London Zoo

1826- The Zoological Society of  
London was founded

1828- it housed a collection of exotic animals.

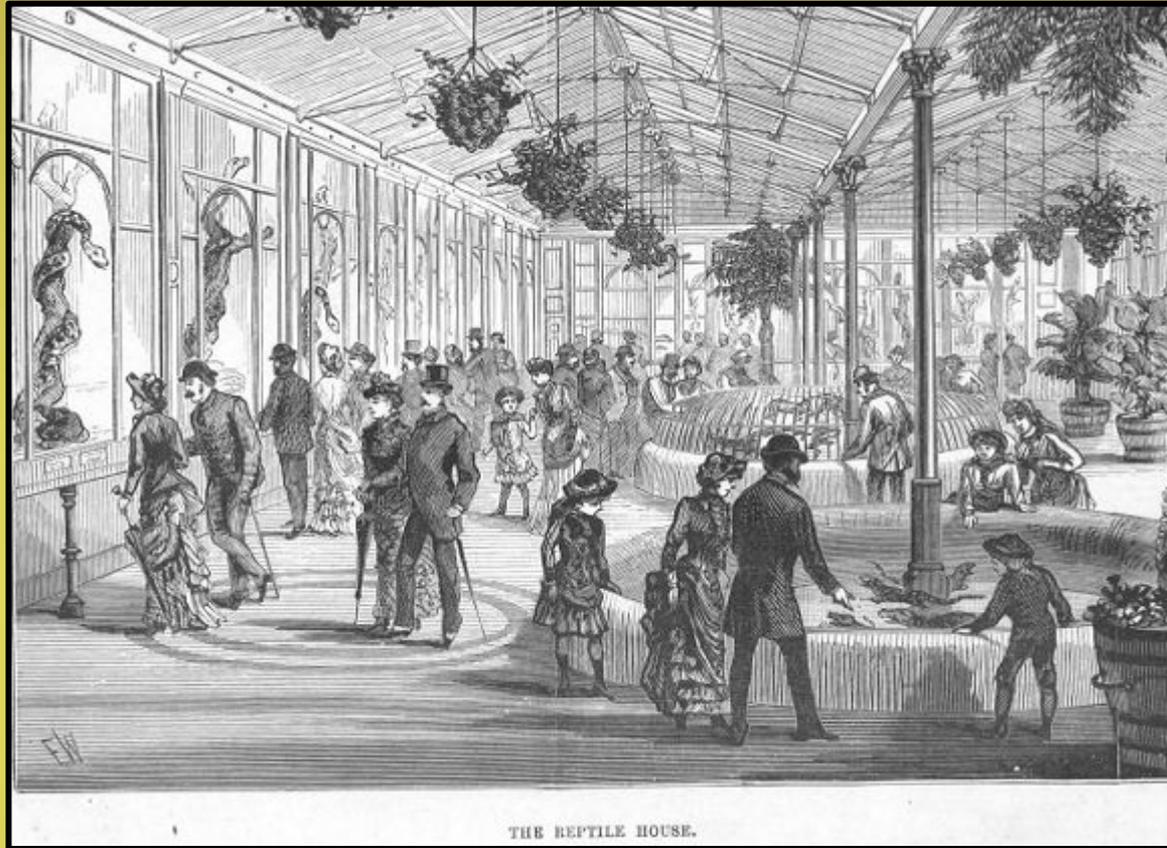

1830- The collection of animals was greatly enlarged with the addition of the royal menagerie from Windsor and the animals from The Tower of London.

1839- the first giraffes appeared in  
the Zoo.

1847- The Zoo opened its doors to the public.

1849- The Zoo opened the first Reptile House.

# Reptile House

1850- In this year the Tsar of  
Russia presented two bisons to the  
zoo.

1853- The first public Aquarium  
was opened.

1880- In this year the first koala bear arrived to live outside Australia.

1881- the first Insect House was  
opened.

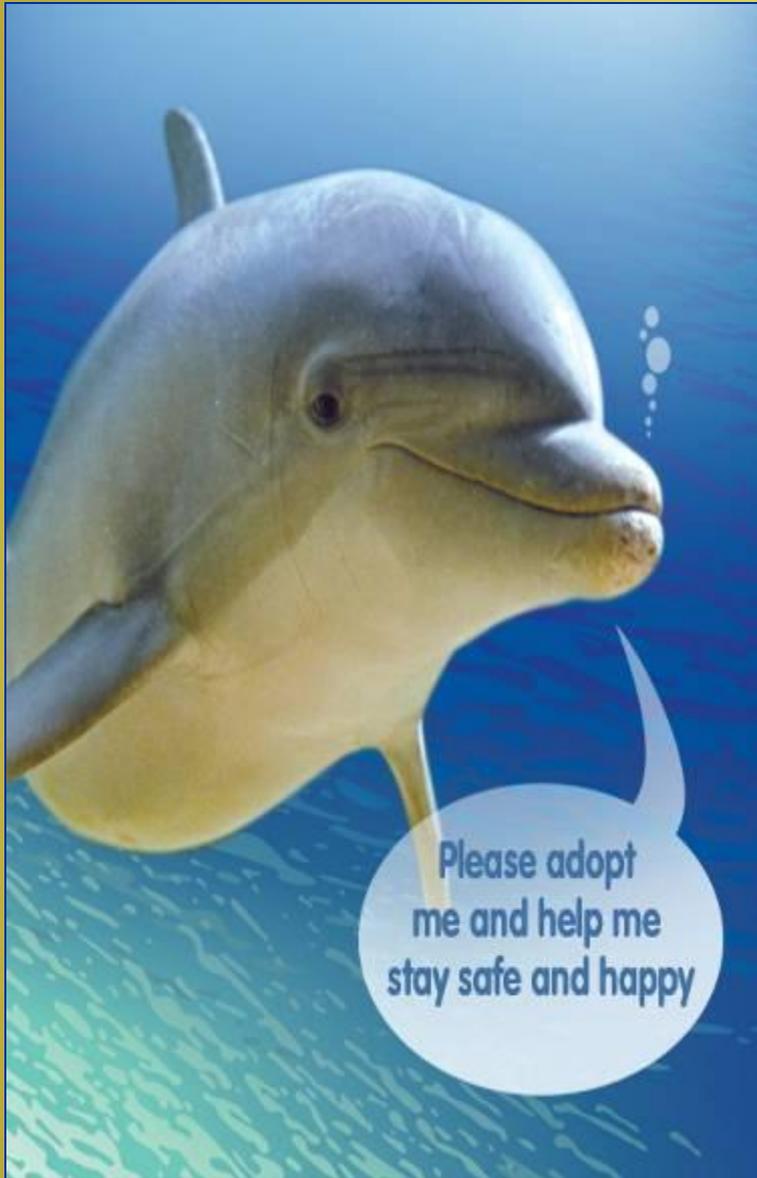

More recently, the Children Zoo was  
opened

- The word "giraffe" comes from an arabic word 'zirafah' which means "the tallest of all".
- Giraffes live 20 to 30 years
- Giraffes can go for up 2 weeks without water
- Giraffes only sleep for a few minutes at a time. Sitting on the ground, they bend their long necks down
- It takes 14 to 15 months for a baby giraffe to grow inside its mother`s body

The elephant is the largest animal that lives on land. Elephants have larger ears than any other animal and their tusks are the largest teeth. An elephant's nose is called a trunk. A lot of things can be done with the help of a trunk. An elephant is a nice animal, strong and friendly. It leaves grass and green leaves ( about 300-400 kilos a day) and elephants can drink 150-200 liters of water. They are very playful in the water and wonderful swimmers. The elephant is the most intelligent animal next to the dog and it has a very good memory.

- Dolphins are very intelligent. They love to play with people. Most dolphins eat fish. Their brain is very big. They have a very good feeling to be helpful. They have a very good experience of communicating with people. They give birth to their babies which are born with opened eyes, under the water. Dolphins can jump out of the water, play with the ball, dance and do many tricks.
