

Environmental Protection

Подготовил студент 27-ОПУ-18

Соколов Иван

Man and Nature

- We all live on planet Earth. Humans are part of nature. As part of nature, we must take care of the environment and other animals, not destroy wildlife.

Nature on Earth

- There are many big and small rivers, green forests, high mountains, lakes and seas.

But the problem of environmental pollution is the
question of the day

Environmental Pollution

Threat to Animals

- Environmental pollution is destroying many species of animals

We must be care!

To
solve environmental
problems we should:

Take as much rubbish as you can to local recycling centers. Help to clean up your local environment with your friends

Before you buy anything, ask yourself if you really need it.

Walk or cycle whenever possible.

Never drop litter.

We should protect
nature because it is
our home!
