

RESEARCH

Japan is a country prone to a large number of natural disasters: cause and consequences.

WE CHOOSE A RESEARCH TOPIC.

Japan is a country prone to a large number of natural disasters: cause and consequences.

WE FORMULATE THE GOAL AND OBJECTIVES OF THE RESEARCH WORK .

Aim: to study the problem of disasters in Japan.

Objectives:

1. to give a definition of natural disasters around the world.
2. to find out the most dangerous natural disasters in Japan
3. to identify the most frequent disasters in Japan.
4. to learn why there are so many natural disasters on the territory of Japan.
5. to learn if it is possible to prevent or stop a natural phenomenon.
6. to find out how the Japanese act during and after emergencies.

**WE ARE WORKING ON THE CONTENT OF
THE STUDY.**

WE DRAW CONCLUSIONS, SUM UP THE RESULTS.
