

# Google Pay

Overview

**\$2.3T**

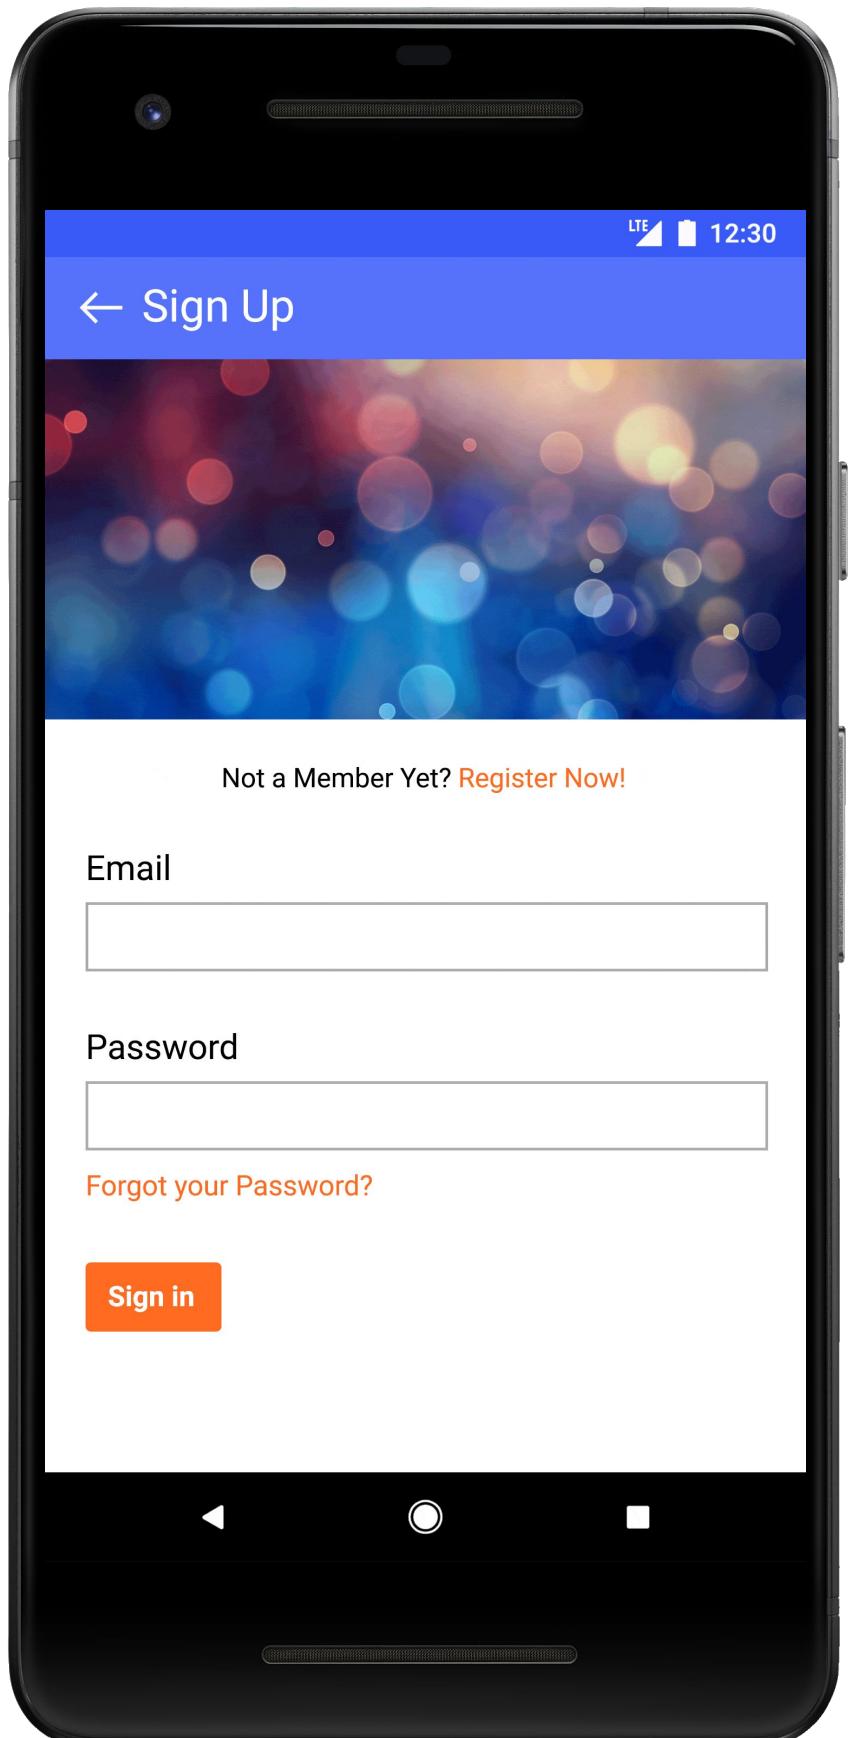

**2017 Global e-commerce retail sales**

A close-up, slightly blurred photograph of a person's hands typing on a laptop keyboard. The hands are positioned in the center, with fingers moving across the keys. The laptop has a dark trackpad and a light-colored body. The background is a warm, out-of-focus indoor setting.

But online conversion  
is still a big problem

# 28%

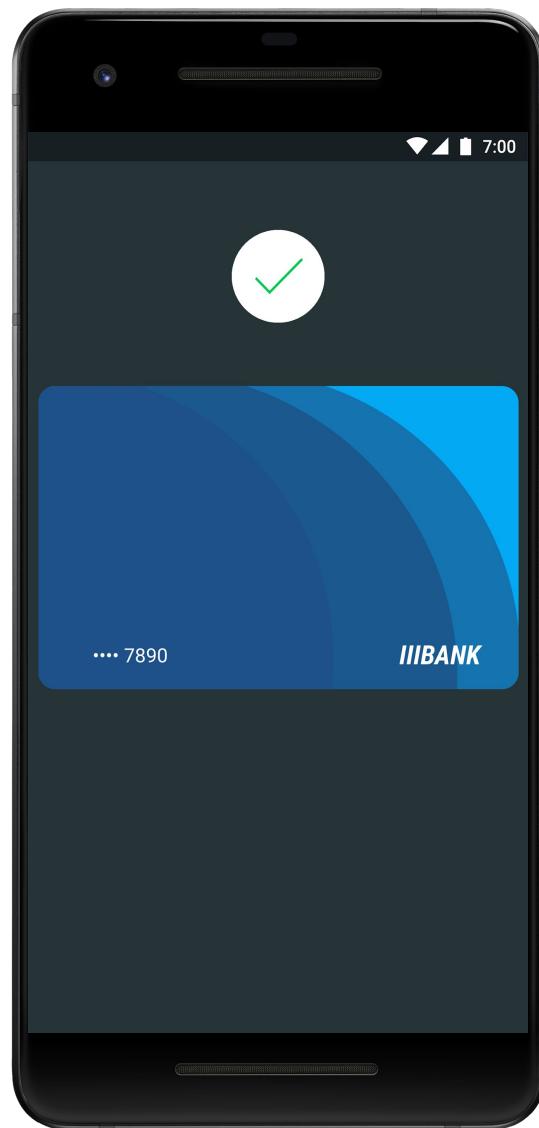

of cart abandonments  
due to “too long/complicated  
checkout process”

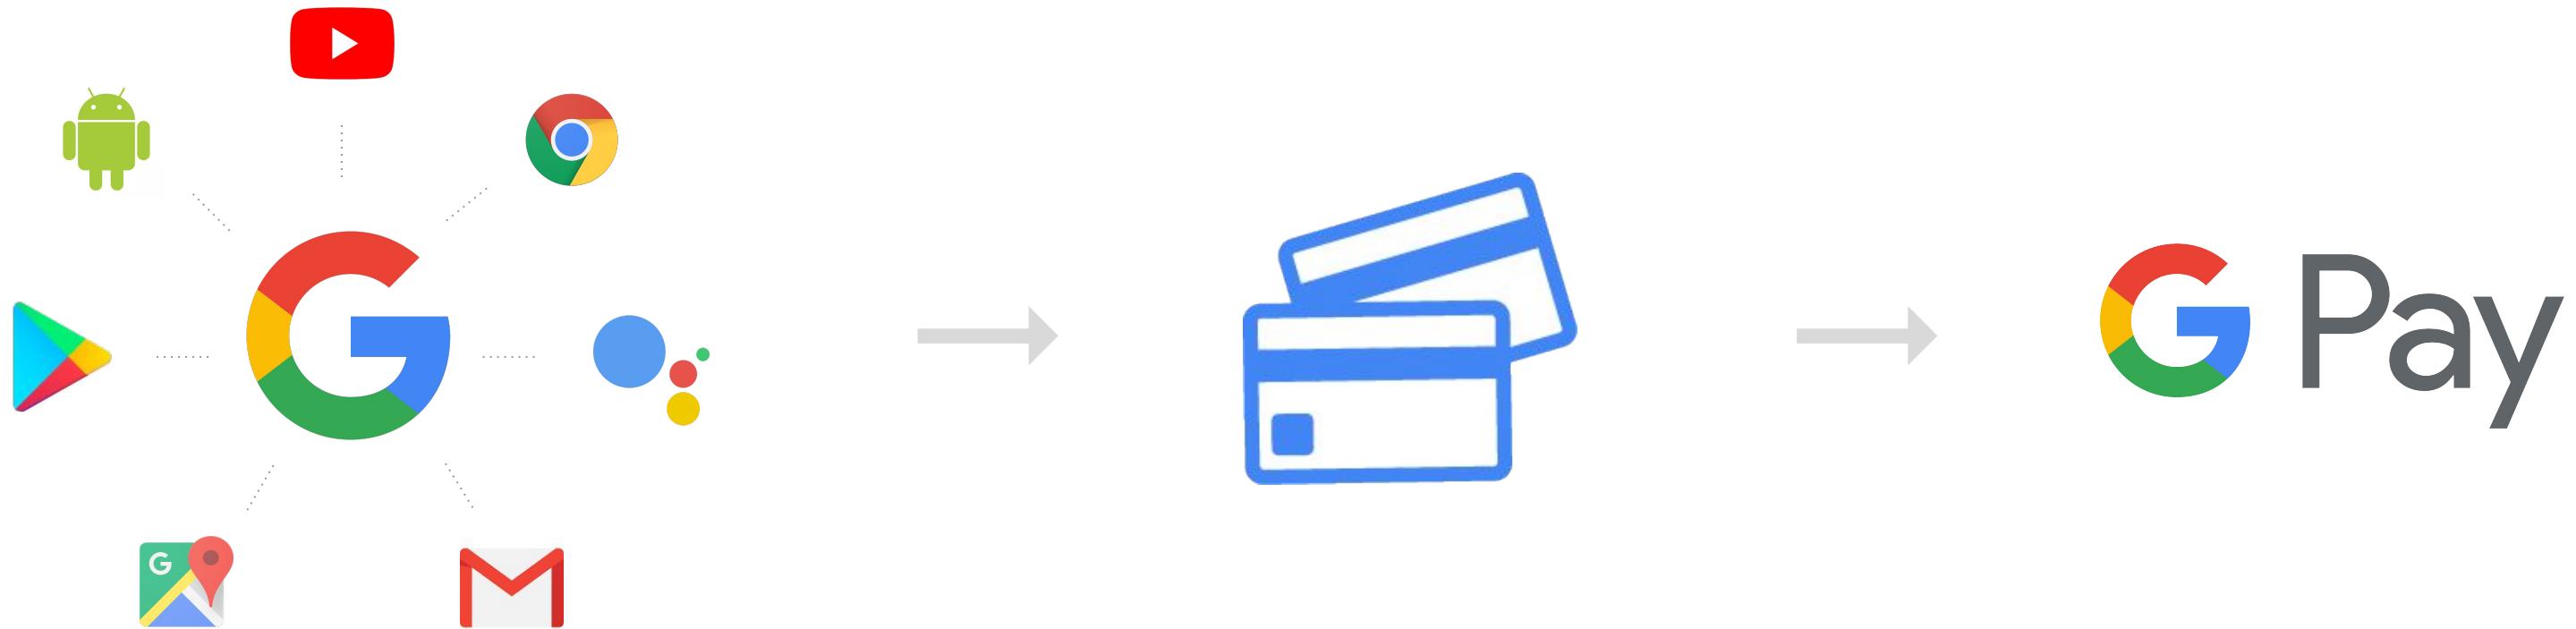

Source: Baymard Institute:  
<https://baymard.com/lists/cart-abandonment-rate>

A woman with dark hair tied back, wearing a red textured jacket over a grey top, is shown in profile from the right side of the frame. She is looking down at a blue smartphone held in her hands. She has a small, star-shaped earring in her left ear. The background is blurred, showing what appears to be a city street with lights.

Pay everywhere with your  
Google account

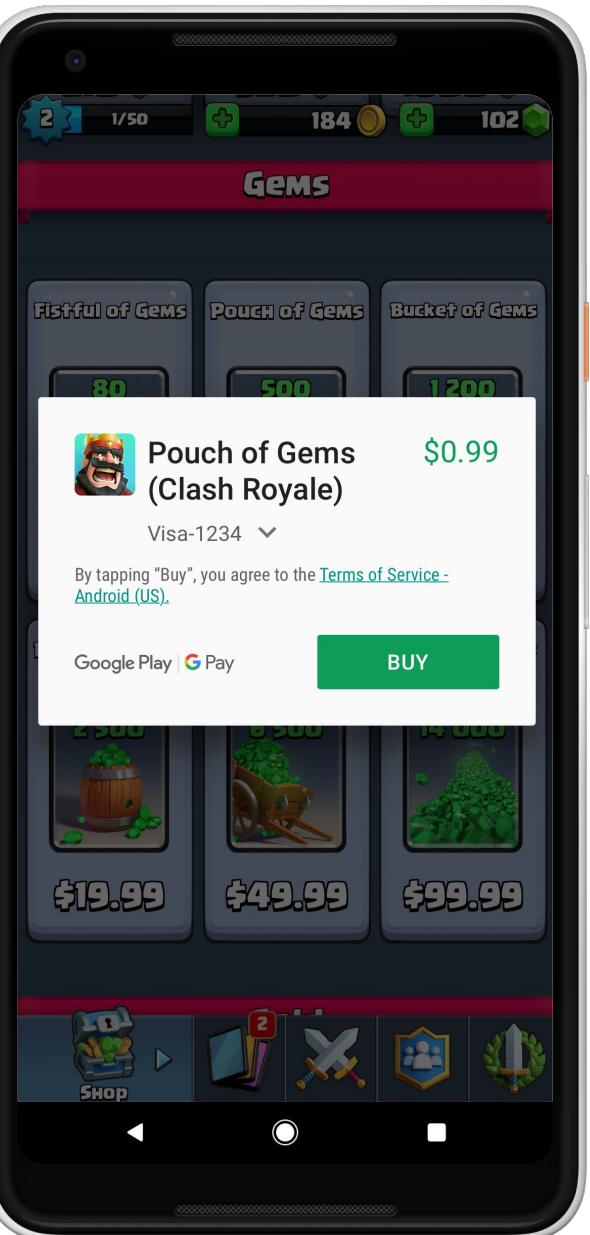

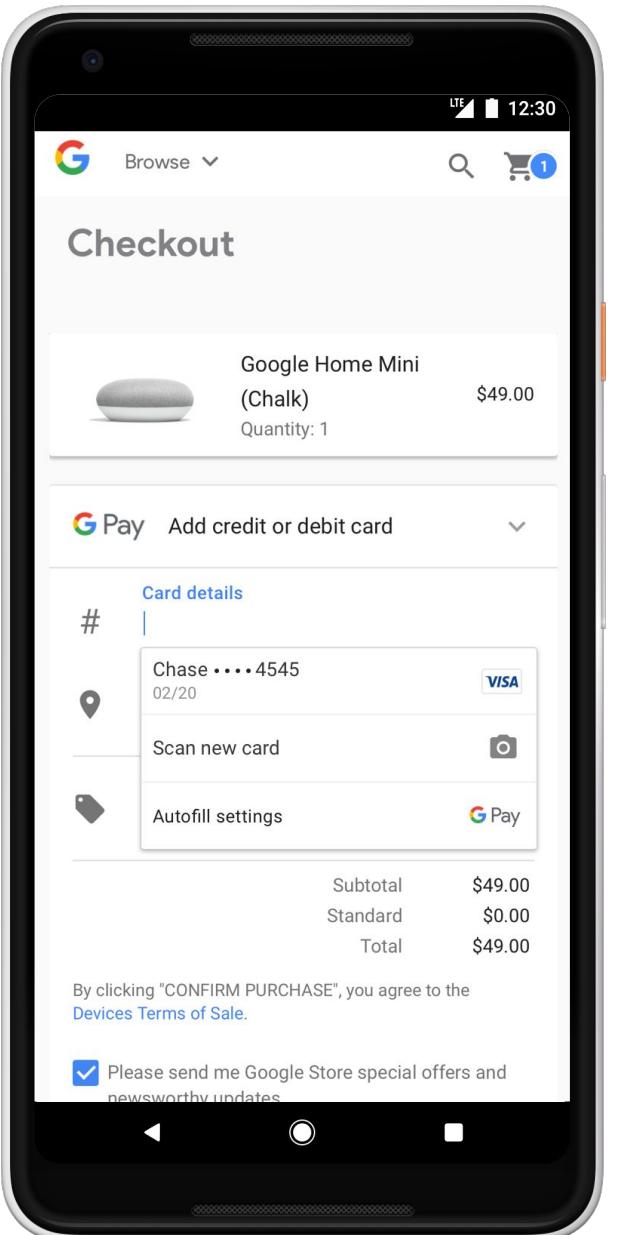

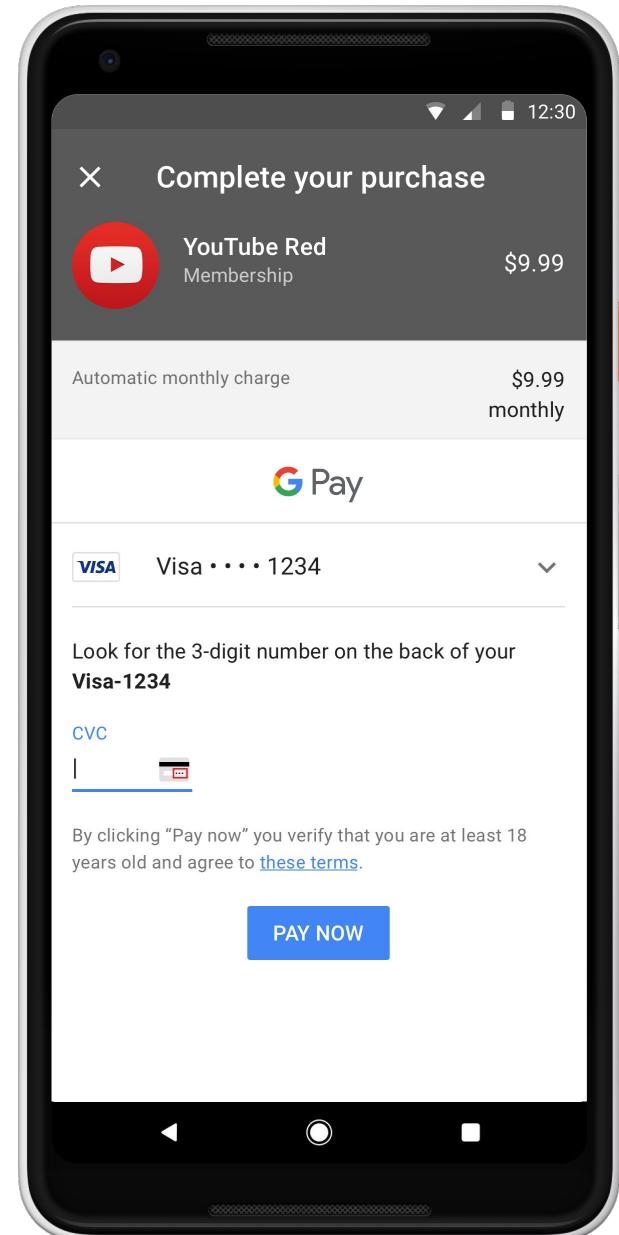

**Billions of Users  
across Google**

**Hundreds of millions  
of forms of payment  
saved to their Accounts**

**Users ready  
to pay everywhere**

# Direct Integration - logical data flow

Proprietary + Confidential

# User experience recommendations

- Display Google Pay early and prominently as payment method
- Display all relevant purchase information including final price and items/services purchased, before confirming an order
- If you display payment information on confirmation screens or emails, you may display the payment card description returned by Google Pay API
- Use only the official button styles and logo assets in your app/web

Buy with  Pay

Buy with  Pay

# Google Pay vs Android Pay

- Brand new SDK
  - ~~1 hour for initial integration~~
  - New brand new sdk – a bit more complicated
  - Migration from Android Pay needed
  - Review needed

# Google Pay

Reasons to use:

- Free
- Safe
- Commonly used

RTL

The image shows two side-by-side screenshots of a mobile application's profile screen for a user named Timur Akhmetgareev. The left screenshot is in Arabic, and the right one is in English. Both screens show a circular profile picture of a man with brown hair, a flight map background, and a 99% battery icon at the top.

**Arabic Version (Left):**

- Section 1:** Statistics (إحصائيات)
  - 540 ساعة (540 hours)
  - 024 كم (024 km)
  - 21 طائرات (21 aircraft)
  - 15 دول (15 countries)
  - 38 مطارات (38 airports)
  - 28 شركات طيران (28 airlines)
  - 149 بطاقة صعود إلى الطائرة (149 boarding passes)
- Section 2:** Wallet (المحفظة)
  - 5 عضويات (5 memberships)
- Section 3:** Leaderboard (قائمة المتقدمين)
  - #3 بين الأصدقاء (Ranked #3 among friends)
  - أفضل 4 % بين جميع المسافرين في عام 2018 (Top 4% among all travelers in 2018)
- Section 4:** Achievements (الإنجازات)
  - AIRBUS (3 icons)
  - Booking (14 icons)
  - Profile (3 icons)
  - Inbox (3 icons)

**English Version (Right):**

- Section 1:** Statistics (Statistics)
  - 540 h 024 km
  - 21 aircraft 15 countries
  - 38 airports 28 airlines
  - 149 boarding passes
- Section 2:** Wallet (Wallet)
  - 5 memberships
- Section 3:** Leaderboard (Leaderboard)
  - Ranked #3 among friends
  - Top 4% among all travelers in 2018
- Section 4:** Achievements (Achievements)
  - AIRBUS (3 icons)
  - Booking (14 icons)
  - Profile (3 icons)
  - Inbox (3 icons)

# Expectation – 3 days

- Check RTL implementation for some views
  - Lint for XML
  - Manual check for all custom views (~30)
- Translations proofreading
- ?????
- PROFIT!

# Reality: 4 weeks

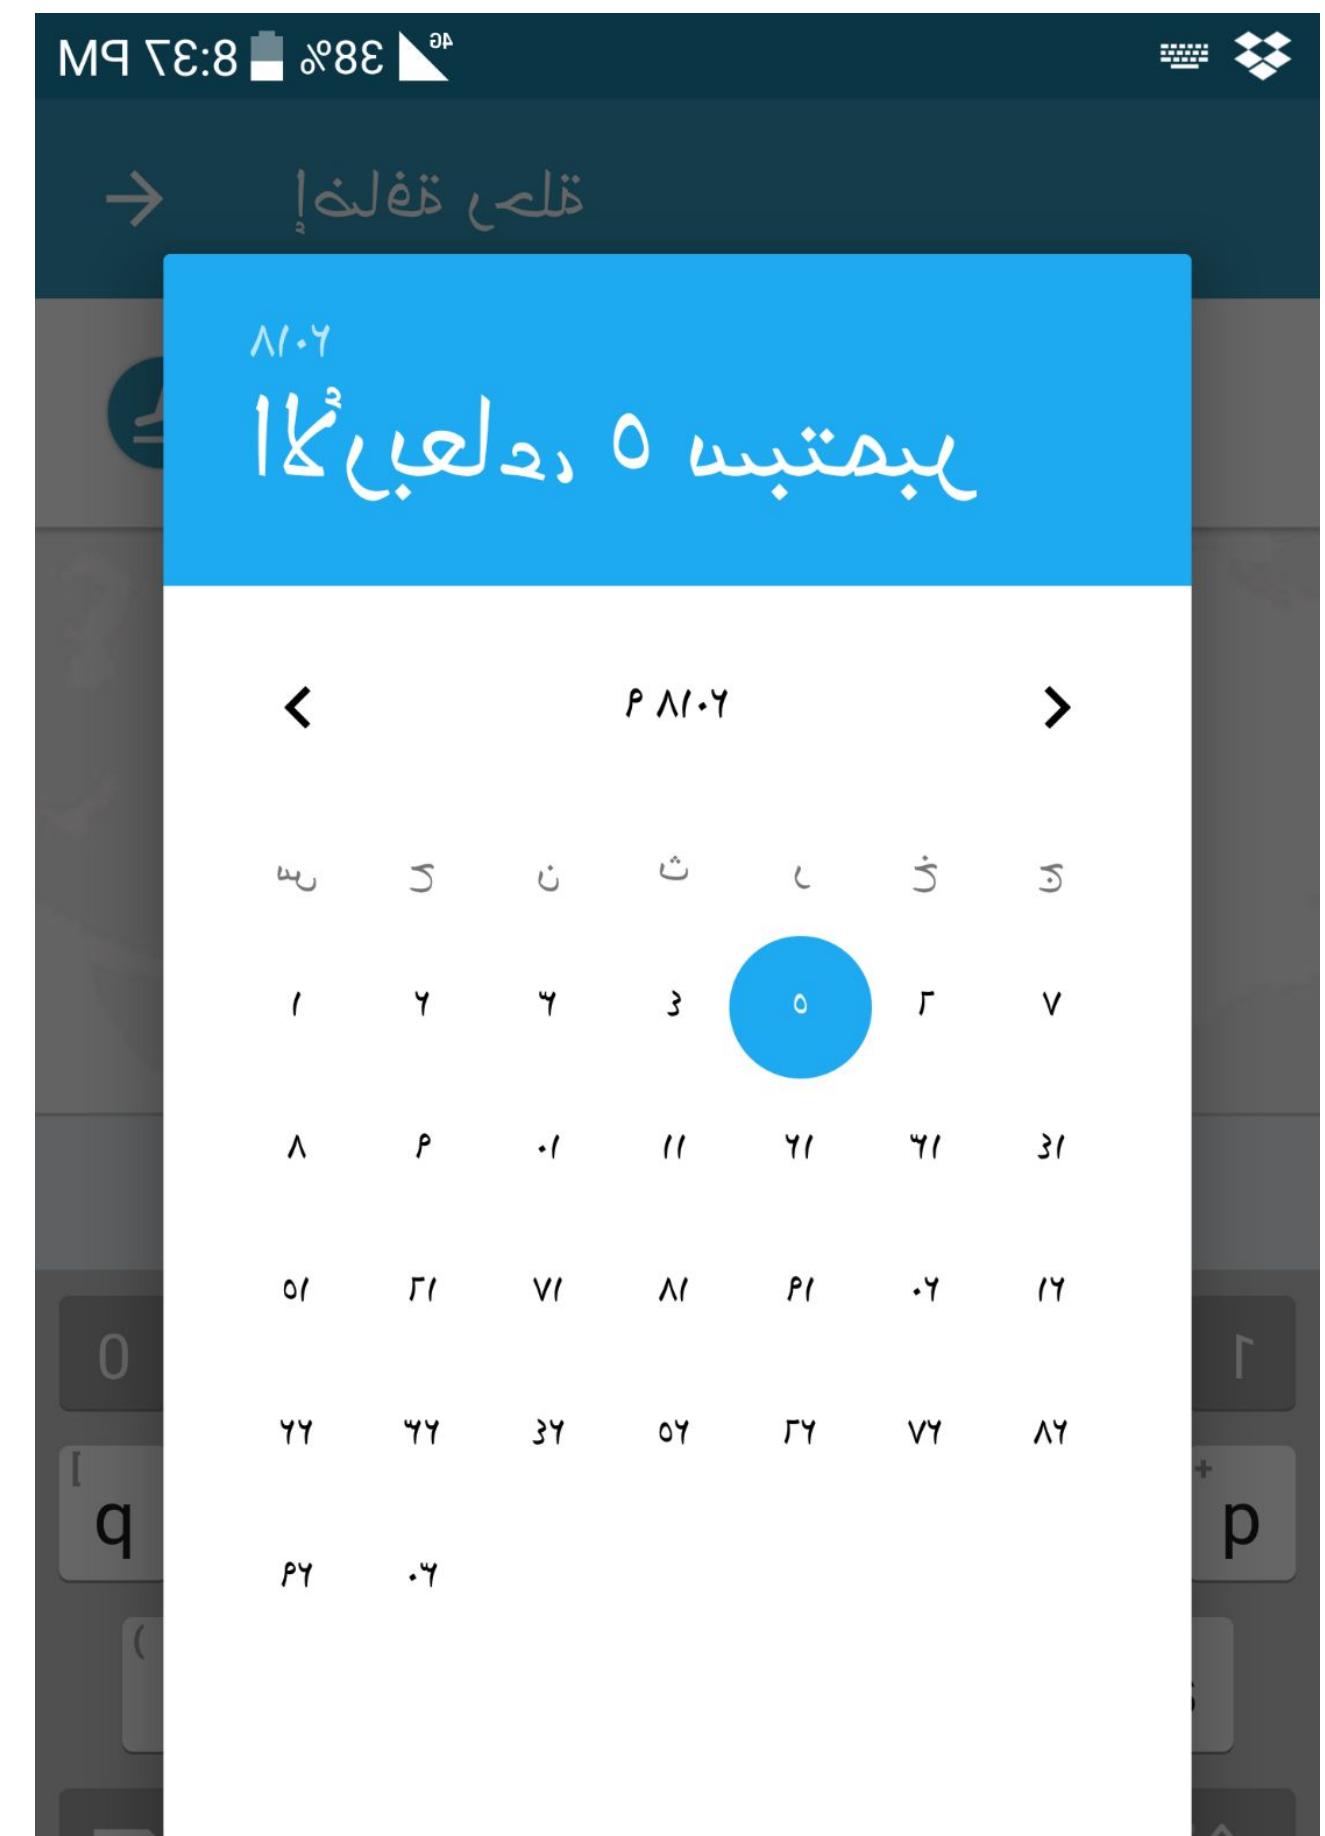

Without much sleep 😊

# Translations proofreading

- “Almost all strings are from Google Translate”
  - Translated.com – official provider from GP
- No abbreviations allowed
- We should offer language switch:
  - Onboarding
  - Settings

# Translations: numbers

- Arabic: ٠ ١ ٢ ٣ ٤ ٥ ٦ ٧ ٨ ٩
- Latin: 0 1 2 3 4 5 6 7 8 9

# Translations: numbers

```
String.format(  
    "SELECT column FROM db WHERE column_2 > %d", 12)
```

# Translations: numbers

- Arabic numbers are not welcomed in ‘ar’ locale:
  - Emirate Airlines, Qatar airlines, WeGo use Latin numbers
- Can’t simply insert non-Arabic text into Arabic text

# Translations: numbers

- Arabic numbers are not welcomed in ‘ar’ locale:
  - Use `String.format(Locale.US, "%d xxxx", 12)`

# Translations: numbers

- Arabic numbers are not welcomed in ‘ar’ locale:
  - ~~Use `String.format(Locale.US, "%d xxxx", 12)`~~
  - Replace `TextView` with `RobotoTextView`
  - Override `setText();`

```
@Override  
public void setText(CharSequence text, BufferType type) {  
    if(type==BufferType.SPANNABLE) {  
        super.setText(text, type);  
    } else {  
        super.setText(arabicToDecimal(getContext(), text), type);  
    }  
}
```

```
public static String arabicToDecimal(Context context, CharSequence number) {  
    if (number != null) {  
        if (context != null && !LocaleManager.isPersian(context)  
&& isRTL(context)) {  
            char[] chars = new char[number.length()];  
            for (int i = 0; i < number.length(); i++) {  
                char ch = number.charAt(i);  
                if (ch >= 0x0660 && ch <= 0x0669)  
                    ch -= 0x0660 - '0';  
                else if (ch >= 0x06f0 && ch <= 0x06F9)  
                    ch -= 0x06f0 - '0';  
                chars[i] = ch;  
            }  
            return new String(chars);  
        } else {  
            return number.toString();  
        }  
    } else {  
        return "";  
    }  
}
```

```
