Sabantuy It is a celebration of the plough. Sabantui has no exact date . it takes place at the beginning of summer, after the first haymaking. Initially the festivals are arranged in villages , followed by sabantuy in rural districts , and the final ones taking place in major cities.

Our grandparents always tell us about history of this festival . Earlier people believed that owing to this festival they would have a good harvest.

The Tatar wrestling is the main competition of Sabantuy. Wrestlers use towels and the arm to knock down the opponent . In our village all boys take part at this competition to find out their power.

The winner becomes the hero of Sabantuy. The prizes for him are very expensive, like a TV-set or a car. But the main present is a ram.

Sabantuy takes place on the maydan, which would usually be located at the edge of a forest.
