

## Inspection, diagnostics and technical evaluation of trunk pipelines, site facilities and pipeline systems

Electrochemical protection systems for process pipelines

Buildings and facilities

Lightning protection and grounding systems

Tank diagnostics

Mechanical and process equipment, process pipelines

Power equipment

Electrochemical protection systems for linear pipeline sections

The following is issued at the end of inspection and diagnostics of facilities:

- ✓ Technical report
- ✓ Results of technical state analysis
- ✓ Technical evaluation report
- ✓ Estimated safe life based on defects identified
- ✓ Recommendations regarding the scope and options of repairs required including a cost estimate of the works under the proposed options
