2 step - scientific information

Cats are very popular in Russia. They are the most popular pets in our class too.

Cats descended from African wild cat and became domestic animals thousands years ago. They have got 4 legs, 2 small or large ears, a short nose, blue, green or grey eyes. They can be long-haired or short-haired. Cats can mew. They are very clever. Cats are very independent and can defend themselves. They love their homes, but not their owners. During a day cats like to sleep, but they like to hunt at night. Cats like to eat fish, cream and to drink milk and water. There are many breeds of cats: long-haired cats (Persian cat), short-haired cats (British cat), Turkish Angora, etc.

Essays

My name is Nastya. And I have got a beautiful cat. His name is Kusia. He has big orange eyes, black ears, a long tail and a short neck. He's grey, orange, white, brown and black. My cat is very beautiful and clever. When he was a little kitten he jumped very high, but he didn't run fast. He was a nice, and fluffy, and funny kitten. He loved playing with my toys and me. Now he's a big cat. Every summer we take our cat to the country. There he hunts mice, birds and lizards. All the nights he spends outdoors. My cat is not very kind, but everybody is fond of her beauty and intellect. Kusia likes to sit at the window-sill and look at the flying pigeons and other birds. I love Kusia very much.

Limericks

There once was a cat named Pat,
Who didn't know where he was at,
He looked up and down,
And then turned around,
Ran into a wall and went splat!!!

He is very nice and fat.
He is very good
He likes some food,
My cat is very clever and red.
