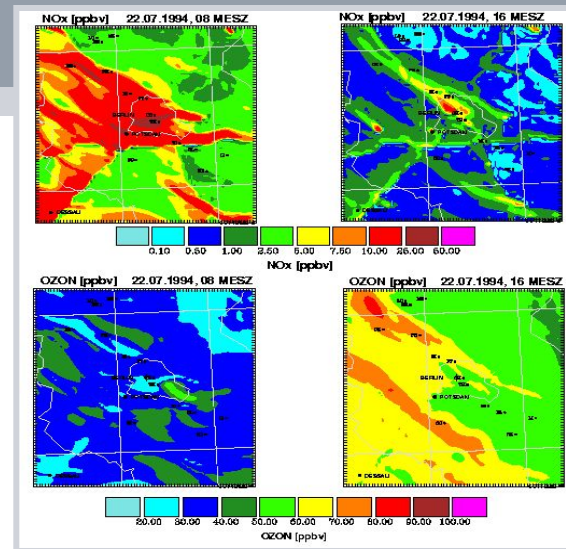

And many more

Implemented Interfaces

External program calls

- External programs can be started
 - Automatically through measures
 - Manually through links
- External programs will run with their own user interface in a separate window

Web Map Service WMS

- Interface to an OGC-compliant Web Mapping Service (WMS) for integration of fixed and dynamic maps stored in an external database
- WMS delivers real-time geo-references graphics in the requested resolution
