Children's Dentistry Brisbane QLD

- At [Smiles Dental](#) Care, we understand the needs of our younger patients and do everything in our power to ensure they have a positive experience while we provide the best dental care possible.
- Our team members will provide a relaxing and stress-free experience for you and your child.
- Our office is equipped with the most advanced technology and equipment to ensure that you achieve high quality service and results.
- Together we can make sure that your child has the healthiest smile possible.

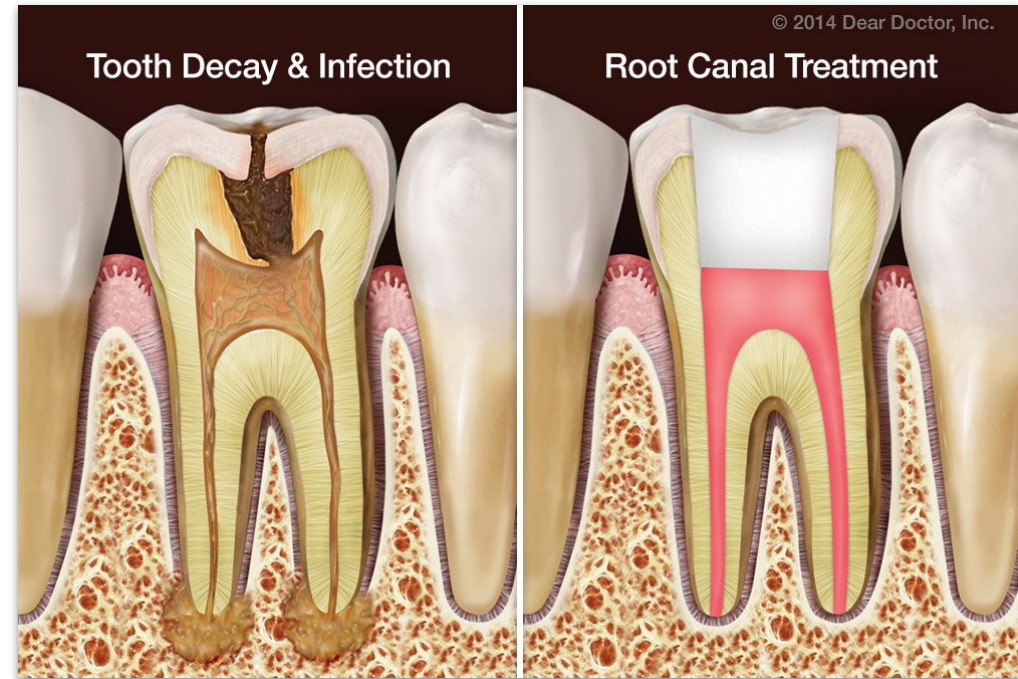

Dental Implants Brisbane QLD

- Replacing missing teeth is not just about improving the appearance of your smile – there are many health benefits to replacing a missing tooth.
- If you have a gap in your mouth, surrounding teeth

Root Canal Brisbane QLD

- Smiles Dental Care performs root canal therapy, a procedure to remove dead tissue and infected pulp from inside an affected tooth.
- If left untreated, the pulp can die and the resulting infection can form an abscess in the jawbone
- If this infection spreads further it will result in swelling, severe pain and could be life threatening
- This is why root canal therapy is necessary to seal off the infection and prevent further issues.
