Autoimmune Hepatitis

REPORT OF THE SECOND-YEAR STUDENT OF THE SKLIFOSOVSKY INSTITUTE OF
CLINICAL MEDICINE 01-08 GROUP KARLINA IRINA

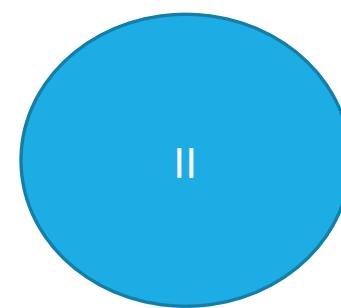

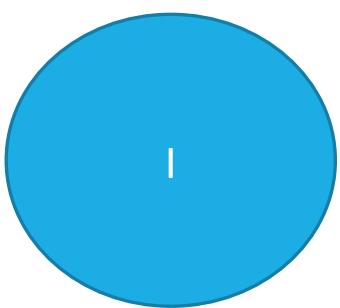

Moscow 2020

Introduce

Autoimmune Hepatitis (AIH) is a chronic liver disease that develops with a decrease or complete absence of tolerance to hepatocyte-specific autoantigens

Autoimmune Hepatitis

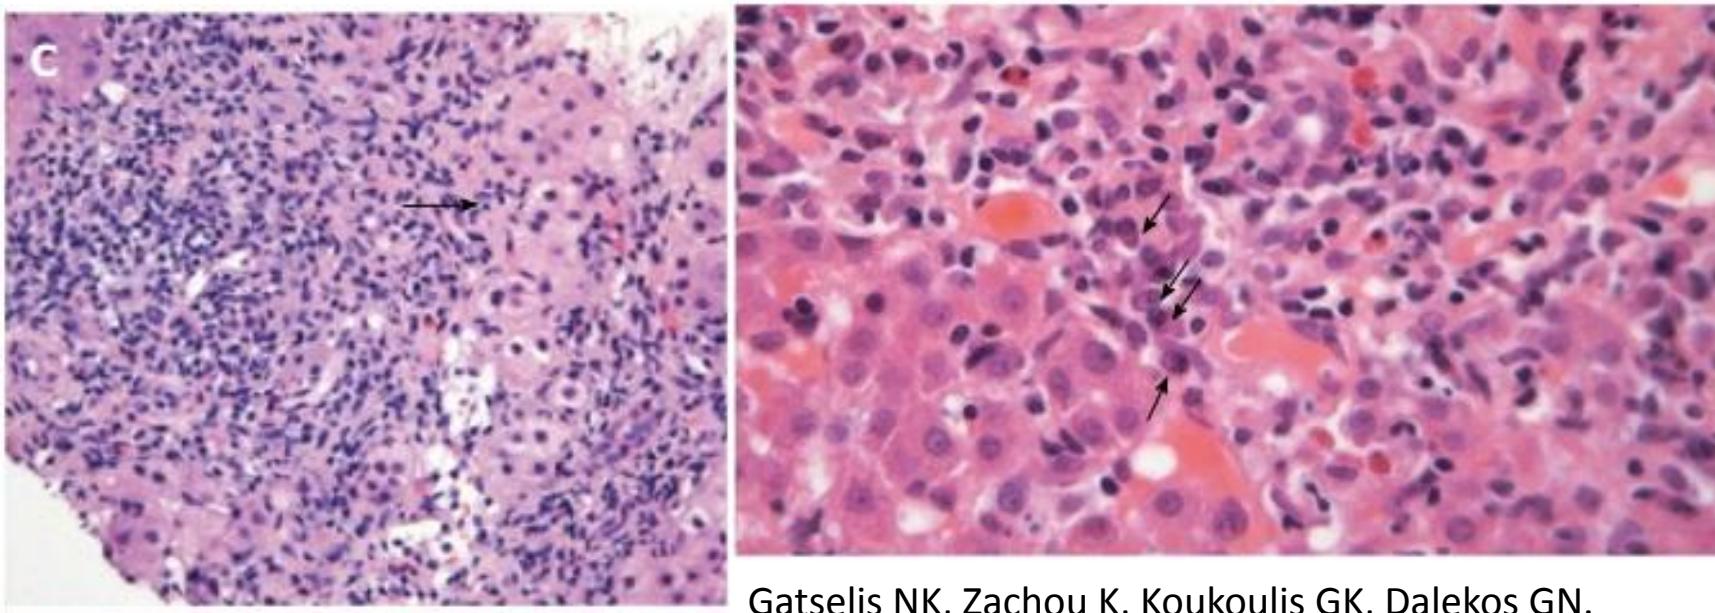

I

II

Pathogenesis

In genetically susceptible people, the AIH can be caused by

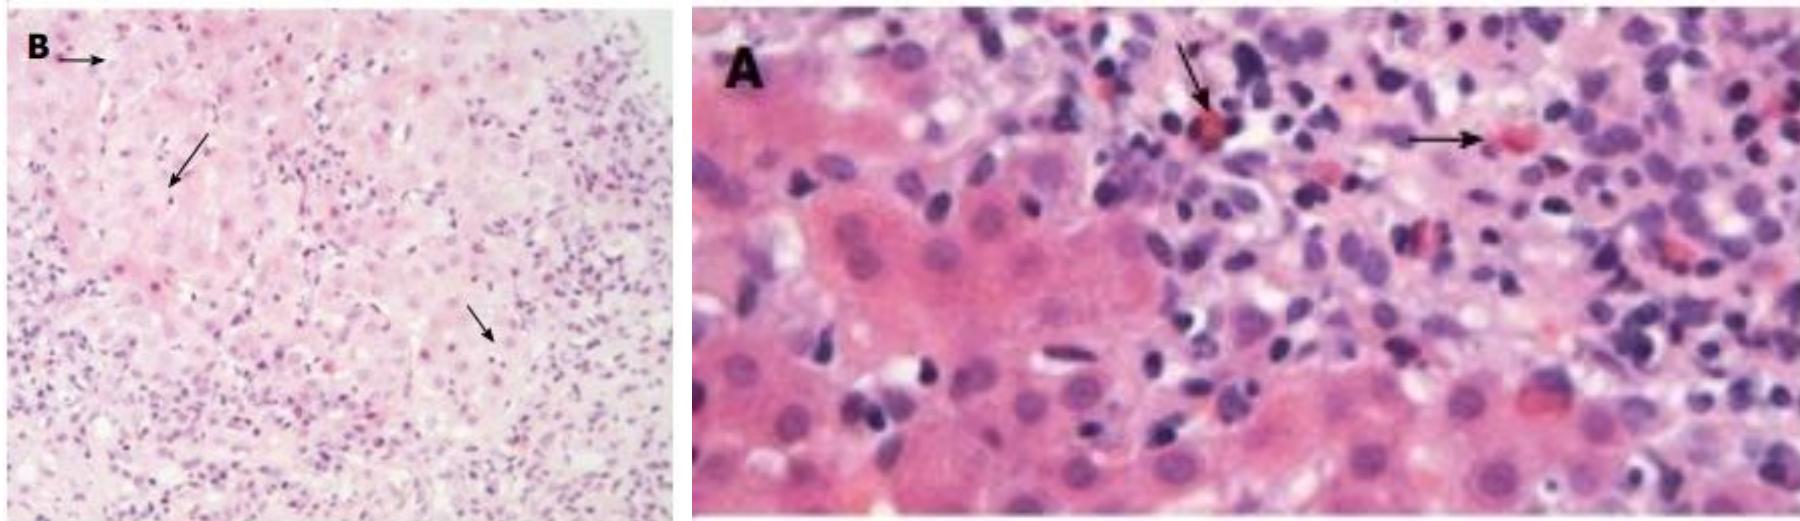

- external factors (viruses, drugs)
- internal factors (intestinal microbiota)

Gatselis NK, Zachou K, Koukoulis GK, Dalekos GN. Autoimmune hepatitis, one disease with many faces: etiopathogenetic, clinico-laboratory and histological characteristics. *World J Gastroenterol.* 2015 Jan 7;21(1):60-83. doi: 10.3748/wjg.v21.i1.60. PMID: 25574080; PMCID: PMC4284362.

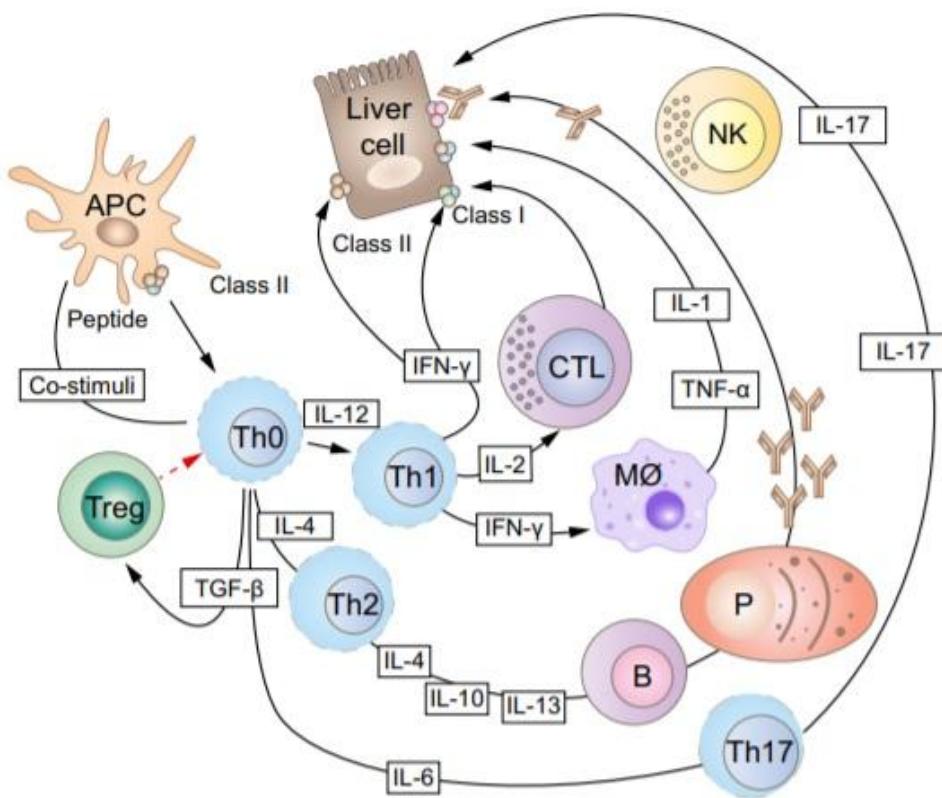

Molecular concepts of AIH development

- Molecular mimicry
- Incomplete negative selection of T-lymphocytes in the thymus

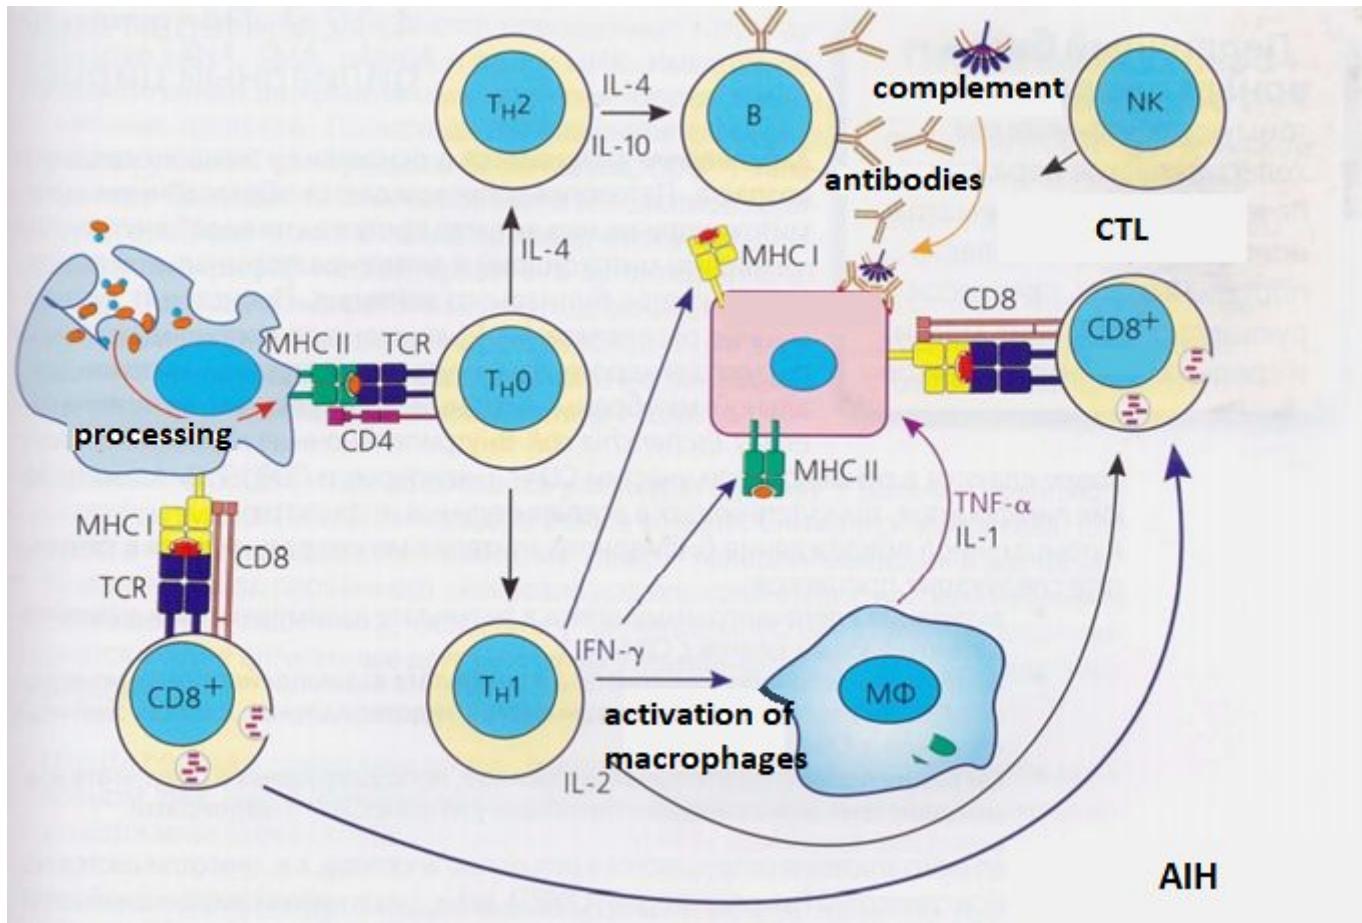

Gatselis NK, Zachou K, Koukoulis GK, Dalekos GN. Autoimmune hepatitis, one disease with many faces: etiopathogenetic, clinico-laboratory and histological characteristics. *World J Gastroenterol.* 2015 Jan 7;21(1):60-83. doi: 10.3748/wjg.v21.i1.60. PMID: 25574080; PMCID: PMC4284362.

Immunopathogenesis

Manns MP, Lohse AW, Vergani D.
Autoimmune hepatitis--Update 2015. J
Hepatol. 2015 Apr;62(1 Suppl):S100-11. d
10.1016/j.jhep.2015.03.005. PMID:
25920079.

Immunopathogenesis

Aetiology

Sex

75-80% of individuals with AIH are women

Age

The incidence of AIH-1 shows two peaks, one in childhood and adolescence and another peak at ~40 years of age; AIH-2 almost exclusively affects infants, children and adolescents

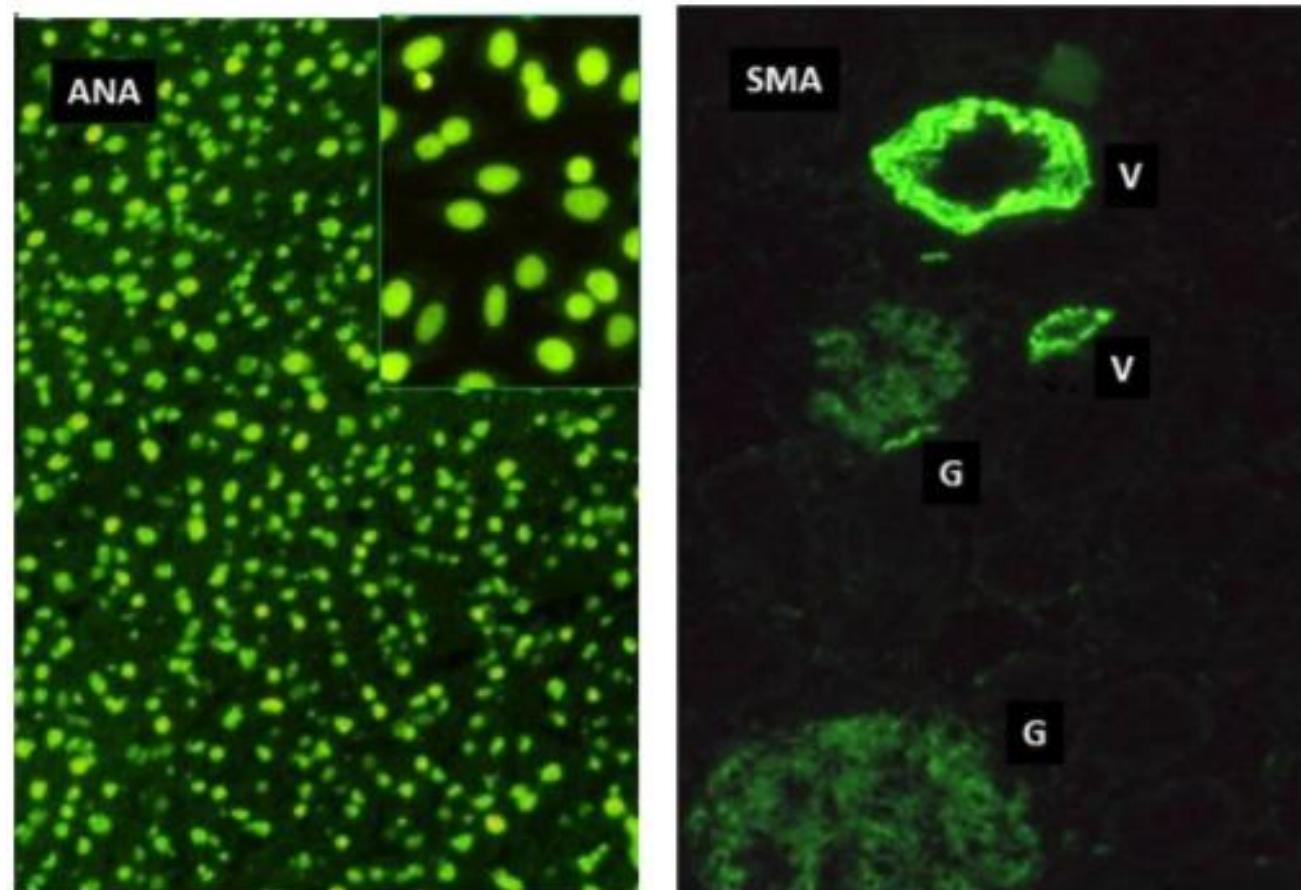

ENVIRONMENTAL FACTORS

Viral infections; the intestinal microbiota might have a role as well

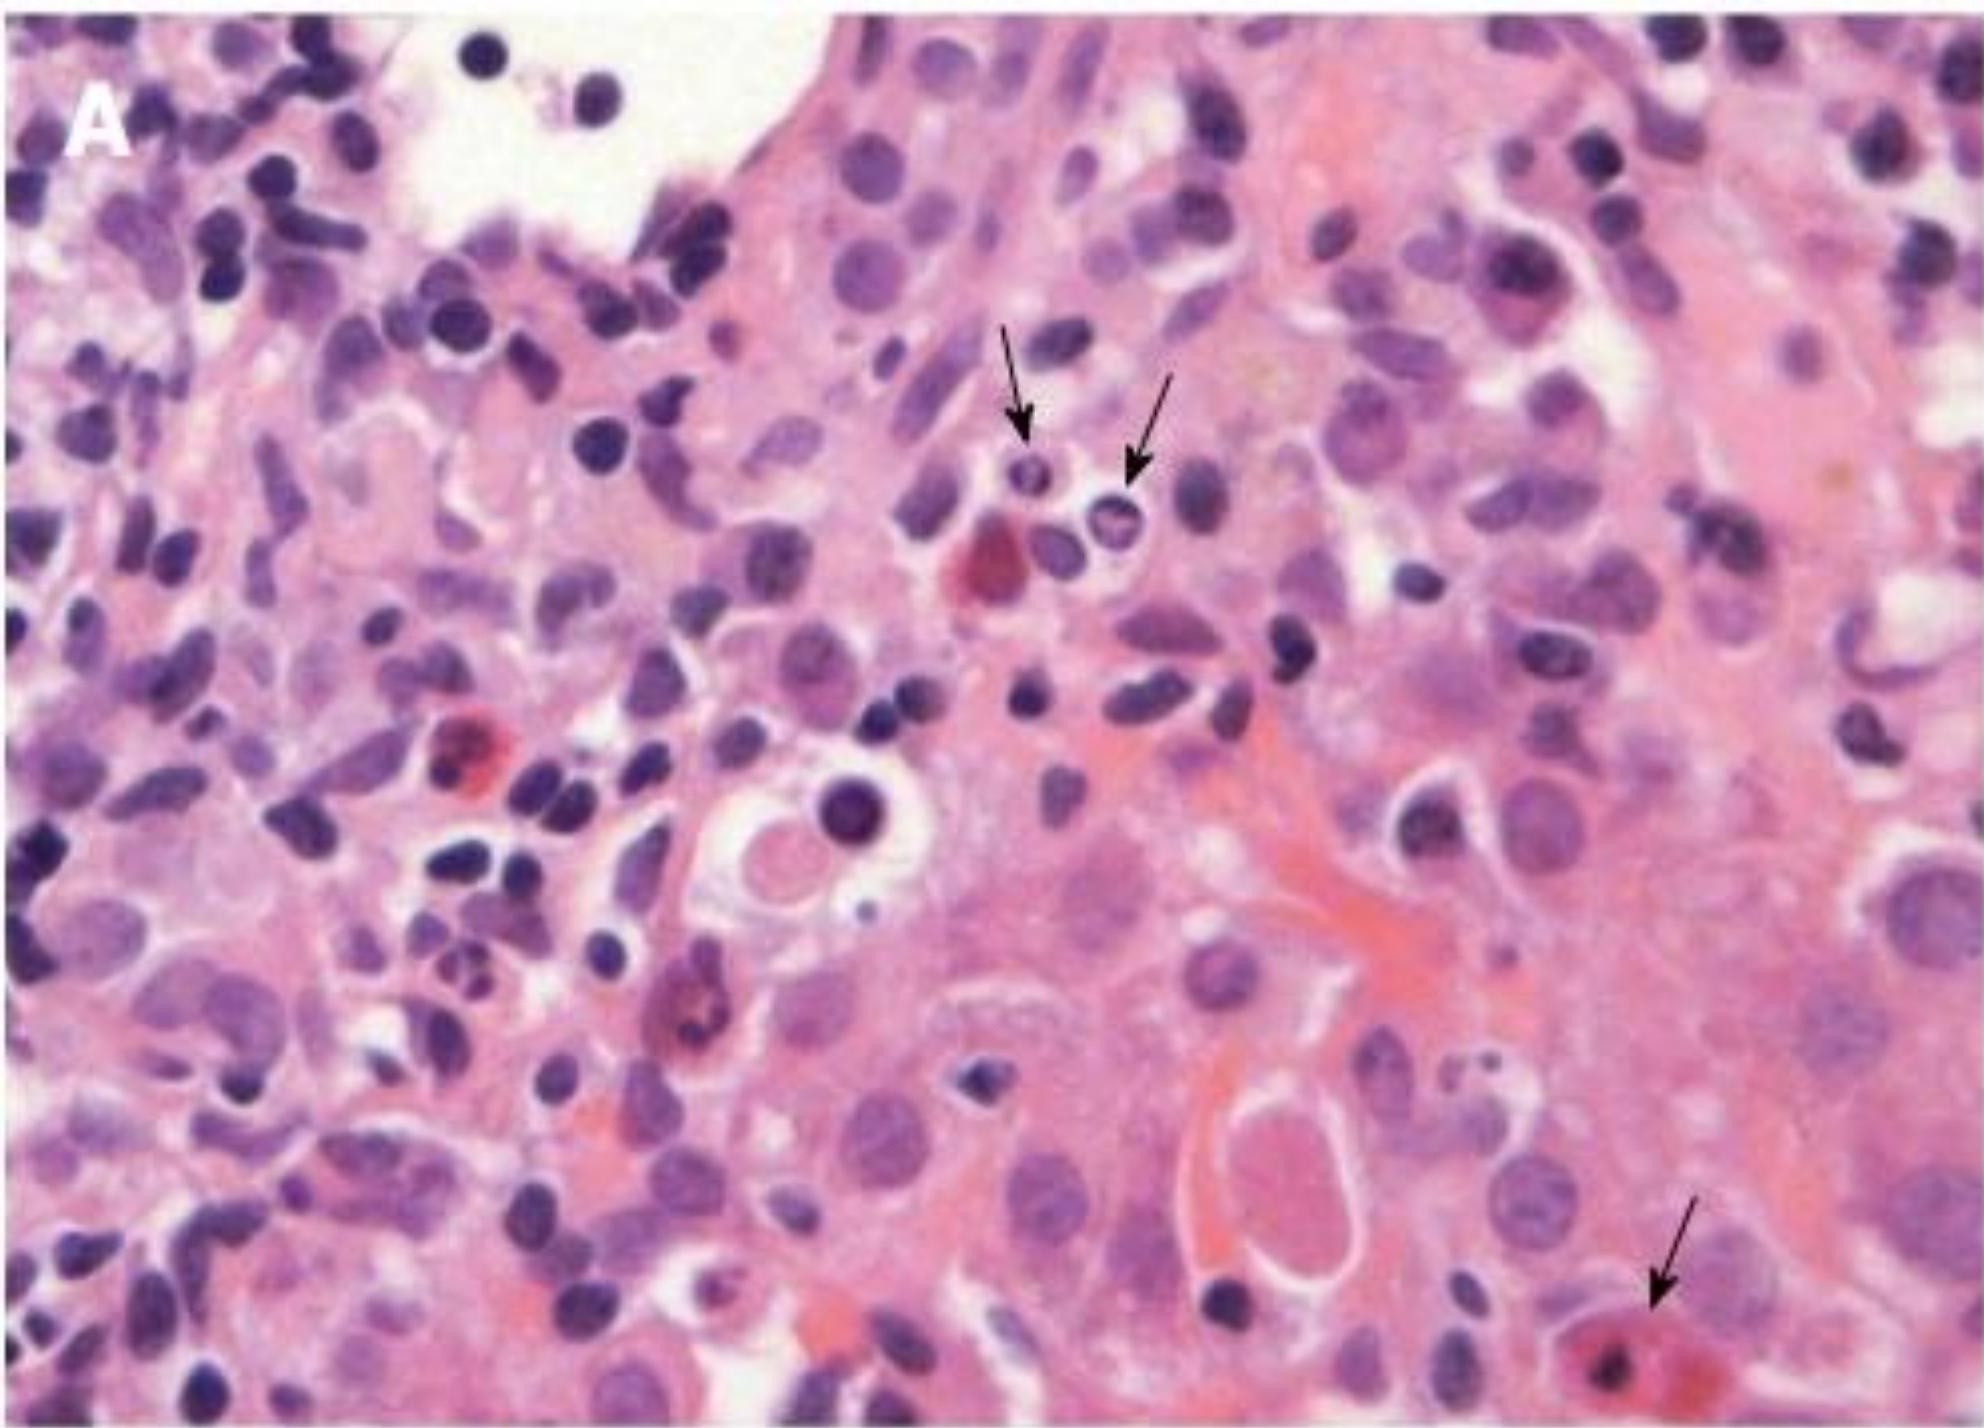

Diagnosis

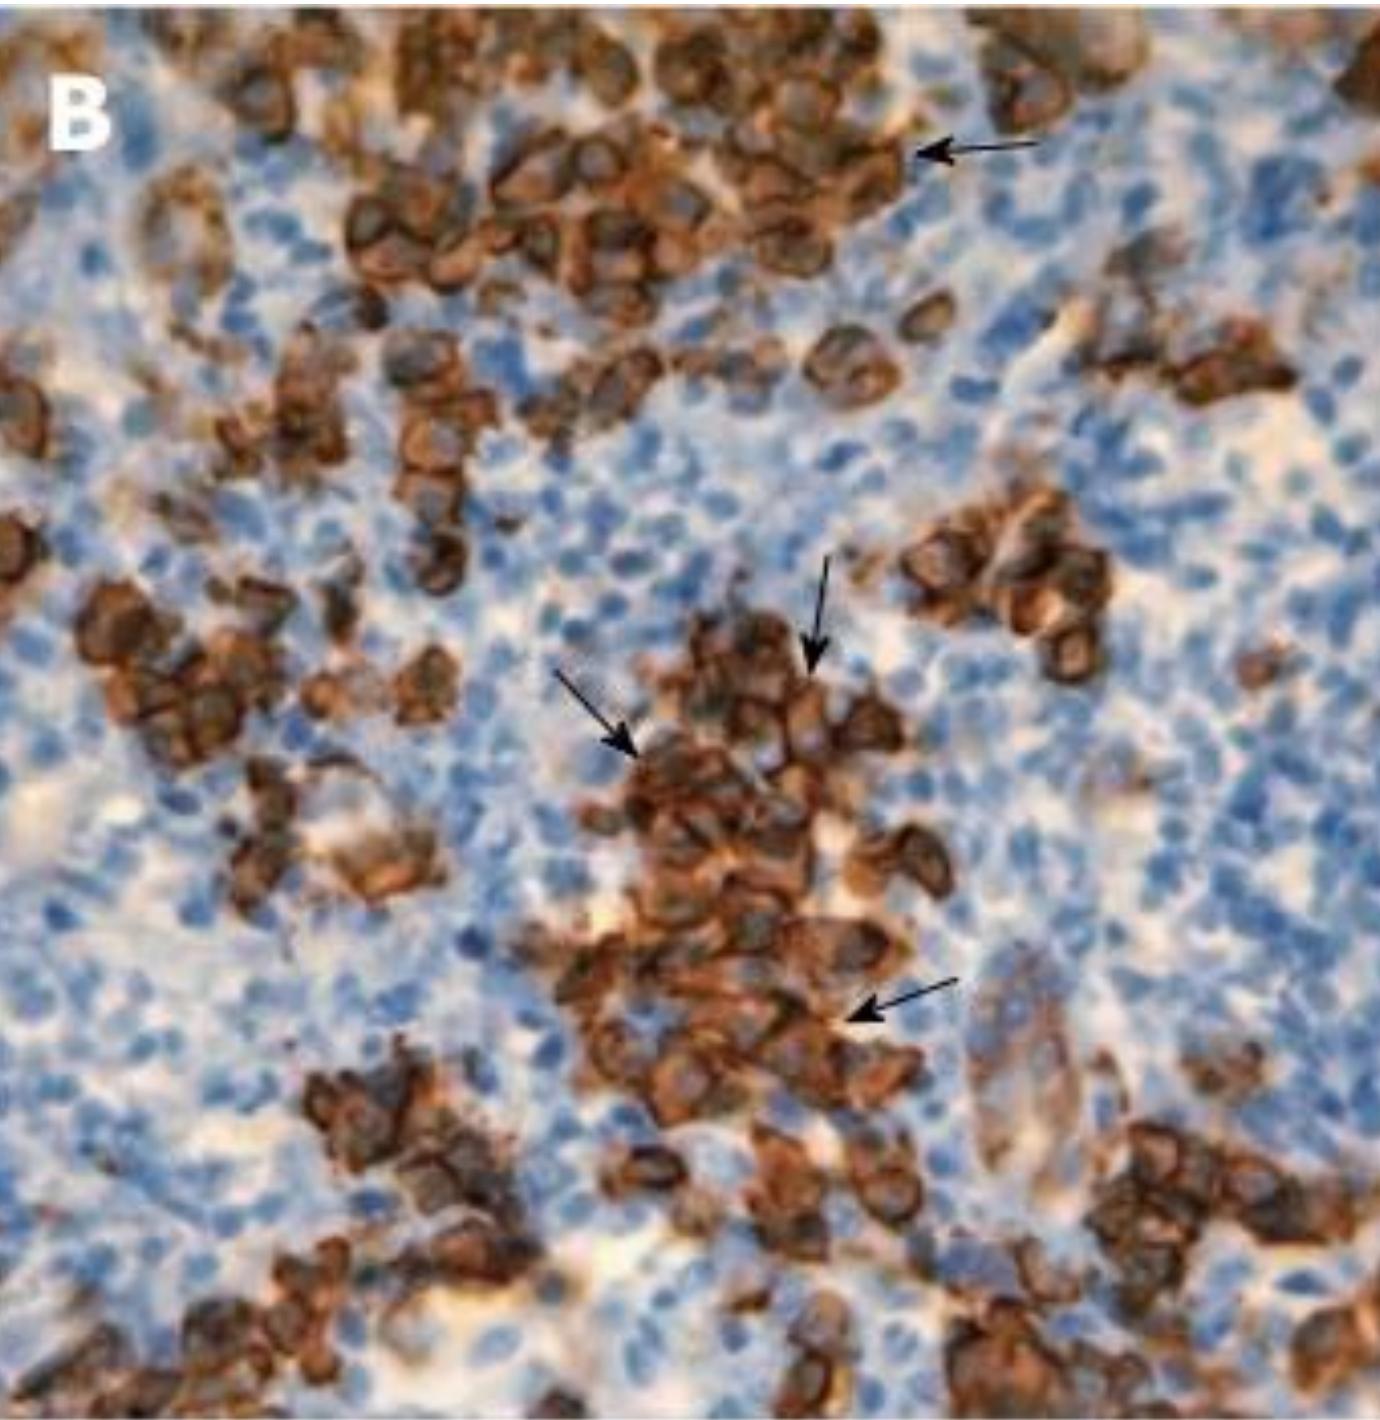

Serological diagnosis:

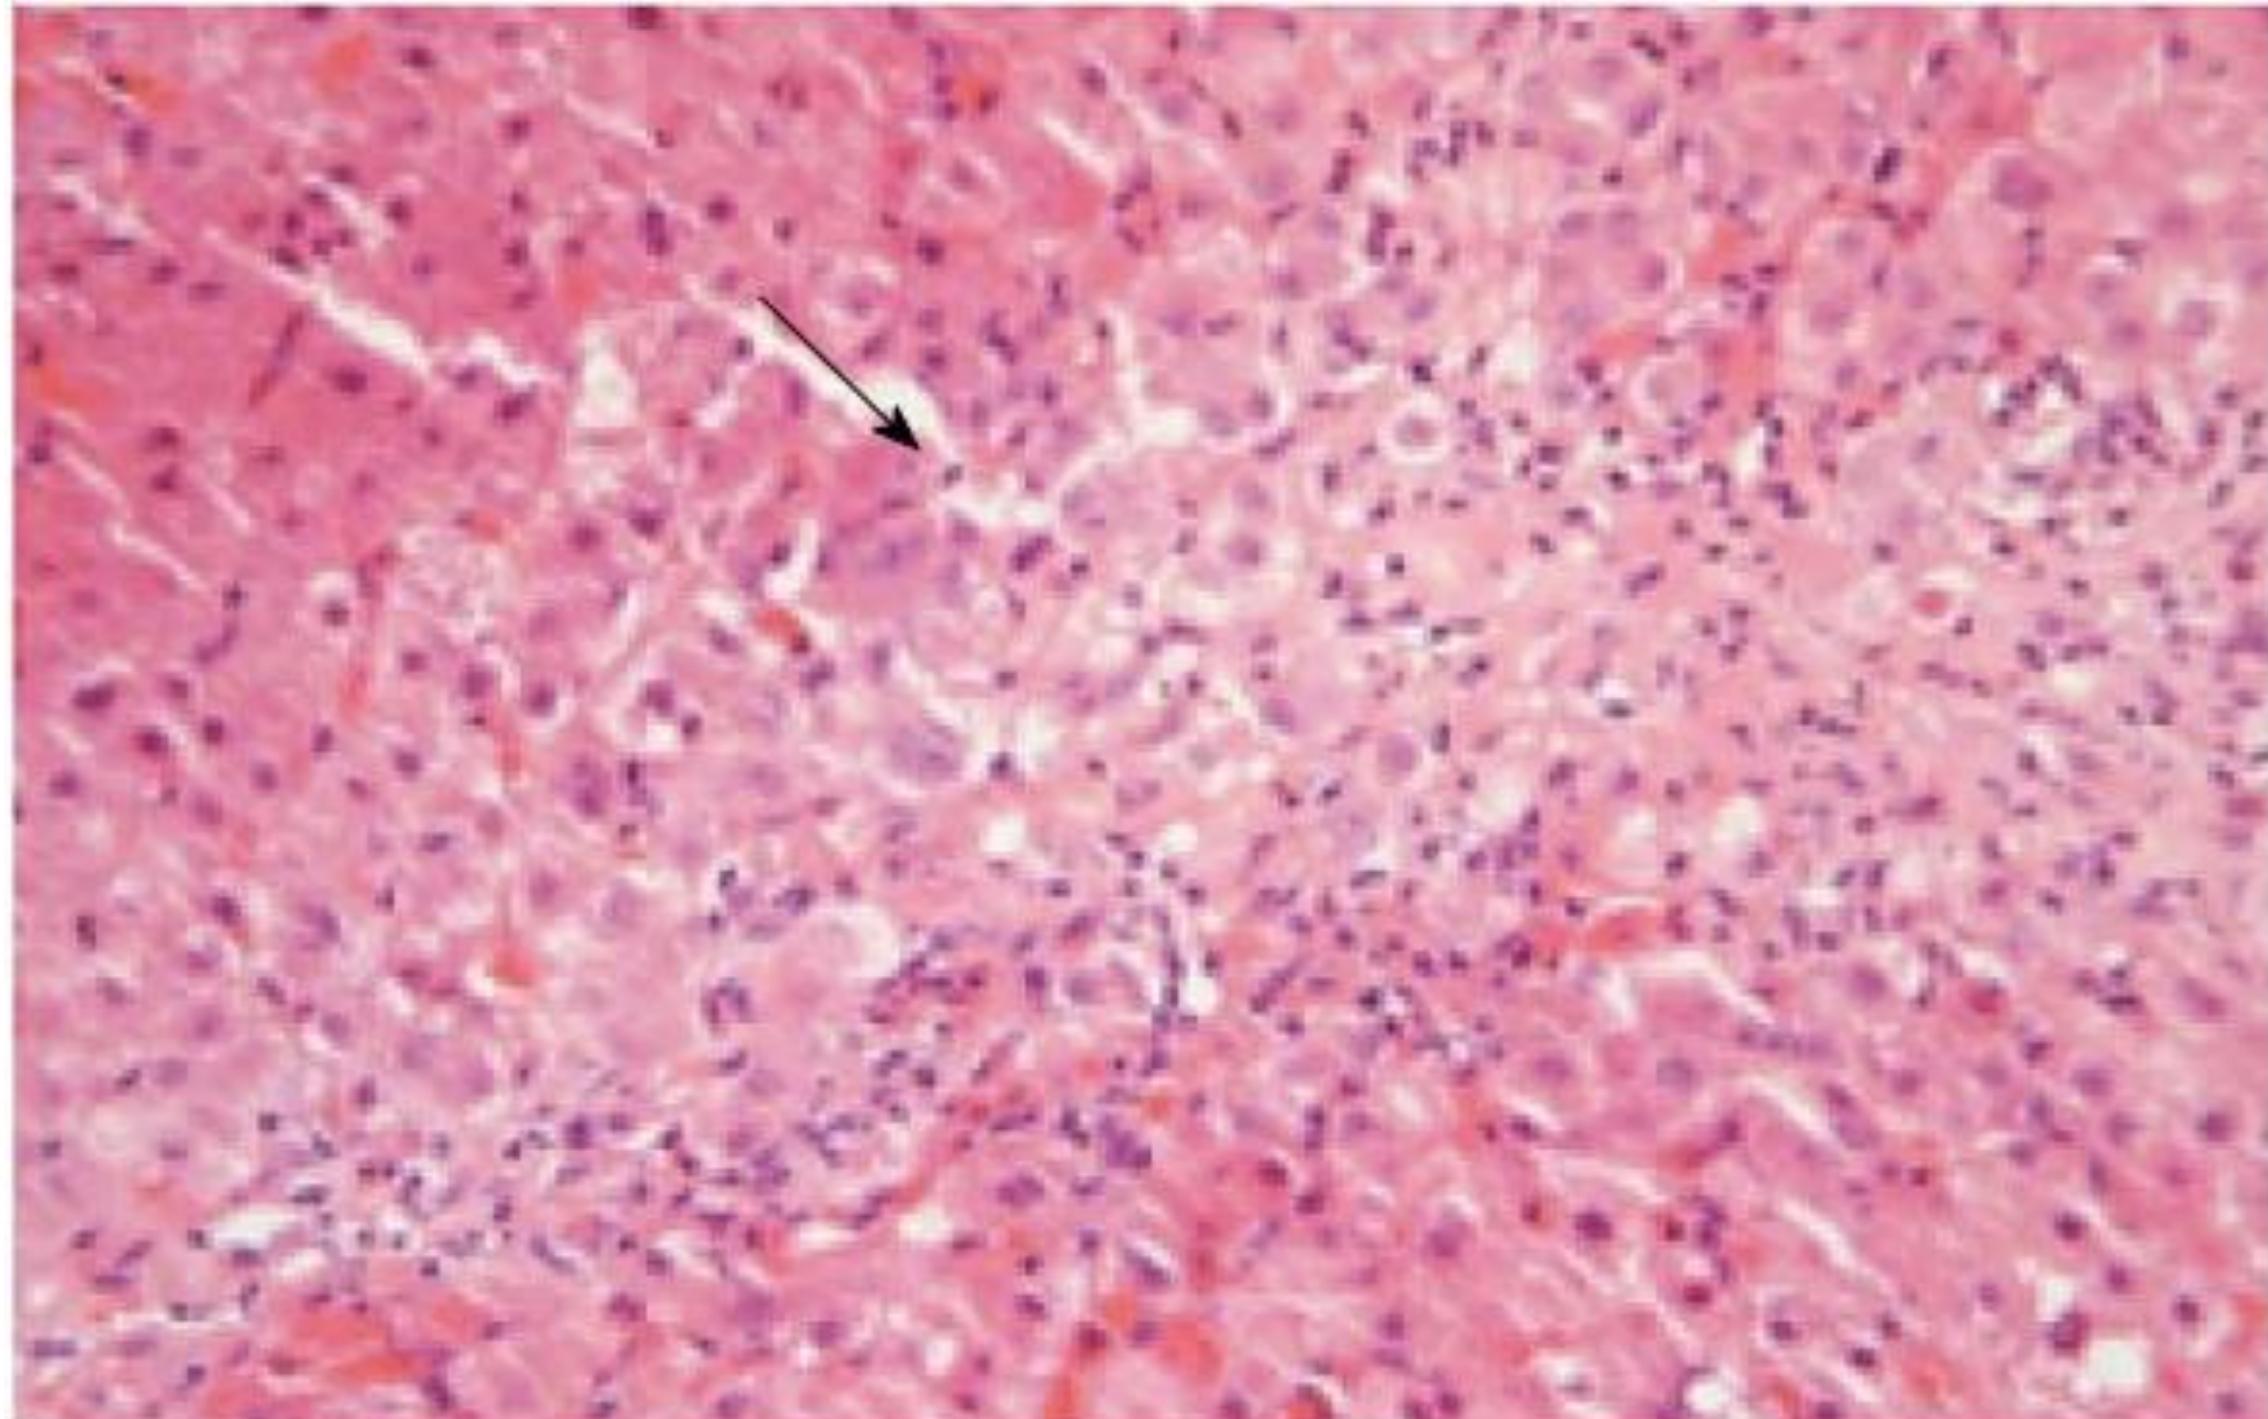

- an increase of AB
- increased IgG
- hypergammaglobulinemia

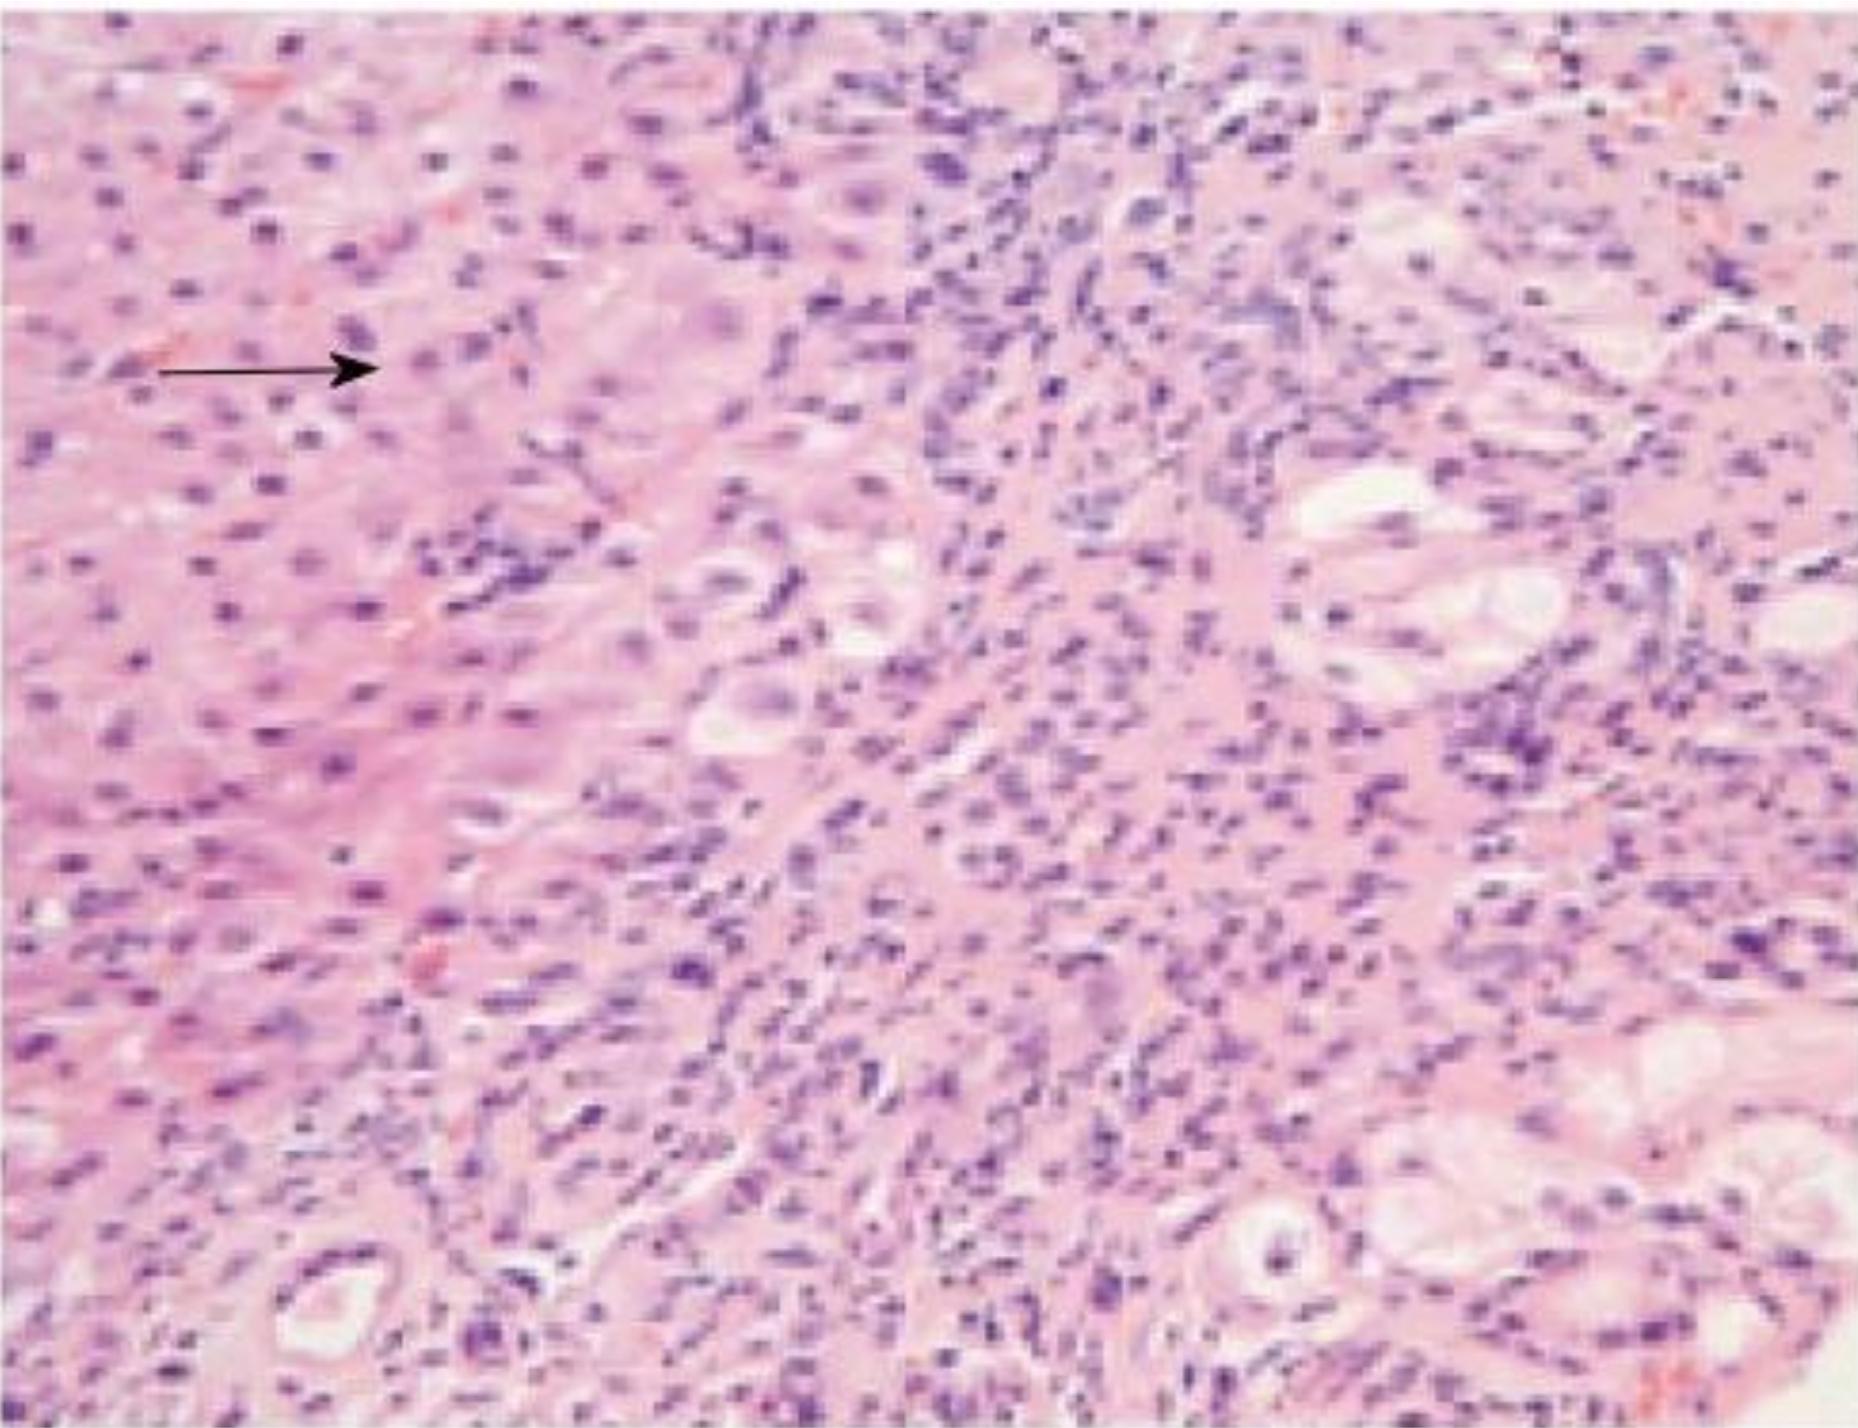

Manns, M. P., Lohse, A. W., & Vergani, D. (2015). Autoimmune hepatitis – Update 2015. *Journal of Hepatology*, 62(1), S100–S111.
doi:10.1016/j.jhep.2015.03.005

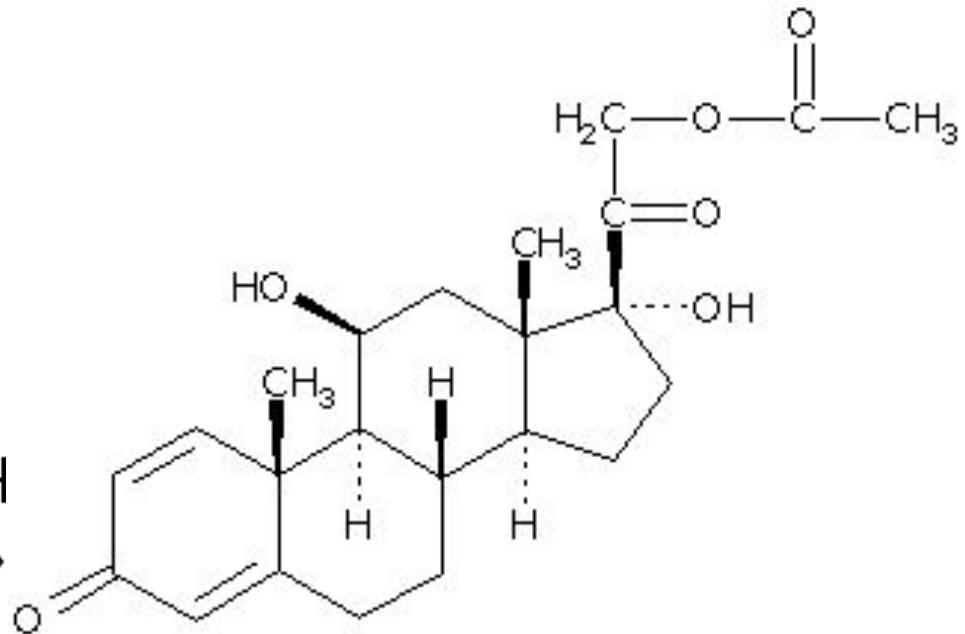

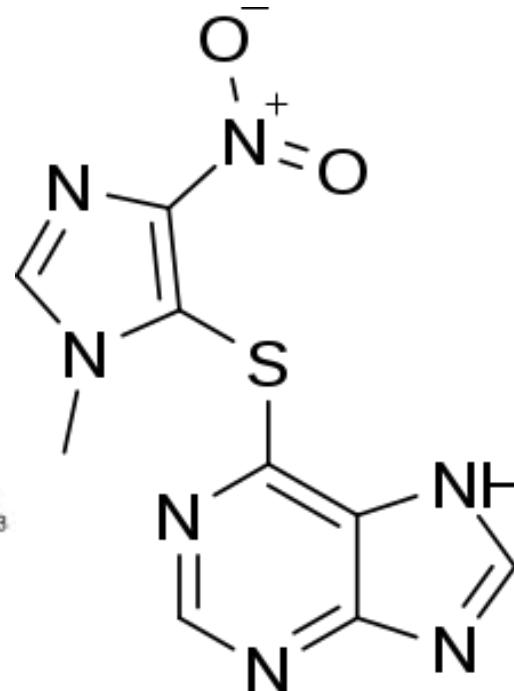

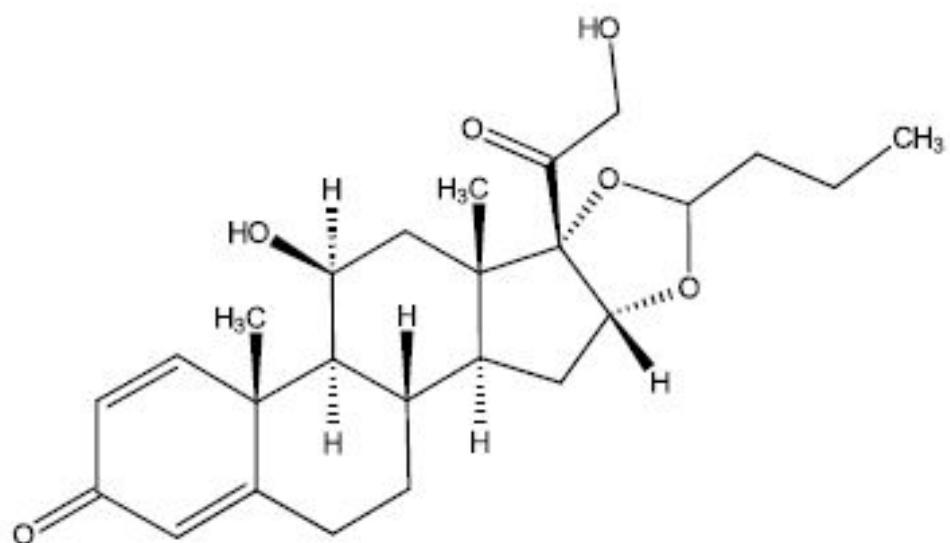

Treatment

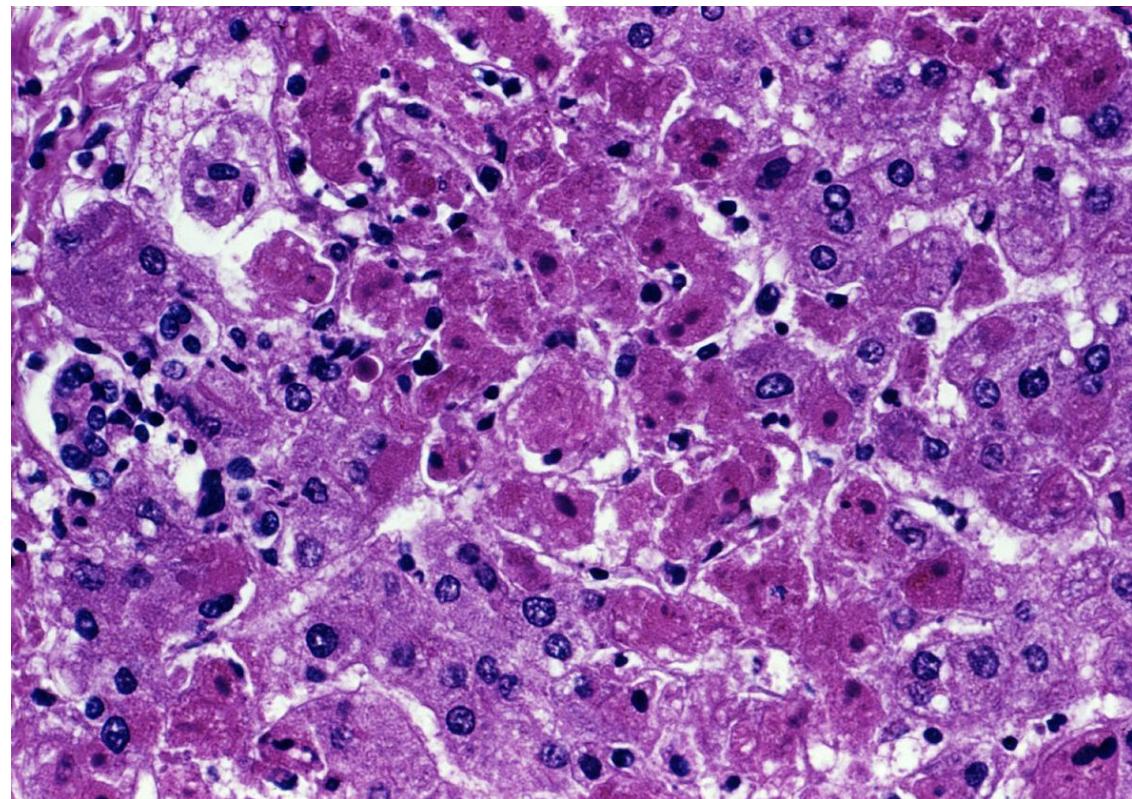

Types:

- induce therapy
- maintain therapy

Outcomes

acute liver failure

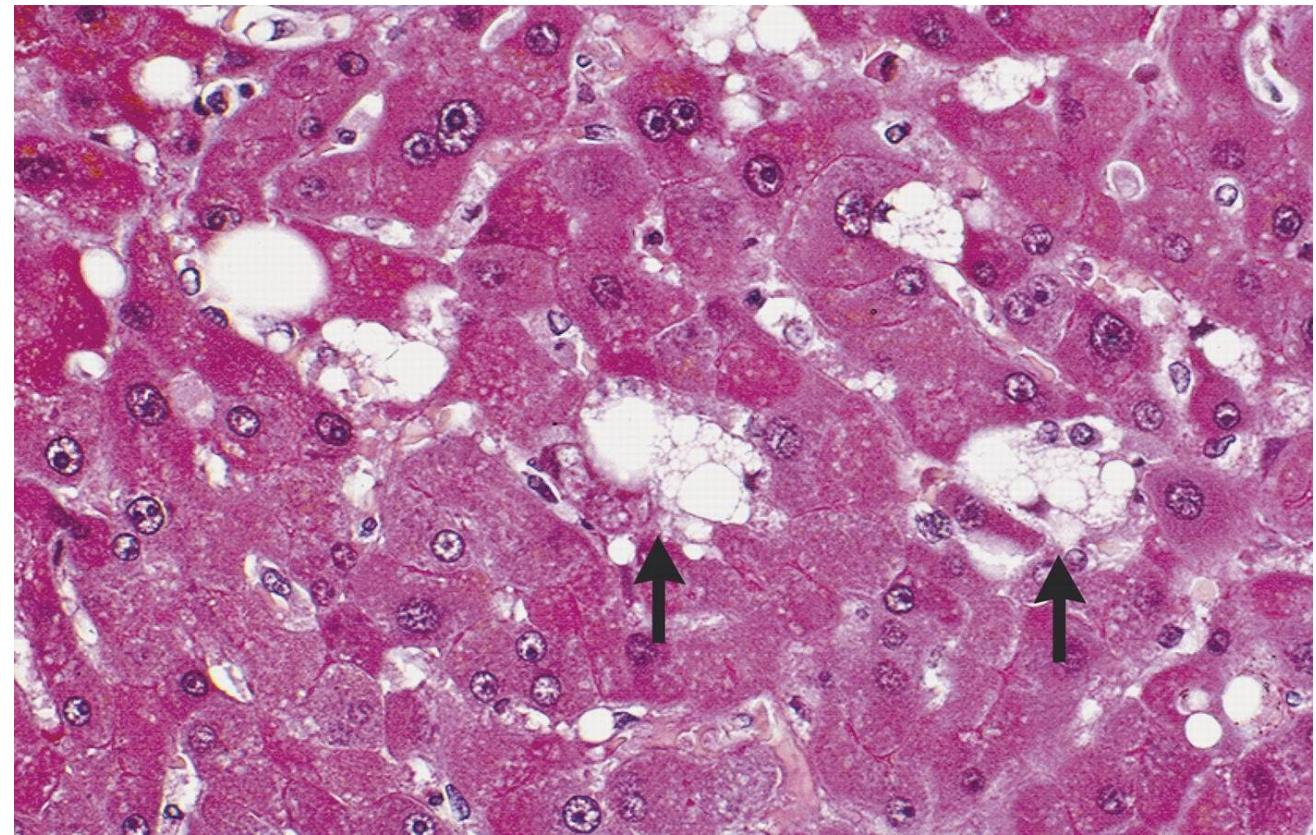

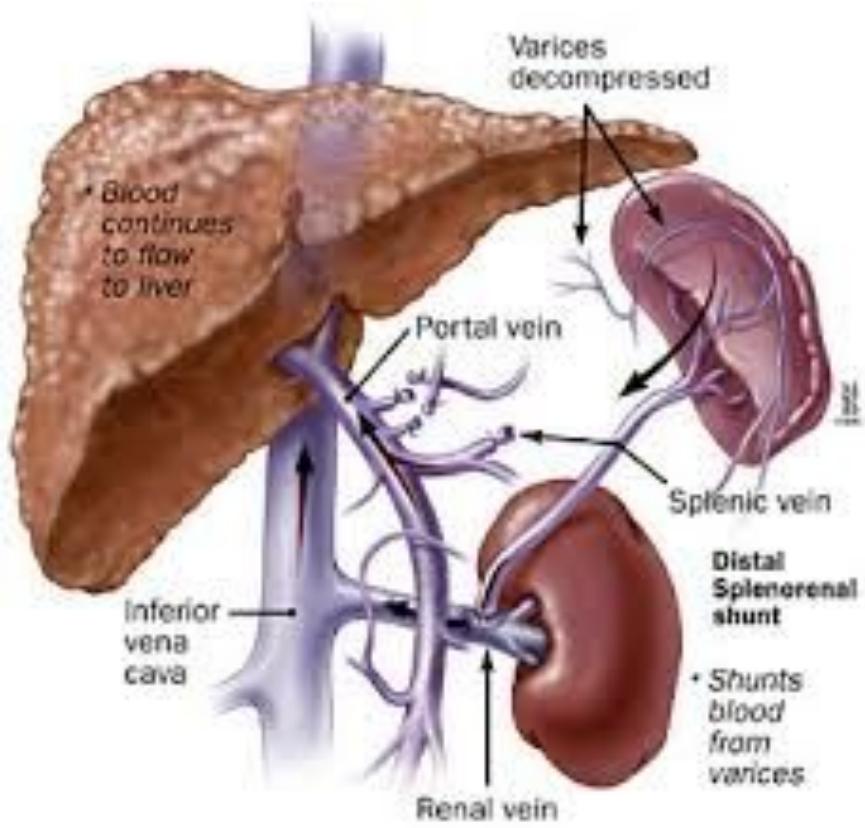

Outcomes

cirrhosis

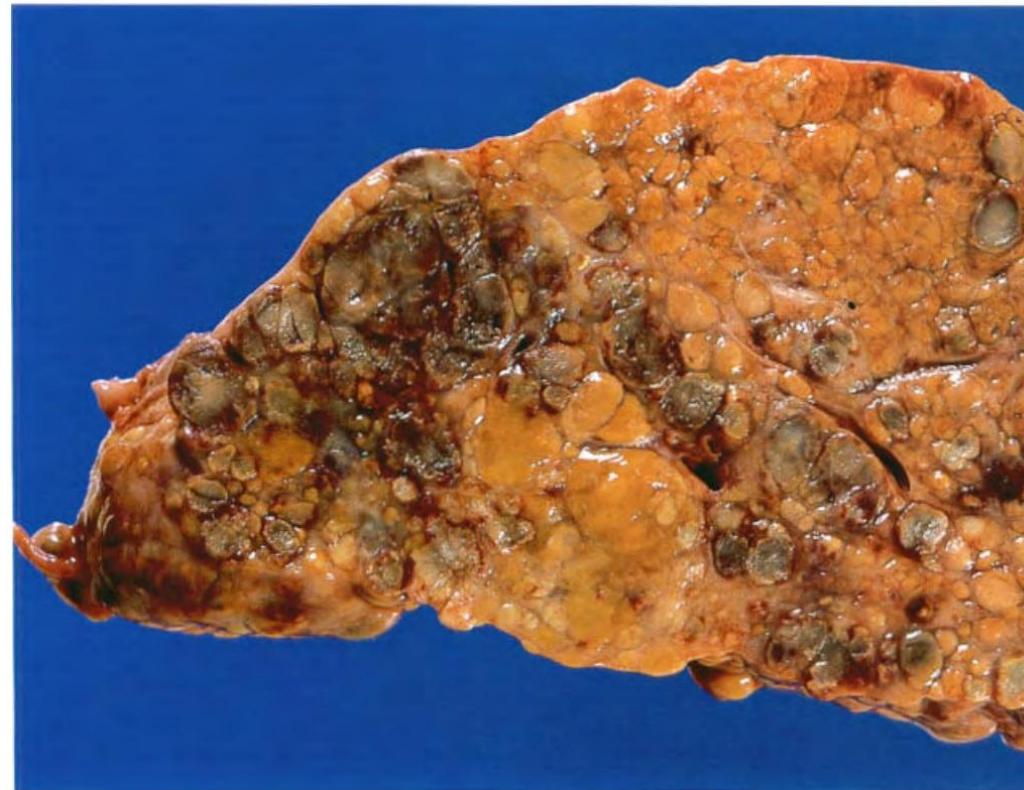

Outcomes

portal hypertension

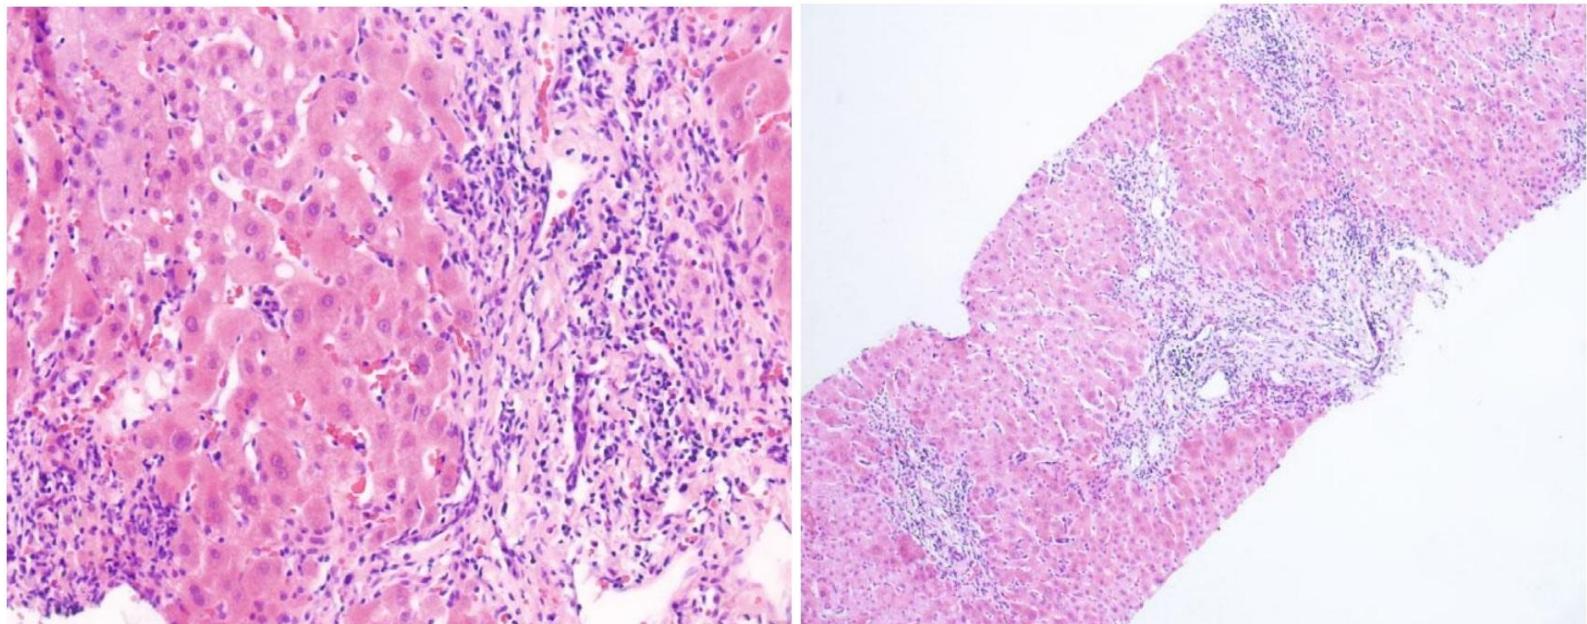

Outcomes

carcinoma

Conclusion

Autoimmune hepatitis is an actual problem, especially among the female population, so it is necessary to develop new ways to diagnose and treat this pathological process. Due to its chronic course, autoimmune hepatitis reduces the quality of life of people with this diagnosis.
