

Nurly zhol

BRIGHT
FUTURE

Project

**Done by the student of the Faculty of
International Relations group 305
Nurgisaeva Aizhan**

Plan of the Project:

- **To tell about the Message of the President N.Nazarbaev –Nurly Zhol**
- **To express the basic idea**
- **To explain and to highlight each item of the Strategy**
- **To make a conclusion**

Message from the Head of State for the year 2015 will certainly go down in history as a strategic document aimed at ensuring the sustainable development of Kazakhstan during the global crisis.

Basic Idea

Aims of the Nurly zhol

- ▣ **New Economic Policy**
"Nurly Zhol" will be the engine of our economic growth in the coming years. Only 200 thousand new jobs will be created due to road construction. This means employment and income growth.

- ▣ **The core of the new economic policy will be the plan of infrastructural development, It is designed for 5 years and coincides with the Second Five-Year Plan implementation PFIIR which intend to participate more than 100 foreign companies. The total investment portfolio amounts to 6 trillion tenge, the state's share - 15 per cent.**

The plan and the
core of the
Strategy

ПАРТИЯСЫ САЯСИ КЕҢЕСІНІҢ
КЕҢЕЙТІЛГЕН ОТЫРЫСЫ

- Development of transport and logistics infrastructure. It will be implemented through the formation of macro-regions on the basis of hubs. This infrastructure framework will connect with Astana and interconnected macro-regions trunk road, rail and airlines from the radial principle

1 Item

Extract from the president's speech

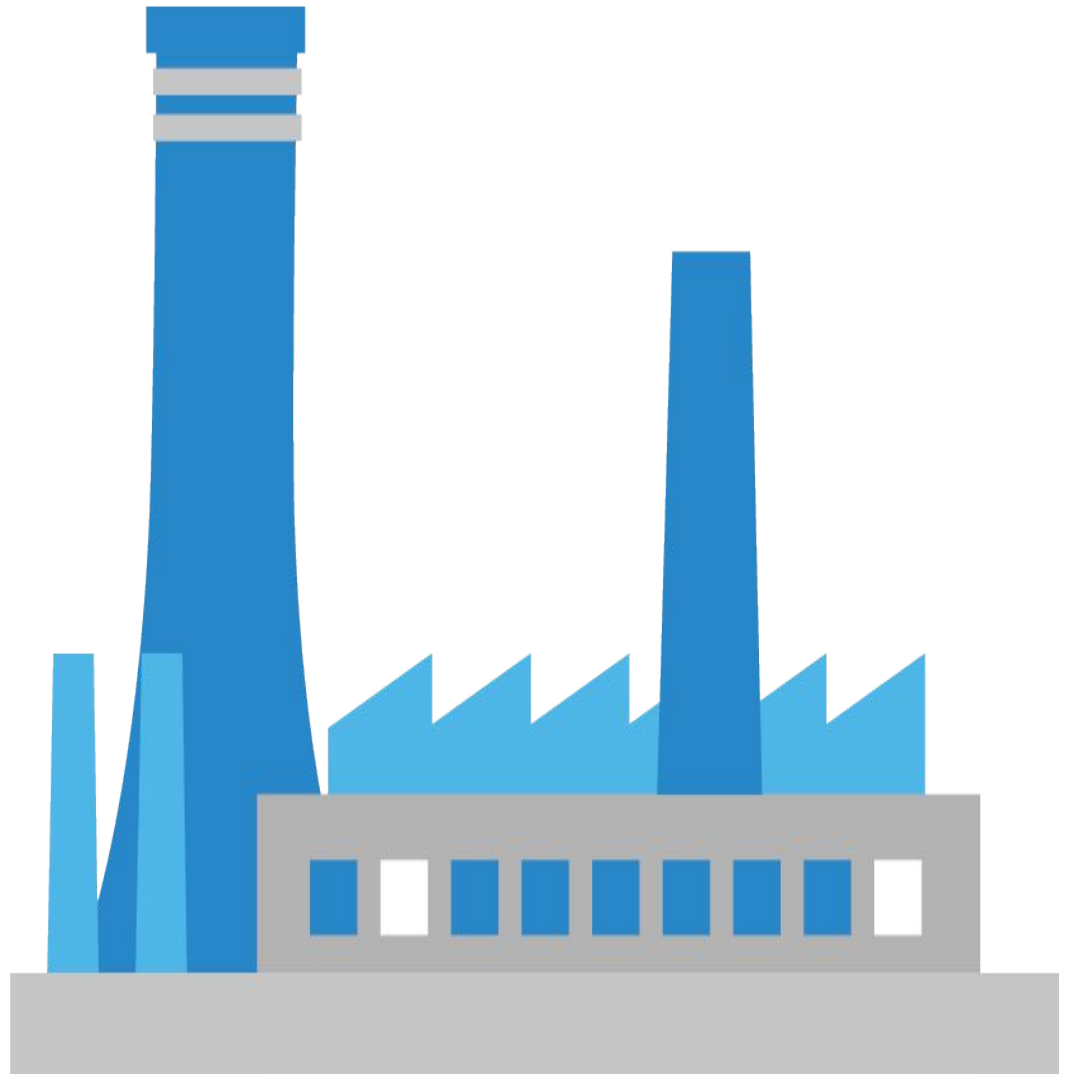

need to implement major road projects. This Western China - Western Europe; Astana-Almaty; Astana-Ust-Kamenogorsk; Astana-Aktobe, Atyrau; Almaty - Ust-Kamenogorsk; Karaganda - Zhezkazgan - Kyzylorda; Atyrau-Astrakhan.

1 item

- . The development of industrial infrastructure. The implementation of infrastructure projects will cause a great demand for construction materials, products and services for transport and communication, energy and housing and communal services.

2 Item

A separate area - the infrastructure for tourism. Their main advantage is the ability to create more jobs. Here, the creation of one job costing 10 times less than in industry.

- ▣ The development of energy infrastructure. In the energy sector over the past 5 years as part of the industrialization program of great work has been done. However, the limitations of backbone networks is the shortage of electricity in the southern regions of the country, natural gas - in the central and eastern regions.

3 Item

Energy
infrastructure

3 Item

Build a high-voltage lines in the directions of "Ekibastuz-Semey-Ust-Kamenogorsk" and "Semey-Aktogay-Taldykorgan-Almaty". This will create a balanced energy supply Kazakh power plants all over the country.

- **Modernization of infrastructure utilities and water and heat supply networks. The total need for investment is not less than 2 trillion tenge with annual allocation till 2020 from all sources of financing of not less than 200 billion tenge.**
- **Today is a big interest in investing in the modernization of housing and communal services are showing the European Bank for Reconstruction and Development, Asian Development Bank, Islamic Development Bank, as well as private investors.**

4 Item

Modernization of infrastructure utilities and water and heat supply networks

4 Item

To avoid a significant increase in tariffs, it is necessary government funding for such projects. In this regard, to accelerate the modernization of heating and water supply systems in addition to those already provided for in the budget it is advisable to send up to 100 billion tenge annually .

- **Strengthening the housing infrastructure. Formation of agglomerations accompanied by a significant outflow of population. This creates pressure on the labor market and urban infrastructure, including in the housing stock. Therefore it is necessary to revise approaches to the construction of rental housing. The state will build social rental housing and to submit it to the population in the long-term lease with option to purchase. Provision of housing directly, without intermediaries and for the lowest possible interest for the loan, will reduce the cost of its acquisition.**

6 item

- The development of social infrastructure. First of all, the decision of problems of emergency and three-shift schools of learning. This is one of the main indicators of our election platform.
- Another issue - the lack of kindergartens.
- As part of the industrialization program 10 universities identified on the basis of which will be provided between science and economy sectors and training. I charge the form of material and technical base of educational institutions, sending for this purpose up to 10 billion tenge until 2017.

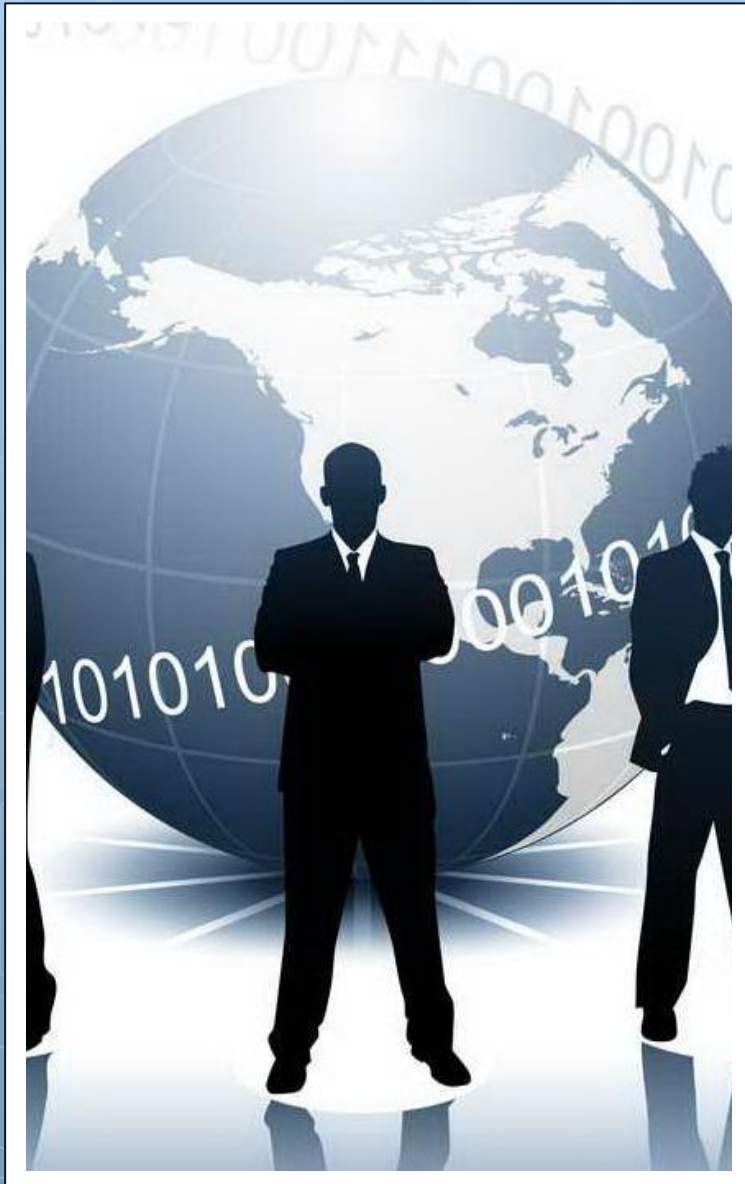

6 item

Development of the social structure

- support small and medium business and business activity. Today fully utilized 100 billion tenge from the National Fund to support and SME lending. This allowed the creation of 4.5 thousand jobs. Demand for these funds exceeded the offer by 23 billion tenge. Created unprecedented business lending conditions just under 6 percent for 10 years

7 Item

Support small and medium business

The key of success

- To pass a global test of maturity, we must be united. We must strengthen the trust between all the people of Kazakhstan! To be tolerant to each other! These are the keys to the future of Kazakhstan. Interethnic harmony - a life-giving oxygen. We do not notice it when we breathe, do this automatically - we just live. We must take care of our own unity and inter-ethnic harmony!!
