# **Scientific and methodological support of pre-school education**

Performed: Sagatbekova A.S

Checked: Bigarimova D. E

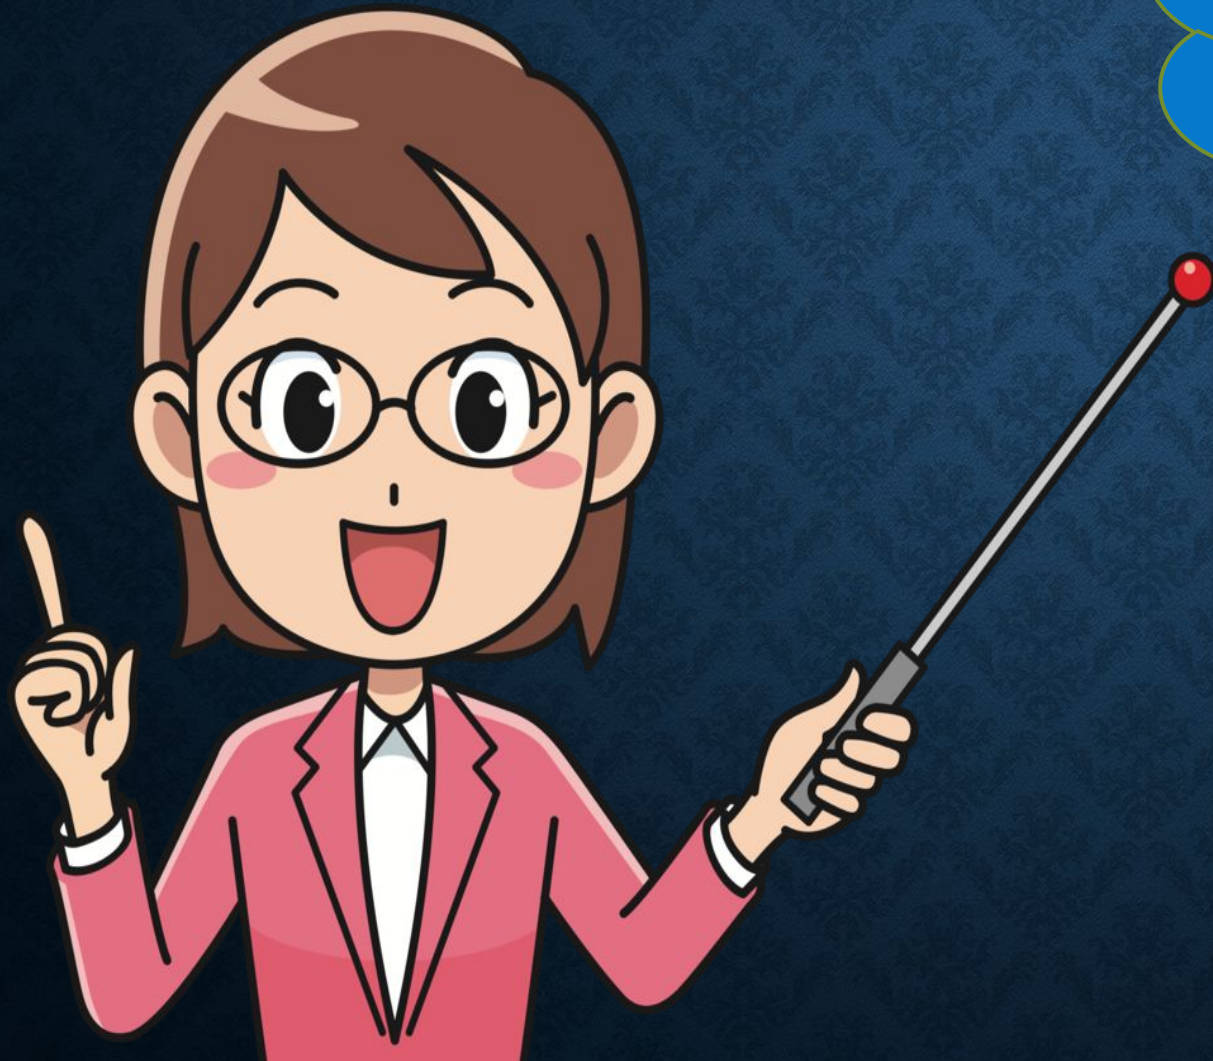

Sangynbekova E. R

DO-803

SCIENTIFIC AND METHODOLOGICAL SUPPORT  
providing the educational system with  
methodological, didactic and methodological  
developments that meet the modern  
requirements of pedagogical science and  
practice.

Sagatbekova A.S  
DO-803

Scientific and methodological support is essential for the rapid development of the education system.

Sagatbekova A.S  
DO-803

# Scientific and methodological support of preschool education includes:

1.1. Educational and program documentation of the educational program of preschool education;

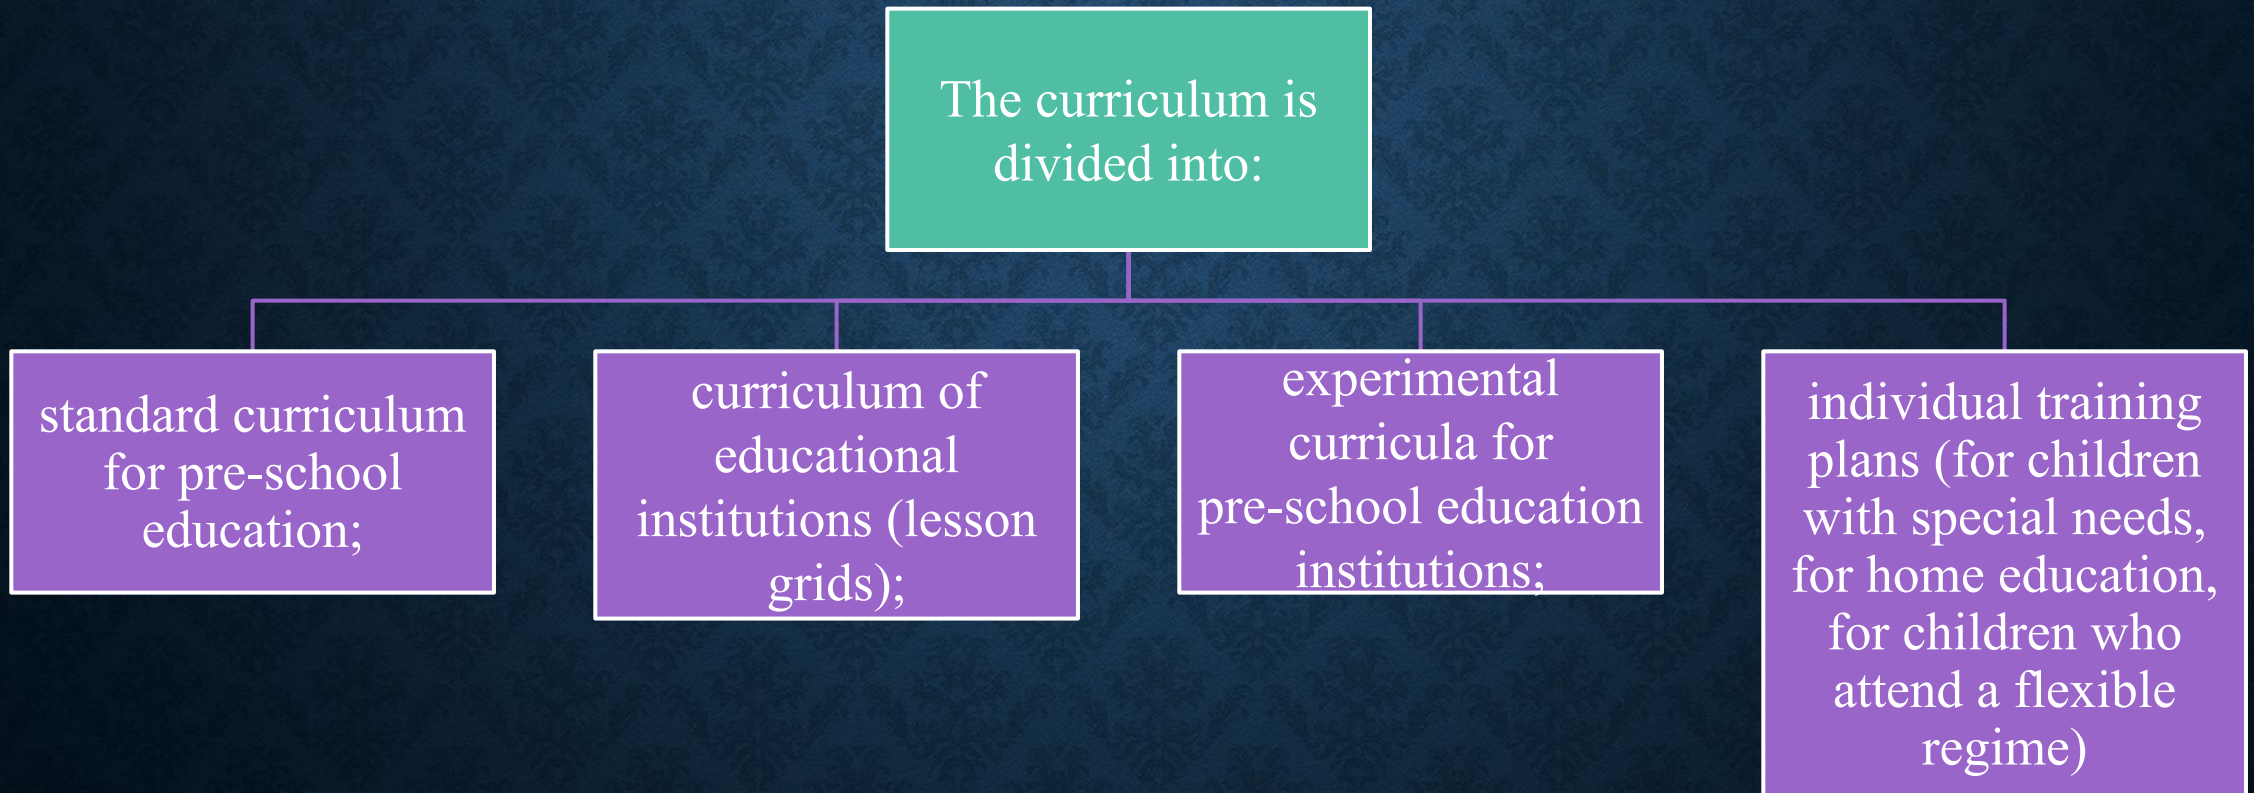

1.2. Software and planning documentation.;

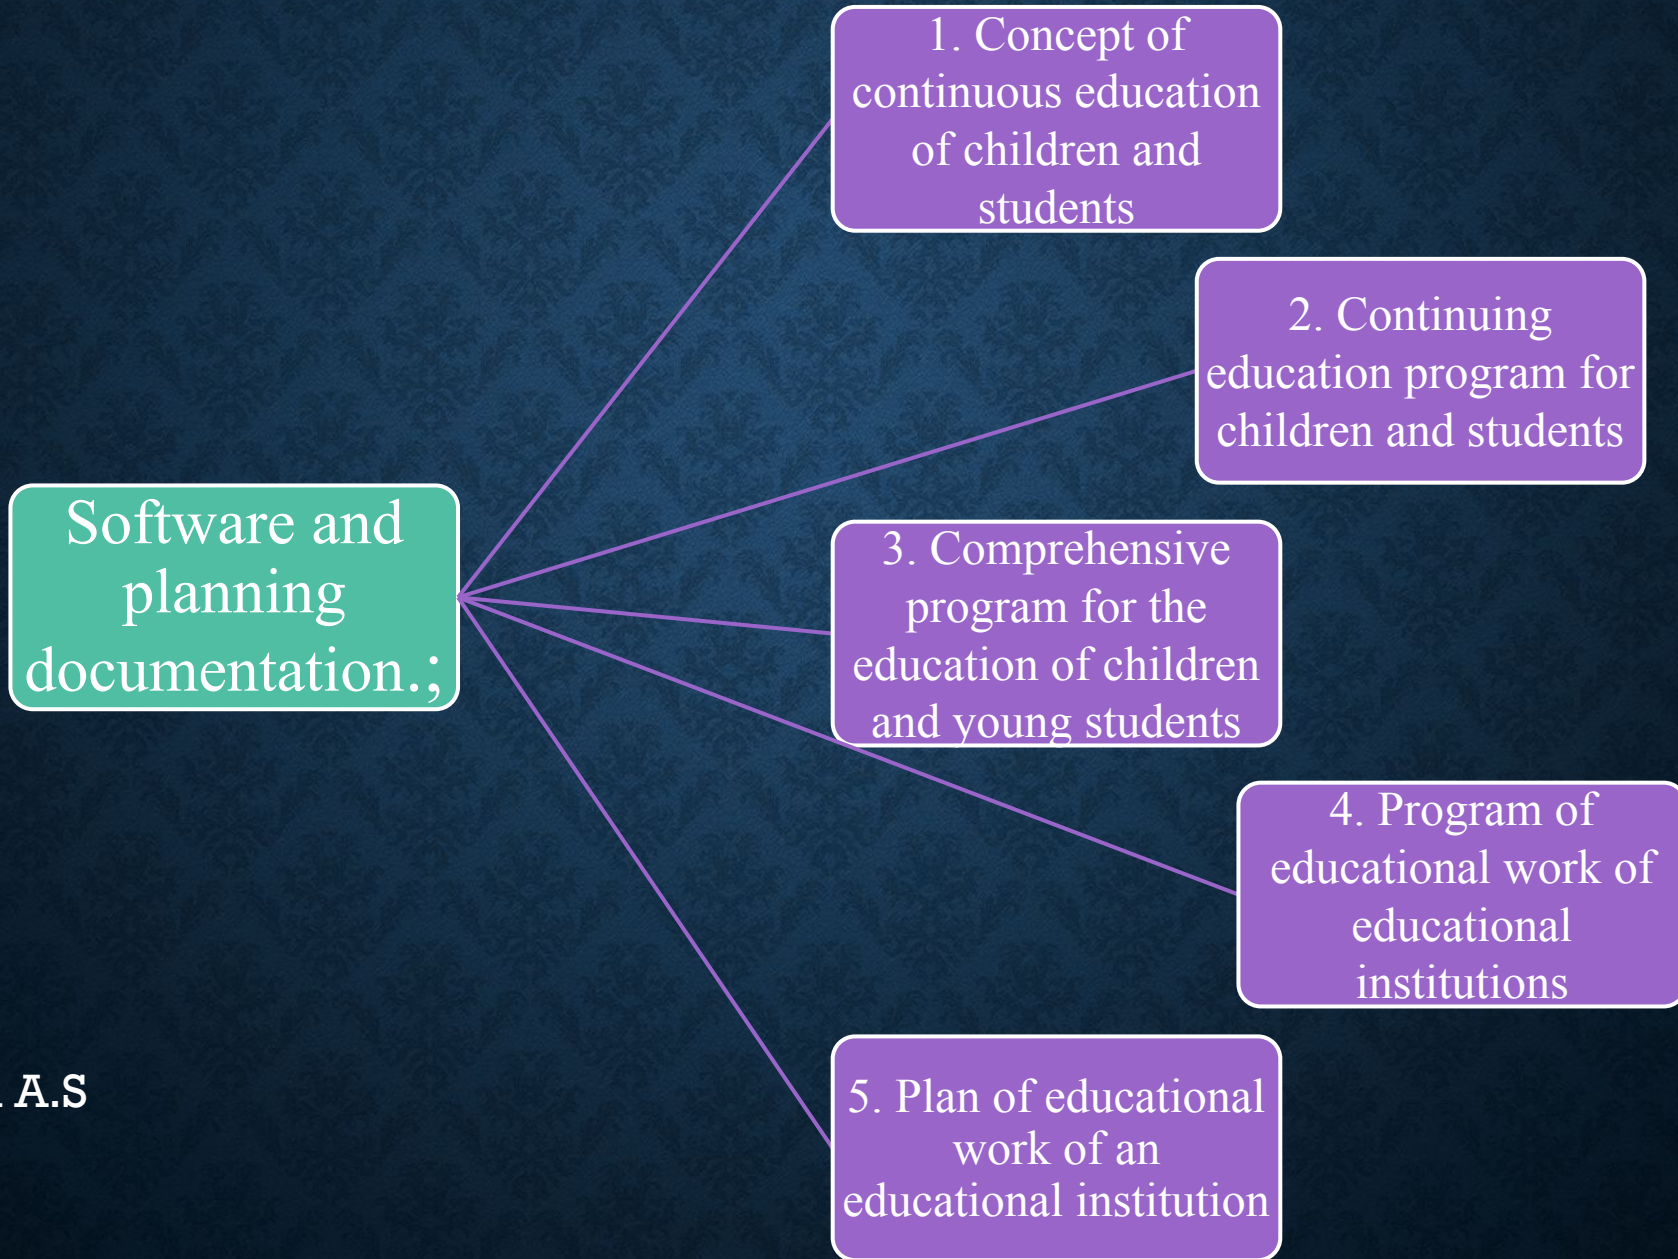

1.3. Educational and methodological documentation;

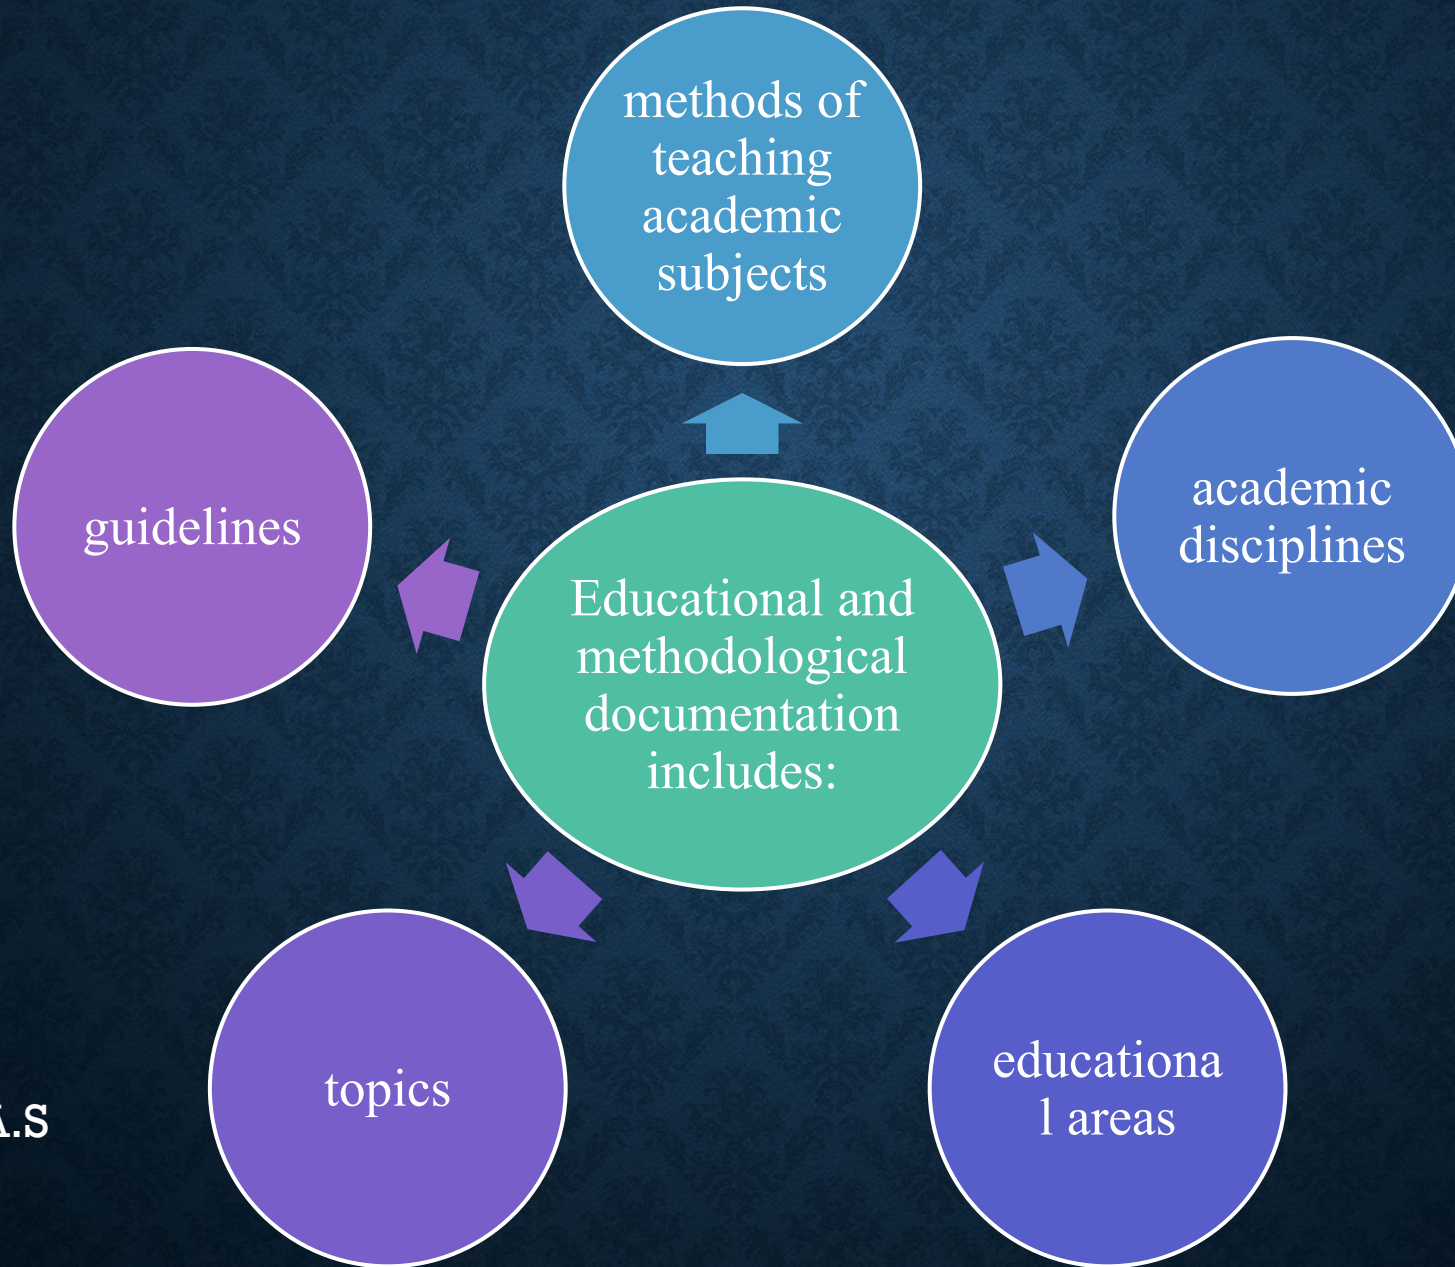

1.4. Educational edition;

1.5. Information and analytical materials.

The curriculum documentation of the pre-school education program includes the curriculum and curriculum of pre-school education.

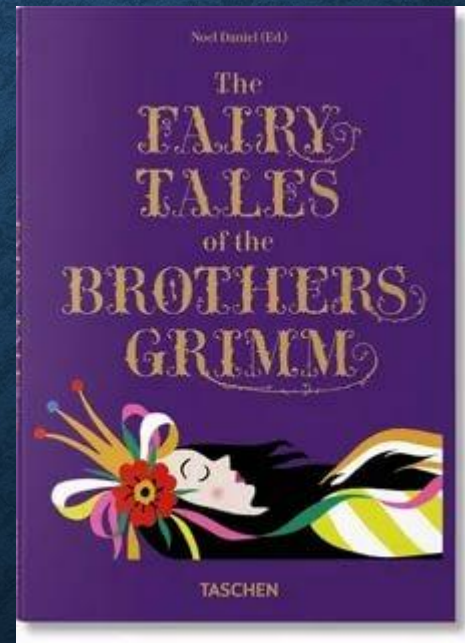

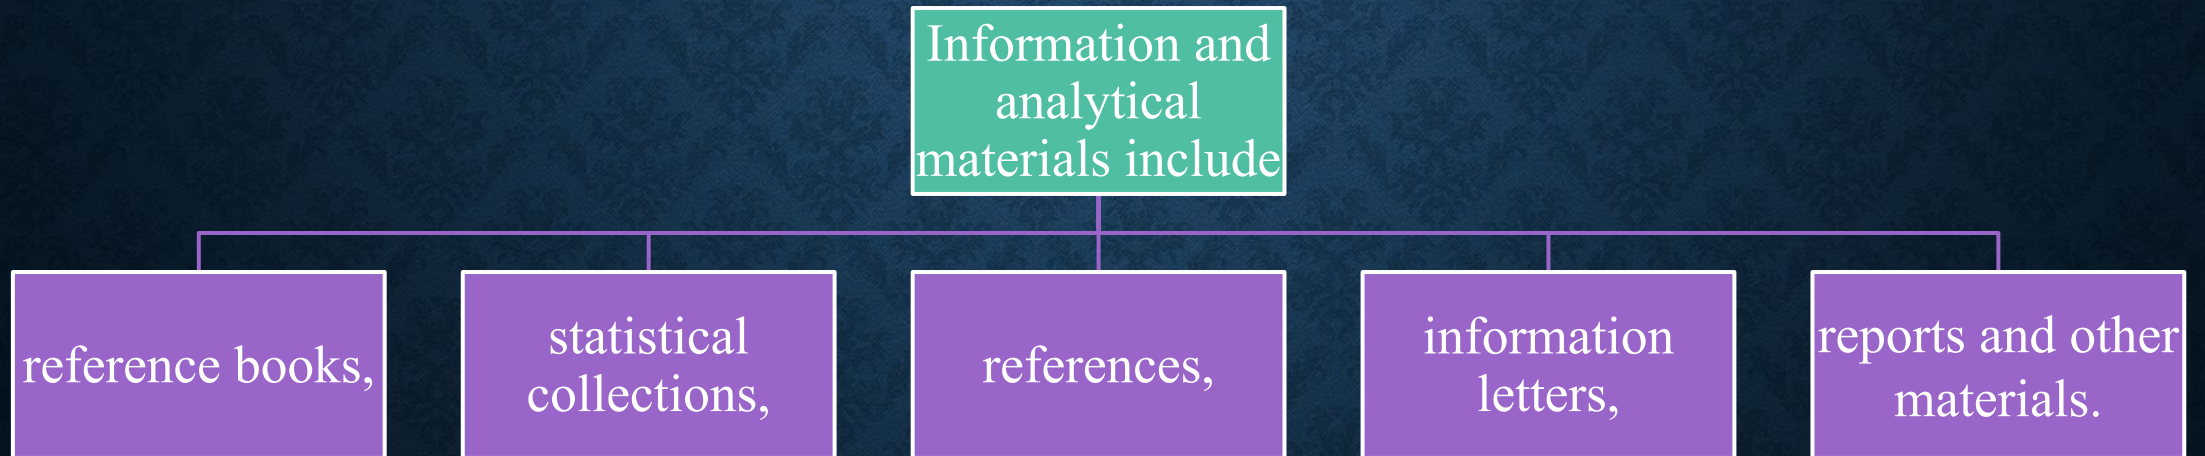

## EDUCATIONAL EDITION

literature, providing structured, presented in an accessible form, information of a scientific or applied nature and is designed for teaching and learning.

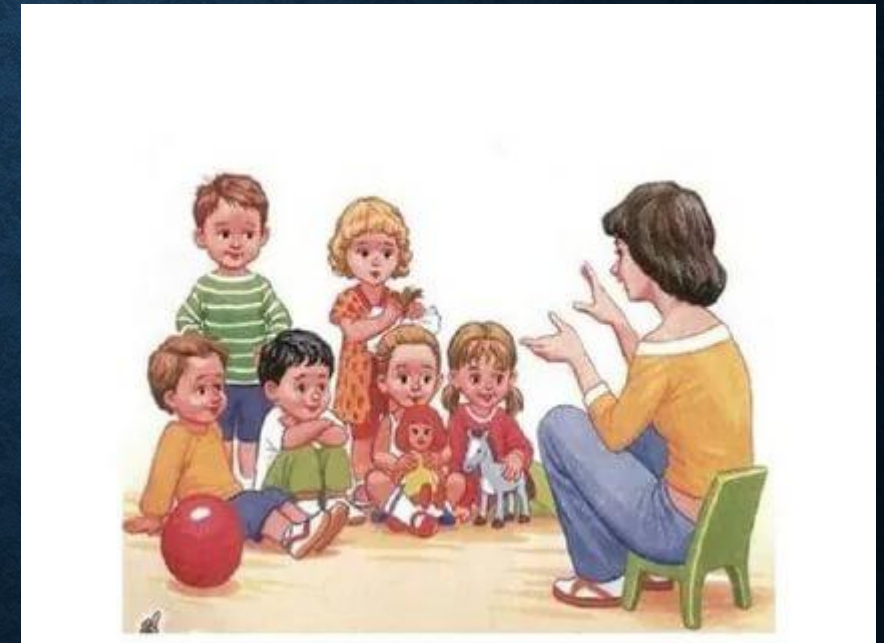

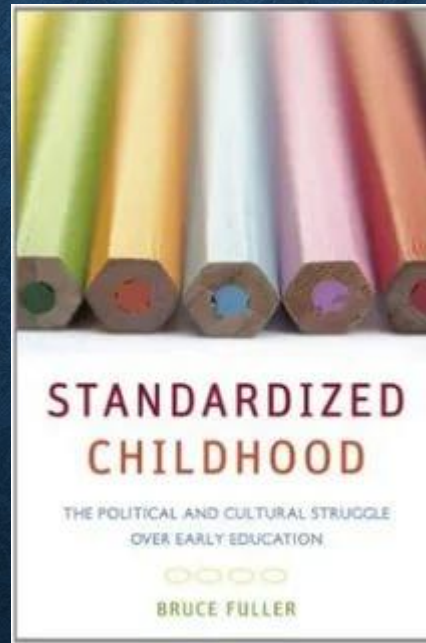

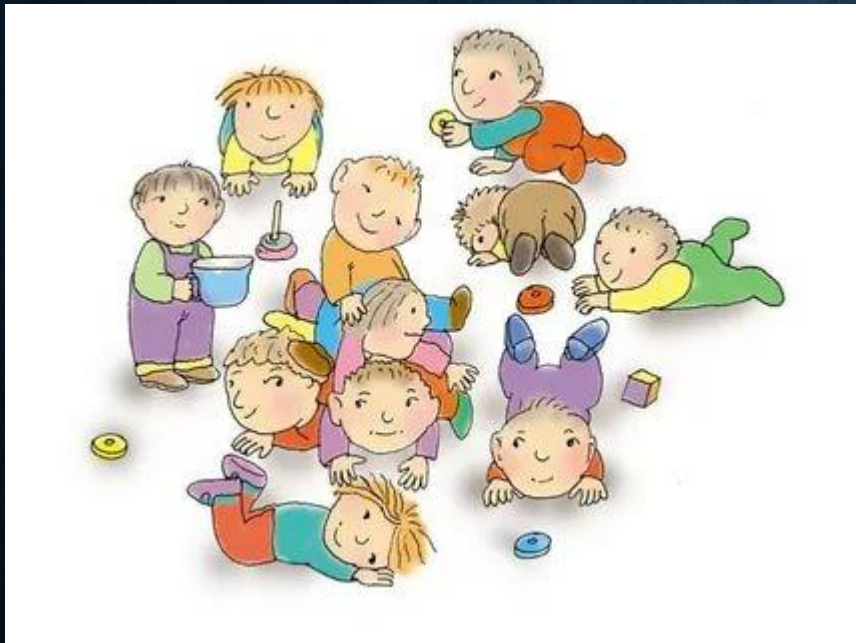

Information and analytical materials. Materials containing information, comparative information, and analytical information about the functioning and prospects of the education system.

The standard of preschool education is a system of requirements for the content of education and the level of development of children of each psychological age. The standard of education provides the basis for personal development and continuity in the transition to the next age period.

Sagatbekova A.S  
DO-803

Sufficiently good scientific and pedagogical training of specialists in the field of preschool education will expand the range of their professional interest - from purely methodological literature to new data of psychological, pedagogical and social research. As well as teachers who have become part of the path of innovation, they will contribute to the internal transformation of the system of training and education, which can guarantee its constant self-improvement and development.

Childhood is the most important period of human life, not preparation for the future life, but a real, bright, original, unique life.

Modern kindergarten is a "space for great opportunities", where the child is given the freedom of choice in self-expression, communication, and development directions.

# Thanks for attention
