

Attractions and interesting places in Voronezh.

- *Made by Valery Shilovskikh.*

Voronezh was built, like St. Peterburg, by Peter the Great, because in the center of the city there are many buildings, one way or another related to history and striking with their beauty.

These are theaters, apartment houses, shops, cafes that have found their place in the old expensive estates.

The monument to «White Bim, the Black Ear» was made after the story itself was written, incidentally, also citizen of the Voronezh, and his golden ear, according to the city legend, brings good luck, if it is rubbed.

In the center of the city there is a monument called «Stranger», which became a subject for fantasy to whom an empty chair is still intended and the first representative of urban sculpture, so popular in Europe at that time.

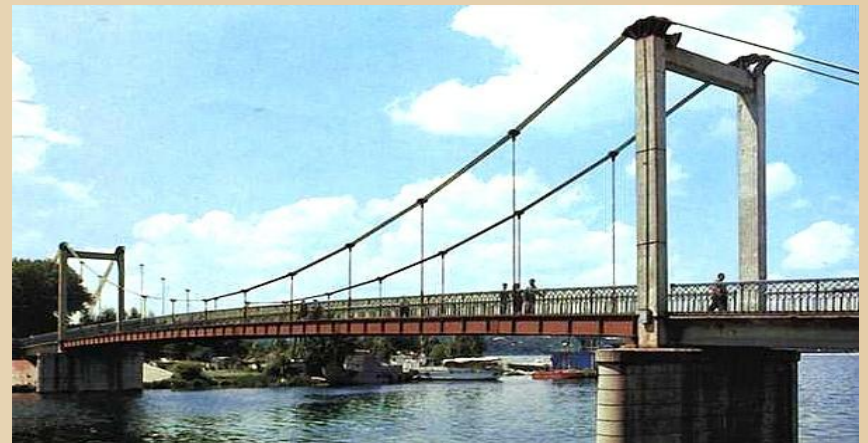

The most famous monument for the sake of which tourists come to this city is the «Kitten from Lizyukov Street», located of the street of the same name .

Also, there are many monumets to famous people, writees in particular. These are Mayakovsky, Marshak, Yesenin, but I would draw your attention on the «monument pot», in fact, a monument to the soloist known in the last decade of the group «The King and The Jester»

Voronezh, in fact, is constantly evolving and more and more interesting places are appearing. They already can not be circumvented in one day.

*Thank you for
attention!*
