

Digestive System

Digestive System

Components of the Digestive System

Alimentary Canal

Oral cavity

Esophagus

Stomach

Small Intestine

Large Intestine

Anus

Components of the Digestive System

Accessory Organs

Liver

Gall-bladder

Pancreas

Teeth

Tongue

Necessary Organs

▶ **Oral cavity**

It is the cavity of mouth, contains tongue, teeth and salivary glands,

▶ **Esophagus**

Muscular tube passing the food from pharynx to stomach

▶ **Stomach**

Muscular, hollow and dilated part of alimentary canal, secretes strong acid and enzymes for digestion of food

Necessary Organs

Small Intestine

Lies between stomach and large intestine, digestion and absorption takes place here, about 5 meters in length

Large Intestine

Second-to-last part of alimentary canal, main function is to absorb water from food.

Anus

Last part of alimentary canal
