

**MONEY**

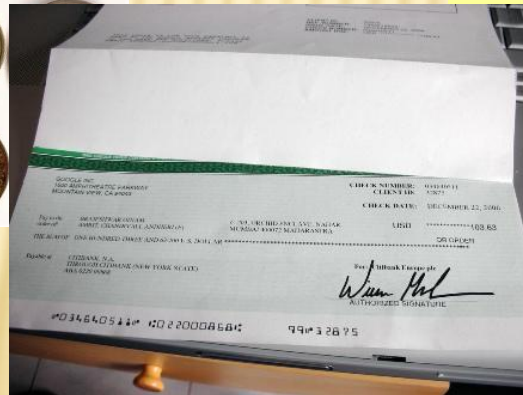

# The history of money

---

**The first paper money appeared in China in 1024. Today it is widely used across the world.**

Today we pay with coins,  
paper money, cheques, credit cards or  
traveller's cheques.  
In other words we pay cash, by check or by card.

**Money doesn't buy happiness but it helps.  
Money has become one of the main things  
in our modern life.**

**A person can't be happy if he has no  
money to satisfy his natural needs.**

**But I think that money should have a limit.**

**A person shouldn't have  
too much money. It begins destroying him  
and becomes his curse.**

**"The love of money  
is the root of all evil"**
