Audiobook are a road trip's best friend. It gives your mind something to do while your eyeballs focus on keeping the car on the road, and a downloaded file will not fritz out in the middle of nowhere, unlike radio stations. You can get audiobooks on tape or CD, but they're bulky and a bit of a pain to manage. Why not listen to them on your phone? If your car doesn't have an auxiliary audio jack or **Bluetooth** for plugging into your **phone**, you can get a mini **FM adapter** or a **cassette tape adapter**. If your radio is on the fritz, you can also use a portable mini speaker. Audiobooks are also great for joggers or bikers.

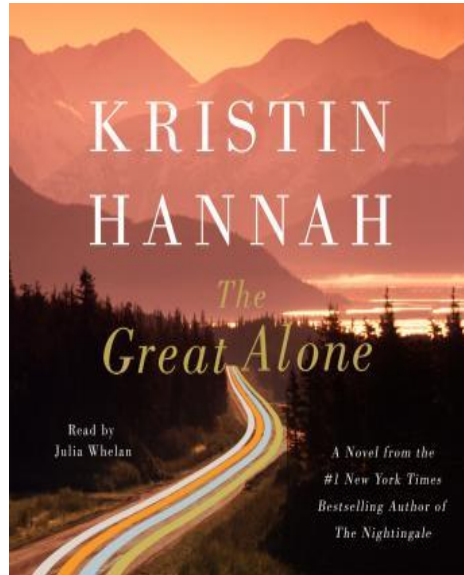

Ok, so we love audiobook. How do you get those audiobooks into your phone? A number of ways, depending on the quality you desire and the amount you're willing to spend.
