

Veggie Heaven

Arseniy Vasilchishin and Andrey Baev

The background image shows a contemporary restaurant interior. A curved bar with a green floral mural above it is the central feature. Large, metallic, dome-shaped pendant lights hang from the ceiling. In the foreground, there are wooden tables and chairs. A dark semi-transparent overlay covers the bottom half of the image, containing the text.

Introduction

- In this presentation, we want to give a Mexican and Chinese food restaurant recommendations for improving the quality of the restaurant itself and improving the cuisine in particular.

FIRST RECOMMENDATION

- To diversify the menu, as well as to overcome the problems of too many visitors, we suggest using a modern solution and dividing the menu into a menu for dining in a restaurant and takeaway food , and perhaps in the future it is also worth integrating a food delivery service , thereby it will be possible to increase the potential range of customers!

SECOND RECOMMENDATION

- I think the problem of menu confusion can be solved by creating an informational design solution on one page and the Vegan menu on the other, and creating an intuitive design so that you can understand everything at a glance.

THIRD RECOMMENDATION

- We recommend that you do not use pre-prepared sandwiches to avoid problems with the shelf life , and cook immediately after the order , if this is not possible, then put a defrosting sheet and dilute the products until intensive. And so, keep them in the freezer.
-

FOURTH RECOMMENDATION

- This restaurant has very good drinks that customers love. It is worth paying more attention to this product and promoting it more.

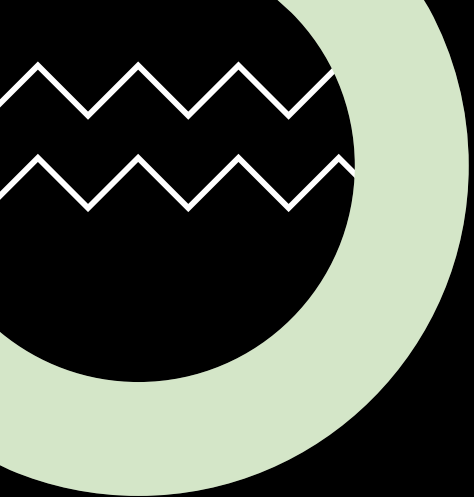

FIFTH
RECOMMENDATION

- To reduce the time of guest service, we recommend using an effective staff arrangement so that everyone performs their task, if this still does not help, it is worth attracting more employees in order to increase the number of workers.

SIXTH RECOMMENDATION

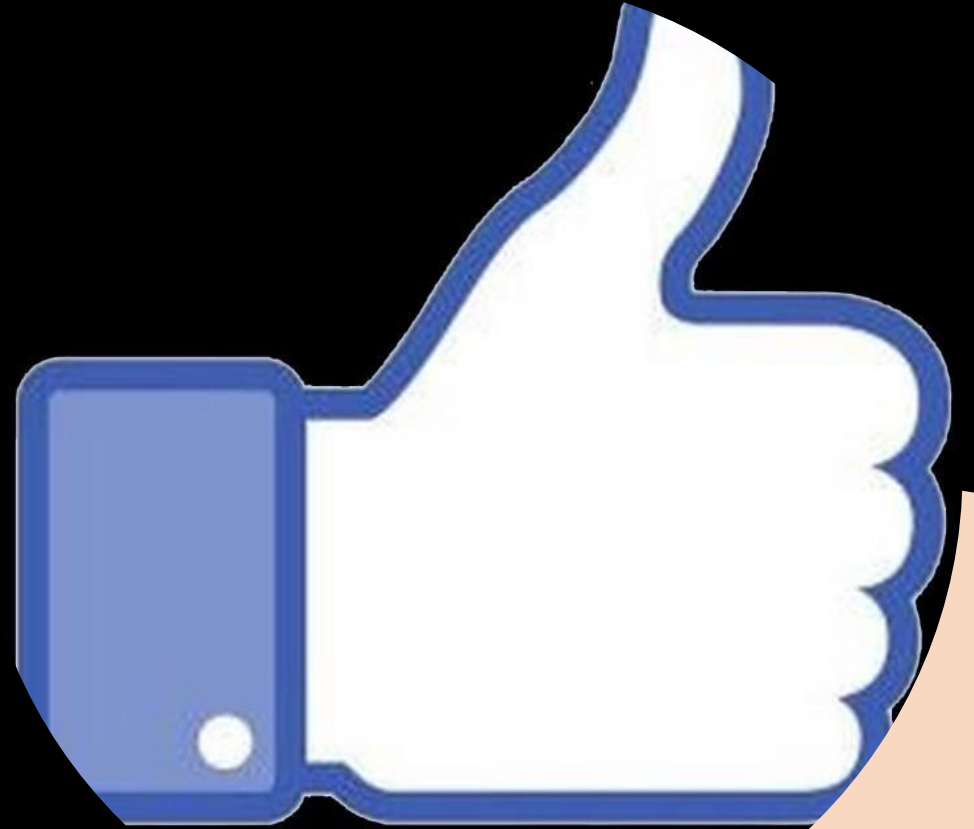

- And the last thing is to diversify the menu, it is worth remembering that the vegetarian menu is not only rice, there are a huge number of dishes of different nationalities, so when making a seasonal menu, you should pay attention to them.

CONCLUSION

- We hope these recommendations will help to improve the quality of food and customer's opinion about this restaurant.

THANK YOU FOR
YOUR ATTENTION
