Join Us, Joint Wellness

## Profile

The upcoming new lines of home used fitness equipment is our another bright spot, which will be a perfect combination of the advanced design and excellent technology. We will keep the pace of the top fitness brand in the world. It is our goal to create a world famous fitness brand.

Along with the development of our company, JW Sport is leading the advanced design and excellent technology as our guidance, high quality management talents as our backstopping, reliable quick service as our guarantee, efficient communication with customers as our bridge, to make the substantial progress and proud achievement in the global market.

We always follow the tenet of "Spread the health concepts, market-oriented development, technology-based design" ; attempt to achieve goals in the fitness field development, innovation and breakthrough; R&D new products to meet people' s health needs.

The more people enjoy a wellness life, the better the world will be. JW Sport pursues in integrity, excellence, health and good services. Our mission is to inspire more people to embrace wellness. Join us, joint wellness! JW Sport is a high-end brand of MBH Fitness Industry Group, aiming to provide the world' s premier fitness products. Now we are setting up a new industry base with a 600 million RMB investment, covering an area of 86, 000 square meters, with the building area of 60, 000 square meters as the establishment of the new brand, speeding up the pace to reach our company's long-term development strategic goals. The new enterprise group business will extend to all the provincial capital and secondary cities in domestic, as well as more than 70 countries and regions in overseas. We are the enterprise who is specialized in a whole line of the fitness equipment's R&D, production and marketing services.

Ten years of fitness industry experience, technical advantage and the cohesion is a foundation of our success. JW Sport in 2012 will raise our starting point, much closer to the market requirements. We are not only facing the domestic market, but have been entering the international market. Now our products are exported to more than 70 countries, and we will keep expending the market share in the world.

## Advantages

### R&D

We have our own R&D team, follows the world trend, and launches 2–3 new series every year.

### Raw Materials

In order to improve product quality, we purchase high quality materials for processing and production, and strictly control the quality. Such as: high quality imported steel with 3mm thickness; German running belt on treadmills; One-time molding upholstery on strength equipment, which will be never deformed or collapsed; and high-strength cable which have passed rounds of destructive tests, etc.

### Production Process

We own the most advanced manufacturing machines, including the laser cutting machine from Germany, robot welding equipment from Japan, CNC bending machines, CNC machine tools, CNC milling machines etc. The production process is at an absolute leading position in China. Such as: advanced sand blasting process, leaving no blind angle, no rust; excellent surface treatment, adopting international advanced electrostatic powder coating process, 2 rounds powder coating to ensure the appearance of the equipment smooth and durable; mold assembly is adopted in the production line to ensure the interchangeability and stability of the products.

### Quality Inspection

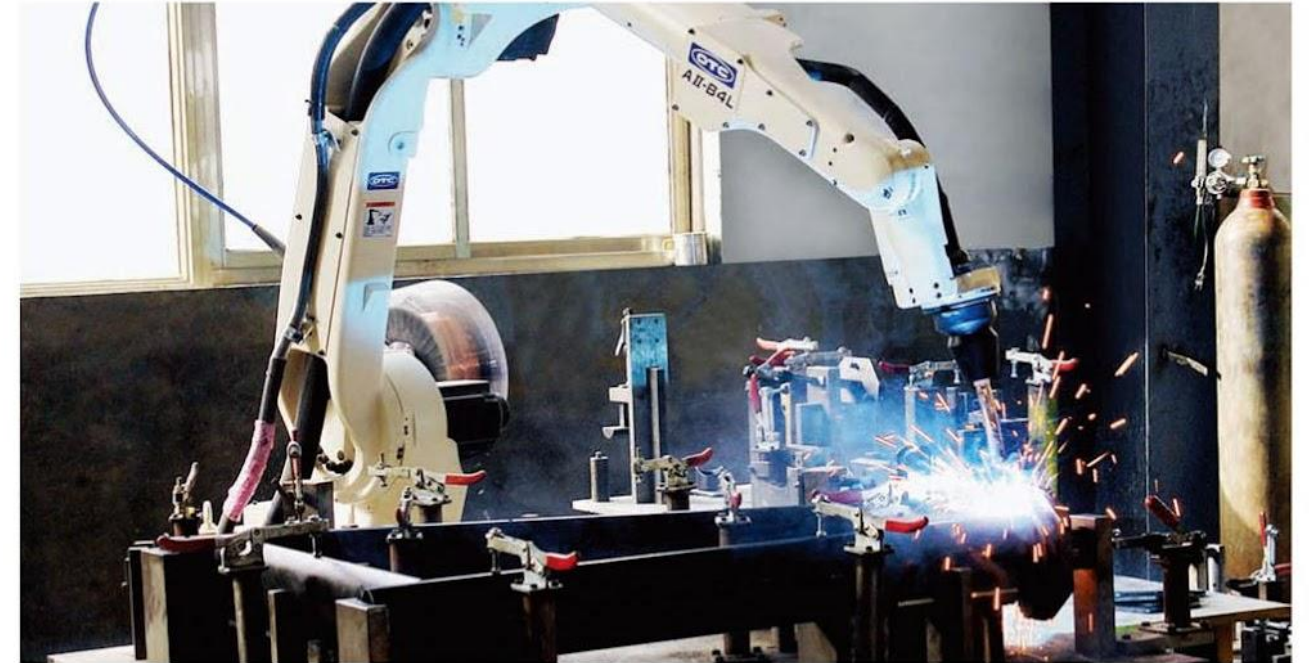

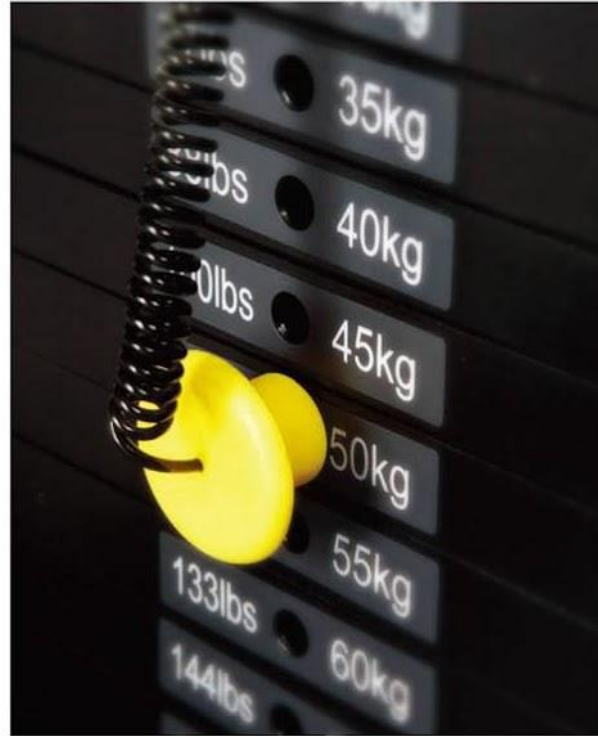

Our product test strictly follows the ISO9001 quality management system, the European Union CE product safety certification and ROHS testing standards. We carry out strict product inspection procedures on raw material, welding precision detection, spray coating of surface, finished products movement, etc.

### Sales

We independently develop and launch over 300 models of fitness equipment into the market, including lines of strength equipment and a full range of cardio equipments. We are one of the top manufacturers in China. Our products has exported to more than 70 countries and regions, wins a good reputation from customers.

### After-sales Service

We set up after-sales service offices in more than 10 provinces in China in 2009, and established the spare parts storerooms and equipped with full-time technicians. In the near future, we will set up the after-sales service offices in each province in China, to provide our customers with the most efficient and convenient after-sale service.

### MG Series

- The design inspiration comes from the world's first 7 star hotel—Burj Al Arab, elegant and artistic. The product implication: HOPE!
- Oversized flat oval tube introduces the easy design; streamline and mellow frame, ergonomically designed handles reduce stress on contact points to enhance user feel and function;
- Pedal assist system helps the users find an appropriate starting point, avoid of the muscle damage.

■ MG-002 Butterfly  
Size:1445\*1345\*1860mm  
N.W: 240kgs G.W:280kgs

■ MG-003 Shoulder Press  
Size:1670\*1135\*1680mm  
N.W: 205kgs G.W:245kgs

■ MG-003A Delts Machine  
Size:1280\*1350\*1680mm  
N.W: 210kgs G.W:250kgs

■ MG-004 Seated Row  
Size:1270\*1480\*1680mm  
N.W: 215kgs G.W:255kgs

■ MG-005 Cable Crossover  
Size:3500\*610\*2430mm  
N.W: 308kgs G.W:358kgs

■ MG-005A Functional Trainer  
Size:1460\*956\*2328mm  
N.W: 364kgs G.W:405kgs

■ MG-005B Adjustable Functional Trainer  
Size:2350\*750\*650mm  
N.W: 180kgs G.W:230kgs

■ MG-006 Biceps Curl  
Size:1645\*1070\*1680mm  
N.W: 200kgs G.W:240kgs

■ MG-009 Lower Back  
Size:1275\*1180\*1680mm  
N.W: 220kgs G.W:260kgs

■ MG-007 Triceps Press  
Size:1340\*1510\*1680mm  
N.W: 210kgs G.W:250kgs

■ MG-010 Abdominal Machine  
Size:1280\*1650\*1680mm  
N.W: 230kgs G.W:270kgs

■ MG-011 Rotary Torso Machine  
Size:1090\*1265\*1680mm  
N.W: 240kgs G.W:280kgs

■ MG-012 High Pully  
Size: 1555\*1320\*1680mm  
N.W.: 235kgs G.W.: 275kgs

■ MG-012A Seated Horizontal Pully  
Size:1275\*1975\*2175mm  
N.W: 260kgs G.W:300kgs

■ MG-014 Leg Extension  
Size:1330\*1295\*1680mm  
N.W: 240kgs G.W:280kgs

■ MG-013 Seated Leg Curl  
Size:1330\*1335\*1680mm  
N.W: 240kgs G.W:280kgs

■ MG-015 Leg Press  
Size:1150\*2015\*1680mm  
N.W: 310kgs G.W:350kgs

■ MG-016A Standing Leg Extension  
Size:1270\*2275\*1680mm  
N.W: 300kgs G.W:340kgs

■ MG-018 Adductor & Abductor  
Size:1450\*1410\*1680mm  
N.W: 240kgs G.W:280kgs

■ ME-001 Seated Chest Press  
Size: 1180\*1440\*1730mm

■ ME-002 Butterfly  
Size: 1160\*1430\*1470mm

■ ME-002A Seated Straight Arm Clip Chest  
Size: 1480\*1190\*1960mm

### ME Series

- 50\*100 mm flat elliptical tubes and the perfect arc outward appearance, which makes the product more stable and sterling.
- Products using the arc-shaped movement trajectory, perfect conjunction of human body's engineering principle, more in line with the fitness needs of Chinese.
- High quality films and magnetic latches let people exercise much safer.
- Using a one-time mold to make entire enclosed of PVC guard shield, causes the movement to be safer, and enhances product artistic overall, showing high quality.
- With a diameter of 106.2mm of iron pulley, improves equipment's durability and motion smoothness.
- The handle is made of high strength TPV material, never damage, enhances the product's durability.

■ ME-003 Shoulder Press  
Size: 1520\*1480\*1470mm

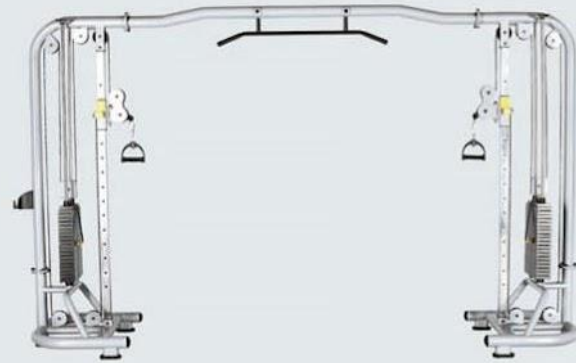

■ ME-004 Seated Row  
Size: 1530\*970\*1470mm

■ ME-006 Biceps Curl Machine  
Size: 1260\*1200\*1470mm

■ ME-007 Triceps Press Machine  
Size: 1500\*1260\*1470mm

■ ME-005 Cable Crossover  
Size: 3500\*610\*2430mm

■ ME-005A Functional Trainer  
Size: 1633\*1080\*2250mm

■ ME-008 Upper Limbs  
Size: 1040\*1370\*2440mm

■ ME-010 Abdominal Machine  
Size: 1220\*1160\*1470mm

■ ME-011 Rotary Torso Machine  
Size: 1120\*1270\*1470mm

■ ME-012 High Pully  
Size: 1800\*1510\*1900mm

■ ME-012A Seated Horizontal Pully  
Size: 1800\*1040\*1470mm

■ ME-015 Leg Press  
Size: 1390\*1300\*1470mm

■ ME-016A Standing Leg Extension  
Size: 2230\*1030\*1470mm

■ ME-017 Standing Calf Machine  
Size: 1140\*1120\*1740mm

■ ME-013 Seated Leg Curl  
Size: 1340\*1280\*1470mm

■ ME-013A Horizontal Leg Curl  
Size: 1760\*1220\*1470mm

■ ME-014 Leg Extension  
Size: 1390\*1300\*1470mm

■ ME-018 Inner Thigh Adductor  
Size: 950\*1550\*1470mm

■ ME-019 Outer Thigh Abductor  
Size: 1020\*1300\*1470mm

■ ME-020 Smith Machine  
Size: 2320\*1430\*2340mm

■ MA-01 Chest Press  
Size:1200\*1200\*1730mm  
N.W.:150kgs G.W.:205kgs

■ MA-00 Calf  
Size:1700\*900\*1200mm  
N.W.:150kgs G.W.:185kgs

### MA Series

- 60\*120 rectangular tube, the biggest size, highlighting the power.
- The appearance design and trajectory adopt the world top technology, fashionable, stable and luxury.
- Design and production is performance oriented, ensuring that each machine can bring comfortable experience for users to reach their limit.
- Much emphasis has been placed on the perfect combination of quality and Ergonomic Principles, whereby safety is highly guaranteed.

■ MA-02 Incline Chest Press  
Size:1200\*1300\*1500mm  
N.W.:160kgs G.W.:200kgs

■ M-7800 Commercial Treadmill  
 Size: 2220\*960\*1500mm  
 N.W.: 190KG G.W.: 280KG

### M-7800 Commercial Treadmill

- Introduce high tech from Europe, streamline design, a combination of luxury and fashion
- Computer program controlled self-lubricating function
- One-time molding for all the parts.
- Reinforced pleasing handle.
- No metal on the hull to avoid static.
- Special design on the changing motor belts running direction, which makes its service time longer.
- Slightly incline side bar to make the user more comfortable.
- Special connection on the column and dial, assures the steady and stable during exercise.
- Mitsubishi transducer imported from Japan
- LED dynamic digital display with seven windows showing different data during exercise.
- Touch heart rate sensor system
- 8 pre-set programs and infinite self-defined programs. The user can set his age, weight, gender, time perimeters ect., the soft stop and distance record function can be achieved.
- Super noiseless AC power. Continuous Power: 3.0HP, Max Power: 5.8HP.

■ M-5800 Commercial Treadmill  
 Size: 2185\*890\*1420mm  
 N.W.: 188kg

### M-5800 Commercial Treadmill

- Display Screen: Blue LCD display, smart windows with 400m simulation runway;
- Keystroke Style: Press type, speed/incline-chosen directly, incline-chosen. Users can adjust the countdown mode of time, distance and calories;
- Handgrip with heart rate sensor, speed (incline) shortcut keys;
- Motor: Noiseless AC power, continuous power 3.0HP, Peak: 5.8HP;
- Heart Rate Sensor: touching heart rate sensor system;
- Program: 8 pre-setting programs, 2 user-defined programs allow getting soft stop and distance memorized;
- Speed: 1-20km/h, Gradient: 0-20%;
- Running Belt: Perimeter: 3375mm, Width: 510mm;
- Running Board: Aseismatic elastic running board,
- Automatic-lubrication system;

■ M-5810 Spinning Bike  
Size: 1150\*560\*1080mm  
N.W.: 66kgs

■ M-5809 Spinning Bike  
Size: 1250\*530\*1150mm  
N.W.: 75kgs

### M-5810 Spinning Bike

- Optional color
 

 Red	 Grey
--	---
- Red Arrow design, the structure and color breaks the traditional spinning bike design concept, fluent appearance lines and bright color reflects uncommon characters.
- Large LED window display: showing time, speed, distance, and calories etc.
- Front handrail frame and back seat frame are adjusted by digital article, the users can adjust to any position they want.
- Instead of traditional chains, high quality PK-ribbed belt is adopted, with special tension wheel driven system, allows the users to get great passion when doing exercise. Handlebar regulating is smooth and stable.
- The press type brake system, prolongs its service life, and makes it simple and safe.

### M-5809 Spinning Bike

- Optional color
 

 Red	 Grey	 Yellow
--	---	---
- The bicycle is designed based on human engineering theory;
- the users can adjust the seat and handlebar both forwards & backwards and upwards & downwards.
- Adopt high strength axletree, diameter: 20mm, which decrease the failure rate and longer the service life.
- Adjustable foot strap makes the user feel better.
- Chain driven, can be ridden in dual directions; user can choose direction at his pleasure.
- The bike self-weight is 68 kgs; the flywheel is 20kgs, which makes the movement more stable.
- The bicycle is equipped with 2 wheels in the front; it can be moved easily and conveniently.

■ M-8808 Functional Walker  
 Size: 1940\*730\*1700mm  
 N.W: 110kgs G.W: 145kgs

### M-8808 Functional Walker

- It is a great combination of sports and fashion, providing a unique cardiovascular workout by offering the user opportunity to determine the movement, and the stride length and shape, from a vertical step to a simple walk, to a long way feel of running. It allows you a total body workout without impact, ensuring a safe and effective workout result. It is usually placed in the cardio training zone, next to the treadmills and exercise bikes. If you want to lose weight, burn calories without exertion, improve your coordination, prevent joint problems and move all the muscles in your body in a single training session, it's fun to use because it offers you three different movements – step, elliptical, and running – which you can change without the need to stop the machine or take your feet off the platforms.

### M-6805 Spinning Elliptical

- Perfect combination of spinning bike and elliptical allows you to regulate the exercise enthusiasm all the time.
- Streamlined appearance, the user can feel more arbitrary during exercise.
- Strengthened main frame make it stronger, more stable, durable and safer.
- Axial bearing is imported from Germany.
- All-steel press brake system, with calfskin brake pad, which makes the service life longer.
- The handlebar adjustment is more smooth and high stability.

### M-6806 Elliptical

- Intelligent Display: LED dynamic display, showing resistance level, motor rotate speed and exercise time at any moment, contributes you to supervision and control of the movement fettle.
- Humanity Design, kinds of user defined program
- Take advanced electromagnetism resistance adjusting system, and imported self-generated Motor, which is safer, more reliable.
- Touch heartrate sensor system
- Perfect workout track, with the original creation of the climbing design, and the function of stairs machine.
- Exercise Level: 16 resistance levels
- Max User Weight: 150kgs

■ M-6805 Spinning Elliptical  
 Size: 1240\*480\*1140mm  
 N.W.: 94kgs G.W.:136kgs

■ M-6806 Elliptical  
 Size: 2100\*750\*1500mm  
 N.W.: 100kg G.W.: 160kg

### M-8808R Recumbent Bike

- According to the unique ergonomic design of the ultra-luxurious adjustable seat, the lumbar spine provides a more comfortable support also can help the users correct their posture as well as the body.
- The product complies with the human body structure design; together with the cushion of high-quality materials, makes the seat more comfortable.
- High quality steel is adopted, coupled with advanced design concepts, to highlight the stylish appearance and stable atmosphere.
- Durable aluminum orbit, can let users adjust to the most comfort of the sports attitude to begin exercise.
- Hand-hold heart rate sensor system to facilitate the natural movement in the seat on both sides of the armrests, can monitor their heart rate during the exercise.
- The product front-end with a wear-resistant PU wheel, which makes the movement of our products much safer, easier and more convenient.
- The system uses advanced Electromagnetic resistance conditioning systems, more comfortable, safe and reliable

### M-8808U Upright Bike

- Display: Using the 11.6 inch TFT touch screen TV, PIP interface, show different signal source (TV, VIDEO, YPbPr HDMI, USB), support external the sound source, there are two digital USB interface on the panel, headphone jacks, with the TV interface in high fidelity speakers on the back, which can let you enjoy watching the great movies or listening to the wonderful music during the exercise.
- Made of selected high quality steel, combined with the new technology of the resistance magnetic control system. It will be more comfortable and quiet during exercise.
- Humanity Design seat cushion adjustment, let the user get an ideal sport position in the movement which makes the moving parts most incisive.
- According to the design of human engineering, there are pulse sensors at the both handles, let the user detect their heart rate quickly and conveniently.  
Innovative double color appearance design, make the equipment more fashionable.
- There is a sheath on the pedals, makes the movement more comfortable and safe.
- The PU wheels in front makes the movement much safer and easier.
