Akim of the region of  
Atyrau: Nogayev  
Nurlan Askarovich

Atyrau region is bordered in the west with Astrakhan region of Russia, north and northeast of West Kazakhstan region, in the east with Aktyubinsk region, in the south - with Mangystau region and the Caspian Sea.

## Climate

The Atyrau region has a very high concentration of continentality. The region is characterized by insufficient natural moisture, dry wind, dust storms, hot summers, dry summers, and snowy (or thin snowy) winters. The hottest month - July, the average air temperature is 24-25 ° C, the general heat is 35-40 ° C, sometimes more.

The average winter temperature is -8 ° C and -12 ° C. In winter, wind blows mainly east (south-east and north-east), intensity 6-7 m / sec. More than half of the annual precipitation is in winter.

An aerial photograph of a city, likely Astana, Kazakhstan, showing a wide river (the Irtys) flowing through the urban landscape. A prominent suspension bridge spans the river in the foreground. The city features a mix of modern high-rise buildings and lower-density residential areas. The text is overlaid on the image in a large, black, serif font.

The major rivers flowing through the region are the Urals (total length 2428 km, within Kazakhstan 1082 km), Zhem (712 km), Sagyz (511 km), Oyyyl (800 km). The largest lake of the region is Inder (110.5 sq. Km).

*Streets and squares with a rich history. They are located both in the city center and on the outskirts. Here are the best ones:*

## *Monument to Dina Nurpeisova*

Dina Nurpeisova is a famous composer and musician in Kazakhstan. Her mastery of dombra had no equal, and her works became a harmonious transition from the classical heritage of dombra music to modern art.

## Pedestrian bridge

pedestrian bridge  
was built across  
the Ural River  
in Atyrau. The  
bridge is 551  
meters long and  
is the world's  
largest pedestrian  
bridge. It  
entered the  
Guinness Book  
of World Records.
