

A HOSPITAL FOR PEOPLE WHO ARE MENTALLY ILL

Syagin Misha

- Many people are afraid of losing their minds and getting to a hospital. But the question is if mentally ill people are understand what is happening to them. It is a well known fact that they aren't aware of the fact there is something wrong. That's why hospitals for mentally ill people exist.

- However, some people claim it is unethical to put anybody there. Many patients in those hospitals aren't dangerous for society, but some are. They need to be treated properly and it can't be done at home.
-

Doctor who helps mentally ill people

- Psychiatrist is a special doctor, who helps to deal with patients and gives them medications. It is a very respectable profession, as its purpose is to help people and society.
