

GreenPeace

History of creation

- Greenpeace team was founded in 1971

The first battle of green peace

- 1970s - Campaigns against commercial whaling.

What did Greenpeace do

- Greenpeace activists maneuvered in small inflatable boats between ships and animals, which were aimed at by harpoons, covering the giants with their bodies.

The results

- In 1986, Greenpeace secured that the industrial whaling law came into force.
- In 1994, the Antarctic sea zone was declared a whale sanctuary.

More about Greenpeace projects

- Greenpeace launched a campaign against genetically modified food.

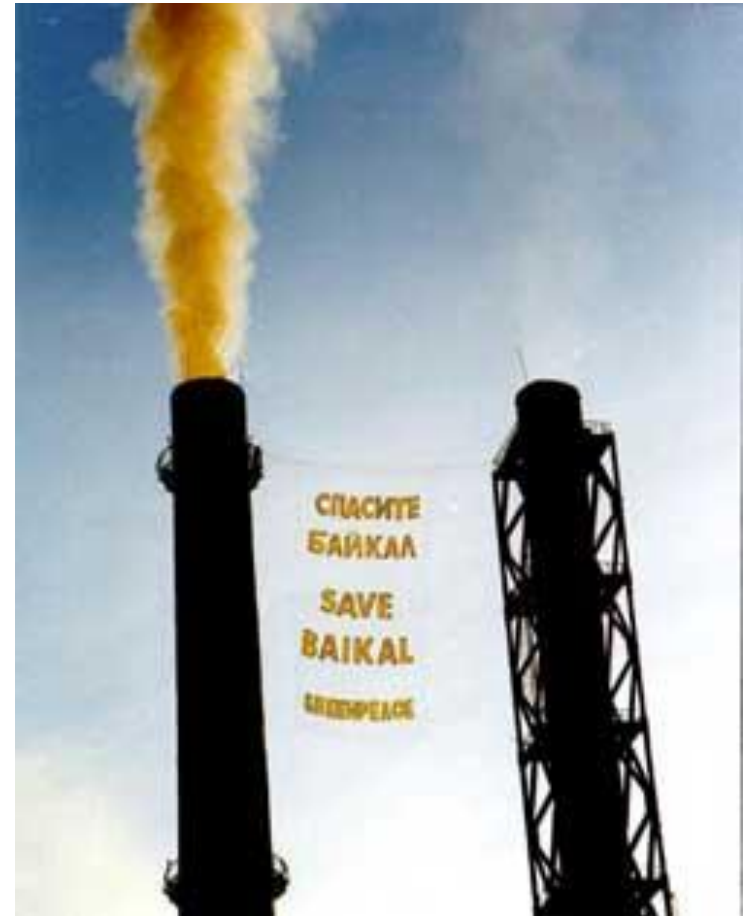

The result

- In 1999, the EU government established a moratorium on the import and cultivation of genetically modified crops.

Green Piece in Russia

- In Russia Green Piece has 10 project today.

Conclusion

- I think Greenpeace is a great organization. First, she is independent. Secondly, she does not just talk, thanks to her many enterprises were closed, products became GMO-free, they closed many logging sites and illegal hunting for animals.
