COMMENT

This movie was created with big love to the magic world. The amazing scenery and costumes let the audience believe in the existence of the school of witchcraft and wizardry. And of course everybody who watches this fiction film notice fantastic special effects. There is it's used in every episodes especially in fight scenes in the movie. Special effect doesn't distract from the plot but adds it. Music demands special attention. This fascinating music create mood for this movie. It helps remember important moments among frequently changing actions. "Garry Potter" becomes classic of fantasy. There are friendship triumphs evil and faith in the good qualities of a person kills all difficulties in the movie. That's why it attracts many fans.

RECOMMENDATION

Last time I saw this series a long time ago, in school. Then, in the "pottermania", CDs were passed from hand to hand and watched with much pleasure. Due to attempt to read this book fast, to find a solution, to make sure that their favorite characters okay, I missed a lot. Rereading the book now, I realized how much nuances, details and little things that constitute the beauty of the story about the boy who survived was missed by me. With each watched film you begin to understand this brilliant plot, his wonderful design and the genius hand of the author. No one name came out from nowhere, none of the storyline was left dangling. All the characters are lovingly written and true to themselves that I really appreciate in this series. A few mistakes I noticed, but the enormous work done by the author, can not fail to impress. A wonderful film filled with deep meaning, worth to be watched. When my child gets older and asked for advice, something to watch, I know that I will answer to him.
